# **CIA** for handling of Ames spy case

US senators demanded fundamental changes in the culture of the Central Intelligence Agency and castigated director James Woolsey (left) for his response to the discovery of Russian spy Aldrich Ames within the agency's counterintelligence division. The Senate intelligence committee said in a report that

"gross negligence" had allowed Mr Ames, who was arrested in February and Jailed for life after admitting to spying for the Soviet Union and then Russia, to remain undiscovered for almost nine years.

Hong Kong Telecom, which is 57.5 per cent owned by Cable & Wireless of the UK, met market expectations with a 15 per cent rise in interim net profits to HK\$4.19bn (US\$542m), helped by increased equipment sales and rentals. Page 18; Lex. Page 14

TWA cuts losses: Trans World Airlines, the US airline struggling to avert a financial crisis, reported that cost-cutting had enabled it to reduce net losses in its third quarter to \$8m from \$61.7m.

BP reports demand ahead of forecast: Demand for petroleum products was exceeding expectations because of economic recoveries in the US, Europe and south-east Asia, British Petroleum said as it reported third quarter replacement cost profits up 23 per cent at £415m (\$655m). Page 15; Lex, Page 14

# Senators criticise WHO pours cold water on spirit of safe drinking

By Frances Williams in Geneva and Clive Cookson, Science Editor, in London

There is no such thing as safe drinking, the World Health Organisation declared yesterday. It launched a strong attack on "a campaign which for some time has been trying to give the impression that moderate alcohol consumption could be good for health".

According to Mr Hans Emblad, the Swedish director of WHO's

snbstance ahnse programme, there is "no minimum threshold below which alcohol can be consumed without any risk". Alco-hol is so dangerous, he said, that the message should be "the less you drink, the better".

The warning provoked a furi-ous counterattack from alcohol researchers. "WHO's statement is out of date and has not taken account of many recent findings," said Sir Richard Doll, hnnorary consultant at the Imperial Cancer Research Fund unit in

Oxford. He was principal author of a study published last month showing that a couple of drinks a day do more good than harm for middle-aged and elderly men.

"This is the usual set of knee-jerk opinions from the WHO and scientifically they are wrong," said Mr John Dnffy, director of statistics at Edinburgh University's Alcohol Research Unit.

The WHO listed a catalogue of woes associated with alcohol cancers and chronic liver dis-

eases, dependence, accidents, risky sex, suicides, family problems, violence and crime.

The reduction in risk of heart disease, WHO said, relates only to very low consumpting levels of the nrder of one drink every other day - and applies only to men over 35 and post-meno-pausal women. For other groups there was no protective effect, and above two drinks a day the risk nf heart disease "certainly

Mr Dnffy, on the other hand,

said yesterday that men drinking 20-30 units (a glass of wine equals one unit) a week had the Inwest mortality rates in Britain. He maintained there was no evidence that moderate drinking did more harm than good to

Mr Emhlad, a Swede who admits to the occasinnal glass of wine himself, said studies showing that low alcohol consumption helped prevent heart disease were heing misused for "commercial phrposes" to promote

the idea that drinking in moder ation is good for health.

The WHO, Mr Emblad sald, was not advocating prohibition: "We live in the real world." But Mr Duffy said that in the real world there were also political interests keen to promote the idea that all drinking is bad -notably the state alcohol monopolies in Nordic countries wanting to use the health argument to

protect their markets against

cheap imports when they enter the EU.

14-point declaration paves way for common market from Atlantic to the Gulf

# Mideast pledge on trade zone

By Julian Ozanne and Mark

Political and business leaders yesterday took the first steps towards creating a Middle East economic common market from the Atlantic to the Gulf, based on the free movement of goods, services and labour.

The three-day Middle East and North Africa economic summit in Casablanca was itself a sign of the progress made in peace negotiations in the region, and showed the willingness of past adversaries to discuss business.

A closing declaration pledged governments to "building the foundations" of an economic community, establishing a regional tourist board, and studying the creation of a Middle East development bank.

The 14-point declaration also said governments would encour-age the establishment of a private sector regional chamber of commerce and husiness council to facilitate intra-regional trade. It also hopes to develop a partnership between the public and private sectors and produce further free market reforms.

The declaration looked forward to "rapid movement" towards a regional peace which would Syria and Lebanon, though both countries boycotted

It said peace must be "powernomic growth and palpable improvement in the life and security of the peoples of this region". A lollow-up conference is to be held in the Jordanian capital Amman before June next year.

Mr Shimon Peres, Israeli foreign minister, said the revolu-tionary declaration was "not a piece of paper, but a birth" of a new Middle East which would allow Jews, Moslems and Christians to move freely across borders without fear. Mr Klaus Schwab, president of

the summit's co-sponsors - the World Economic Forum - wel-

## Astra joins Merck in **US** drugs marketing venture

By Richard Waters in New York

Astra, the Swedish pharmaceuticals group, yesterday paid \$820m to Merck, the US's biggest drugs company, for 50 per cent of

a joint marketing venture. The new company will take over marketing one of the higgest prescription medications in the US, the anti-ulcer drug Prilosec, which had sales of \$684m in the first nine months of this year.

Until now, the drug, developed by Astra, has been sold in the US by Merck, under a royalty agreement with the Swedish company. The new joint venture, named Astra Merck, will also develop and market new drugs from Astra and other companies. New gastrointestinal and cardiovascular drugs are likely to be the first considered by the joint venture, which could put it in direct competition with Merck. The US group's Vasotec and Mevacor are among the country's leading car-

diovascular drugs. Yesterday's deal follows a 1991 agreement between the Swedish and US groups, which have co-operated in the US since 1982. The 1991 agreement provided for Astra to buy a 50 per cent stake pany, provided sales by Merck of Astra products reached a certain

in the middle of 1993, said Dr Hakan Mogren, president and

# Moscow in IMF talks over plan to peg rouble to dollar

By John Lloyd in Moscow

The Russian rouble could be stabilised early next year if Moscow and the international Monetary Fund can agree a plan to peg the currency to the dollar, cut inflation and reform the

country's fiscal system.

The plan, being discussed by the fund, would be the boidest step since Russia's first attempts in 1992 to promote a market economy. However, the proposals carry the risk of a far more costly currency collapse than occurred last month, when the rouble fell nearly 25 per cent against the dollar in one day, and the central bank was forced to pump in foreign exchange to support it. Under the plan, Russia would

be able to use IMF funds to support the rouble against speculative movements in the currency

Mr Konstantin Kagalovsky, the retiring Russian executive director of the IMF, said the plan

and \$16bn to support market reforms in Russia next year. This would he by far the largest amount paid out to Russia or any other country over such a limited period.

The funds would be in the form of a standby loan of \$6bn; an additional \$2bn tranche of a reconstruction loan - Russia bas already received its limit of \$3bn from the original loan - an issue of special drawing rights worth about \$2bn; and a stabilisation fund of \$6bn.

Such funds, especially the reconstruction facility and the SDRs, are controversial and will require delicate negotiation by Mr Michel Camdessus, the IMF managing director.

His proposal to extend the reconstruction facility and an issue of special drawing rights to developing countries and economies was rejected at the IMF Madrid summit last month by a majority of the fund's members. Mr Kagalovsky added that the under agreed conditions, as Russia saw fit to support the rouble once it had been "pegged" to an exchange rate against the dollar. This would mark a departure from the IMF's normal approach - evidenced in its \$1bn fund to back the Polish zloty when it was pegged in January 1990 - which is to promise support for the currency but not to pay it to the country in question. Bankers believe the rouble

would be pegged at a lower rate Rbs3085 to the dollar, at perhaps Rbs3.500-3.700 to the dollar.

Stabilisation would go hand in hand with a tough monetary and credit policy, a refusal to use credits from the Russian central bank and a determined effort to improve tax collection - running in the current year at about half of the forecast income. Much of this has already been promised in the draft 1995 budget. Talks on an IMF deal will resume in November.

# Russian PM calls off visit to Poland

By John Lloyd in Moscow

The Russian prime minister. Mr Victor Chernomyrdin, last night called off a two-day visit to Poland due to start tomorrow because of an increasingly bitter dispute over alleged Polish police brutality towards Russians in Poland.

The move, announced on the main Ostankino channel television news, comes in spite of the planned signing of a multibillion dollar deal to construct e gas pipeline which would allow Russia to escape from its dependence on Ukraine for the transport of one of its most

valuable exports to the west. The row, which has worsened in the past two days, concerns an incident in Warsaw's eastern railway station on October 23. According to the Russian side, several Russian passengers were beaten by Polish police and jailed.

Mr Chernomyrdin had earlier yesterdey cancelled a scheduled news conference with e group of Polish journalists because, according to Mr Valentin Sergeyev, his press secretary, "Russia has not yet received e satisfactory reply from the Polish authorities to its protest about the incident".

diplomat at Warsaw's embassy in Moscow, said last night that the Polish note, sent yesterday to the Russian foreign ministry, had expressed "regret" at the incident. However, it had underlined that the Polish government could not comment further while an investigation

was proceeding. Mr Michalski stressed that the Russian consul in Warsaw had been informed immediately about the incident on the day it happened. Because it had not been e working day, bowever, e representative of the Russian consulate had not

Mr Artur Michalski, e senior contacted the police or the through Belarus to the Yamal ipiomat at Warsaw's embassy Russians detained by them peninsula in northern Siberia, peninsula in nortbern Siberia. until the next day. The incident has become a

cause célèbre in the Russian press and in political circles, with a range of public figures calling on Mr Chernomyrdin to cancel his trip. The hope expressed by Mr

sian foreign minister, that the incident and the visit should be viewed separately, now seems to have been dashed. Mr Chernomyrdin had been due to sign an agreement on

the inanguration of parallel

bad loans

By Christopher Parkes in Frankfurt

German finance market watchdogs yesterday shut down a Frankfurt bank which had been crippled by bad loans to clients allegedly introduced to it by Mr Tevfik Ozal, son of Turkey's late president, Mr Turgut Ozal.

The Deutsch-Schweizerische Bank, which recently passed into the control of Mr Sergio Cuoghi, an Italian investor, had its licence withdrawn and about DM100m (£41m) in customer deposits frozen.

The action was taken, said the banking supervisory office, because "considerable edditional valuation adjustments and write-offs" were needed in its credit husiness.

According to the latest available figures, DSB, a small, unprofitable operation, had a balance abeet total of DM233.8m at the end of 1992, down from DM400m two years A statement from the bank

yesterday said it had been left with no basis for continuing in business after Mr Cuoghi failed despite "several reminders" to inject new capital and credit guarantees due in mid-

September. Mr Cuoghi, who was described in the statement as the "extremely rich" head of the EhroFin financial group with offices in Geneva, London and New York, recently bought 75 per cent of DSB from Mr Ozal and the Alem Bank of Kazakhstan for an undisclosed sum. The remaining 25 per cent is beld by the Zug-based Swiss Cantobank.

Mr Ozal resigned his management board seat two weeks ago after Mr Cuoghi took control, according to Mr Volkmar von Alten, a DSB director.

Mr von Alten, e member of the bank's management board since last February, said bad loans to three Turkish banks which were the cause of DSR's problems hed been on the books when he arrived. The banks, introduced by Mr Ozal, had since been ordered to close by the Ankara government.

"I am not responsible. It is very difficult to judge what has happened," he said, adding that he would offer to resign once the affair was cleared up. The scale of the bad loans was "not outrageous, but enough". Mr von Alten, formerly a senior manager et Dresdner Bank, said he was certain Mr

Cuoghi would meet his commitments, including the injec-tion of additional capital, possibly by as early as this week. As for the future of DSB, he said that Mr Cuoghi, rather than applying for a new licence to operate tha business as a bank, intended to run It in future as e "finance and investment bouse". "I think Mr Cuoghi is a good businessman and is determined to stick to

his commitments," he said. Mr Cuoghi was at his offices in Chelsea, London, yesterday, hut could not be contacted for

#### EUROPEAN NEWS DIGEST

# Clashes worsen across Bosnia

The war in Bosnia was in danger of escalating yesterday amid reports that rebel Serb forces in Croatia have mobilised to aid their ethnic allies across the frontier and Bosnian Croats have joined e Moslem offensive in the north-west.

Some 2,000 Serb fighters from Krajina, the self-styled Serb state in Croatia, are ready to cross into neighbouring Bosnia, say local Serb leaders. Bosnian government troops last week launched an offensive from Bihac, the north-western Moslem enclave which is also e UN designated safe area, gaining some 250 sq km of territory from their Serb foes.

The threat of Serb retaliation yesterday increased with reports that Bosnian Croats have joined Moslem troops in the region. "They have taken up Serb positions on the west bank of the Una river, south of Bihac town," said Mr Paul Risley, UN spokesman in Zagreb. HVO troops, Bosnian Croat forces, had even engaged Krajina fighters in Croatia itself, along the western flank of the Bihac pocket, said Mr Risley. The HVO had also moved troops to the confrontation line near Kupres in central Bosnia, where Moslem forces had also gained ground against the Serbs. The stepped-un involvement of the HVO will make it more difficult for international mediators who have been trying to broker a deal between Zagreh and Krajina Serbs and may also put Serbia's President Slobodan Milosevic under pressure to intervene. Laura Silber, Belgrade

#### Canal-Plus leads digital race

Canal-Plus, the French media group, is expected to be the first European broadcaster to launch a digital television service when it starts digital transmissions late next year. Société Européene des Satellites (SES), the Luxembourg-based com-pany that operates the Astra satellites, said yesterday that it had signed e contract with Canal-Plus for the French company to relay a digital service from the Astra 1E and Astra 1F satellites, which will be launched in 1995 and 1996 respectively. Digital television, which enables broadcasters to relay higher quality screen images and to transmit up to 10-times the usual number of channels from each satellite, is already on stream in the US, where Direct TV began digital transmissions this summer. Almost all the main European broadcasters have expressed interest in launching digital services over the next decade, but Canal-Plus is the only European broadcaster to have committed itself to booking satellite space for its forthcoming service. The French company, according to SES, could start digital transmissions from late next year when des-crambling devices will be available. Atice Rawsthorn, London See Editorial Comment

#### Yeltsin sacks general in probe

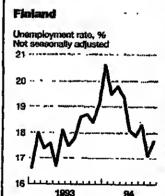

General Matvei Burlakov, deputy Russian defence minister and the centre of press and political allegations of massive corruption in the Western Group of the armed forces which he had commanded until September of this year, was sacked by President Boris Yeltsin last night. The presidential decree said that Gen Burlakov. 59, had been fired "to preserve the honour of the Russian armed forces and its leaders . . . in connection with investigations which are currently in progress". The sacking comes two weeks after the murder of a young journalist, Dmitry Kholodov, who had been investigating the allega-tions of corruption and had already published details of it. The move puts in doubt the future of Gen Pavel Grachev, the Russian defence minister, who had strongly defended Gen Burlakov and refuted the allegations of corruption. John

#### Danish tax minister resigns

Mr Ole Stavad, the Danish Social Democrat minister of taxation, resigned yesterday when he accepted responsibility for e controversial rescue action for e Jutland bank in 1993. He was replaced by another Social Democrat, Mr Carsten Koch, an economist with a career in the labour movement. Mr Stavad has been under pressure to resign since his officials agreed, and he approved, a tax write-off which was demanded by a Jutland savings bank, Sparekassen Nordjylland, as the price for taking over most of the assets of Himmerlandsbanken, which serves the town of Hobro, in Mr Stavad's constituency. A recent report from a judicial inquiry confirmed that officials involved had acted illegally. Hilary Barnes, Copenhagen

#### ECONOMIC WATCH

#### Finnish unemployment rises

Finnish unemployment rose to 17.7 per cent in September from 17.1 per cent in August, breaking a downward trend which has seen joblessness fall from a peak of more than 20 per cent at the start of the year. The figures confirm the recovery in the economy after three years of recession, but emphasise the gulf between the booming export sector and the still sluggish domes-tlc economy. Industrial employment is rising, but the situation has yet to improve in the retail, construction and service sectors. Finland has

experienced one of Europe's worst unemployment crises because of the loss of vital trade with the former Soviet Union, the bursting of e huge 1980s credit boom and international recession. However, the situation has helped to keep the lid on inflation. The Bank of Finland said yesterday there were no signs that core inflation would be above the target level of 2 per cent, but uncertainties, including autumn pay talks, meant no easing of monetary policy was possible. Christopher Brown-Humes, Stockholm Denmark's current account surplus for July fell very slightly to DKr2.60bn (£271m) compared with a surplus of DKr2.56bn a year earlier. In August, the current account snrplus also declined slightly to DKr4.1bn from DKR4.3bn for

the same month last year. Romanian industrial output in September rose 2.8 per cent after falling 1.4 per cent in August. It rose 8.0 per cent

considerable controversy during the 1980s when he attempted to develop coastal land close to a large wild life resort south of Seville.

# Brussels lowers its sights over EU employment rules

When Mr Padreig Flynn, the European Union's pragmatic David Goodhart, Labour Editor, chronicles a marked retreat by the Commission social affairs commissioner, unveils new plans for Europewide employment legislation early next year, the UK govern-

ment will almost certainly lay about them with relish. But the predictably noisy response will not disguise a marked retreat by Brussels from rule-making in employment. The scheme Mr Flynn is working on will be a mere echo of the aggressive "social action programme" published by the

European Commission in 1989. Already, tha new emphasis on job creation of last December's white paper on employment by the outgoing Commission president, Mr Jacques Delors, and Mr Flynn's own,

social policy has led to a more cantious attitude towards further Europe-wide legislation. insiders now talk about turning DG5 - the Commission's

social and employment affairs directorate-general - into Europe's employment "thinktank", spreading the latest ideas about job creation, rather than Europe's "labour ministry" imposing new regulations. This would suit Mr Flynn. Ireland's only commissioner, he held on to the social affairs job last weekend when Mr Jacques Santer, the incoming

Commission president, redis-

tributed portfolios. He does not

heve strong convictions on

most employment issues. He is

regulatory times in Europe, hut he is also aware that the European parliament and Europe'a trade unions have to be kept sweet.

He will thus certainly make some proposals for further legislation when he unveils his own social action programme in March. These are likely to include measures requiring employers to train, and further measures on sex equality and working time.

But that will constitute e tame list compared with the one drawn up in 1989 by Ms Vasso Pepandreou, the more activist Greek social affairs commissioner.

working time. European works councils, and young workers which led to constant battles between Britain and Brussels, and then to Britain's right to "opt-out" from some employment legislation agreed in the Maastricht treaty in 1991. Over the next few months

gramme, in particular the "posted workers" directive and a directive on part-time work. Both of these, which are still in draft form until voted into EU law by ministers, have aroused controversy in several member states (which is why they have not been tackled earhappy to move with the less ing directives on controlling support, especially from

France and Germany.
Under the posted workers directive, companies sending employees to work in other EU states would have to observe the terms and conditions operating in those states. Countries such as Portugal, Greeca, Ireland and Britain, which

Mr Flynn still needs to clear up heve large numbers of their the loose ends of that 1989 procitizens working abroad, have resisted the directive. There is also disagreement between member states about whether it should be subject to majority or unanimous voting when it is discussed by employment ministers on December 6.

However, France is backing the draft directive strongly It was that long list - includ- lier) but they also have strong partly because it has just passed domestic legislation

requiring foreign employers to pay French wage rates and wants to avoid legal proceedings against it on competition grounds.

The Bonn government, which currently holds the EU presidency, also backs the directive, although it is ready to restrict it to the construction sector which is where Germany has been most affected because of its unificationdriven construction boom.

On the part-timers draft directive, which requires parttimer workers to receive the same hourly pay and conditions as full-timers, Bonn is keen to press the issue because it fits with its domestic agenda of promoting part-time work.

the power to block this particular directive because It is subject to unanimous voting, and barring a big surprise it will use that power. Thet means the issue is likely to become the second issue to trigger the British "opt-out". It will probahly be passed in all other member states next year.

The part-timers directive will be only the second directive to exclude Britain - following the directive on European works councils earlier this year - and will thus cement a "multispeed Europe" at least in the employment field. Although Brussels is in theory opposed to this approach in the employmeot field, and wants to draw Britain back into the fold, it may become a model for other parts of the EU as it expands.

# Worse MPs expose 70-year trail of export credit err By Guy de Jonquières, pretation it poss credit errors

**Business Editor** 

Britain's Export Credits Guarantee Department has said administrative mistakes which caused it to make overpayments of £83m (\$131m) to British exporters since 1975 may have been going on for more than 70 years.

The admission is contained in a report yesterday from the House of Commons Public Accounts Committee. It severely criticises the ECGD for sloppy administration, poor internal controls and slowness in deciding whether to discipline staff responsible for the

The Dapartment of Trade and industry has already decided not to try to recover the overpayments, most of which arose from insurance of export orders from Nigeria.

The committee said the overpayments, first disclosed by a National Audit Office report in February, had occurred because ECGD officials had misinterpreted policies governing recoveries on supplier credit insurance to exporters. After the department took legal advice, its London office

had applied the correct approach since 1990, However, its older Cardiff office - which now belongs to NCM, the Dutch export credit insurer continued to misinterpret the rules until 1992.

The ECGD told the committee that though overpayments had been traced back to 1975, it was unsure when the misinterpretations began and "believed it possible" that they had taken place since 1919.

The committee also said the ECGD had given "conflicting evidence at different times" about how far its inability to provide a more accurate figure for overpayments was due to its destruction of case files.

The committee expressed concern that internal audit procedures had not discovered the two offices' different methods, which had been detected only in 1992 hy independent consultants brought in to computerise the department.

The committee expressed surprise that the ECGD had not sought proper legal advice on how to interpret s new form of credit guarantee introduced in 1975. It said this had produced a "sloppy system", made worse by lack of co-ordination between the London and Cardiff offices.

The report said the overpayments had prompted the ECGD to review its operations and strengthen links between its administrative staff and law-

However, the committee expressed concern that almost two years after the differences in the ECGD's methods had been discovered, the department had still not decided whether to take disciplinary action against its stair.

# Japan to press Apec on trade liberalisation

By William Dawkins in Tokyo

Japan will signal its clear support for a degree of regional trade liberalisation at the Asia-Pacific Economic Co-operation Forum summit in Bogor,

Indonesia, in two weeks' time. It will press for a middle way between the free trade zone advocated by the US, Canada and Australia and the loose regional alliance preferred by east Asian members of the 17nation forum, said Mr Tetsuya Endo, Japanese ambassador for

Asia-Pacific co-operation. Until recently, Tokyo bas taken a mildly negative back seat at Apec, reflecting a split between the foreign ministry, slow to accept the forum's value, and tha ministry of international trade and industry, eager to push Apec as a trade and investment opportunity. Support from Indonesia,

this year's holder of Apec's rotating chairmanship, is one factor in tipping the government in favour of Apec.

ise trade between Apec mem-2020. Japan is eager to see Apec, representing half the world's trade, make this modest step forward from the vague accord of the first leadyear, Mr Endo argued.

But for agreement on a liberalisation deadline, details of what free trade entails must be left for later summits, said Mr Endo. That would leave it up The summit is expected to to Japan, which takes the Apec

make a commitment to liberal- chairmanship in 1995, to pro- Apec to develop into a trade ernise, likely to be an imporduce practical free trade steps bers by a target date, possibly in time for next year's summit in Osaka. "Whether we like it or not the burden will fall on Japan," said Mr Endo.

Japan "is not adamant at all on the creation of a free trade ers' summit in Seattle last area," but does support a first small step in that direction, the unconditional granting of Most Favoured Nation trading status between Apec countries, he said.

Tokyo shares some of the US preference for encouraging

settling trade disputes that cannot be resolved bilaterally or by the new World Trade Organisation. A three-layered world trade system, of the WTO, regional bodies like Apec and bilateral relations, was "best for Apec and Japan," said

negotiating forum, but only for

Mr Endo. Japan accepts that moves to free trade in Apec need to be accompanied by govsrnment and private sector efforts to help poorer members to mod-

tant point of the Bogor talks said Mr Endo. Tokyo and other rich members will push for the Apec summit to agree on more concrete steps, such as a code on cross-border investment rules. This is likely to be agreed by trade and foreign ministers before the leaders' summit. They are also expected to set up a committee to work for common Apec-wide standards for manufactured goods and food and joint customs procedures.

# Uruguay deal will boost US output

By Guy de Jonquières, **Business Editor** 

US economic output will be boosted by about \$65bn a year by 2004 as a result of higher efficiency generated by trade liheralisation agreed in the Uruguay Round, according to a study by the Washington-based Institute for International Eco-

The institute says tariff reductions planned in the round will increase US net exports by \$19.1bn and create 265,000 jobs by 2000.

The anthora reject as groundless objections by some members of Congress that US sovereignty will be undercut

by the new World Trade Organisation, which is due to succeed the General Agreement on Tariffs and Trade on

Published barely a month before Congress reconvenes for what promises to be a close vote on ratification of the Uruguay Round, the study will provide ammunition for the Clinton administration in its efforts to secure approval of

The study says that if tariff cuts agreed in the round are phased in over five years from next year, they will lead to increases of \$41.9bn in US exports and \$22.7bm in imports US consumers would gain \$11.7bn a year in the same period from lower prices from reduced tariffs on imports. services. while US exporters would gain about \$10.9bn from improved opportunities on foreign markets. US tariff revenue, mean-

while, would fall hy \$11.4hn. By 2004, tariff cuts, the benefits of planned liberalisation of textile trade and dynamic economic gains generated by the round should add \$65bn to US output, or roughly 1 per cent of gross domestic product.

The authors say the forecasts are conservative, because they exclude the effects of planned liberalisation in world agricultural trade and public procurement, and of possible agreements in the WTO to free international competition in

They say that though the Uruguay Round promises to produce a modest increase in US employment, its most important result will be to stimulate the creation of more productive and better paid

reduce US sovereignty are misplaced, they say, because the organisation must act by consensus and cannot impose decisions on the US which conflict with the WTO. The study with its national laws.

Furthermore, the controver-

# **US** and Japan extend deadline on glass talks

By Michiyo Nakamoto in Tokyo and Nancy Dunne in ..... Washington

Japanese and US trade officials yesterday said that few outstanding issues remained over measures to improve foreign flat glass, despite the failure of talks to secure an accord.

Japanese officials were confident that an accord could be reached after further negotiations since the two sides have already agreed the basic principles for opening Japan's flat glass market to imports. "The calendar has just been

extended." said Mr Ryutaro Hashimoto, Japan'a minister for international trade and industry, who said the negotiations would continue later. "Wa made some progress but . . . some technical and practical problems remain," the trade minister added.

Mr Mickey Kantor, the US Trade Representative, also put a positive spin on the failure to reach agreement within the 30day deadline which expired on Discussions, he said, would continue "for a limited period

of time." Progress had been made, and only a few technical and substantive issuea remained outstanding. Japan has agreed to promote the use of foreign-made glass in some government-funded facilities which would serve as

model projects. There is also broad agreement on the use of objective criteria to measure progress in import penetration. Differences main, however, over whether the objective criteria should be forward-looking, as tha US hopes, or should only measure past developments, as the Jap-

anese insist. Japanese officials are concerned that forward-looking measures could turn into restrictive targets aimed at ensuring a specific market share for foreign products in

the domestic glass market. Mr Steve Farrar of Guardian Glass said the US glass industry was "disappointed" in the failure to reach agreement in the month but urged continuing talks over the next few

If agreement is not reached soon, however, Mr Farrar urged the bringing of a Section 301 case, which provides for sanctions at the end of a year of investigation and negotia-

US officials have been concerned about the slow pace of negotiations since agreement was reached in principle on October 1. In amouncing the agreement. Mr Kantor said he expected "three quarters of the

Hashimoto: Difficult to know what to believe

100 largest Japanese wholesal ers and glaziers would obtain 30 to 40 per cent of their flat glass from non-traditional sources, a mixture of both for eign and domestic".

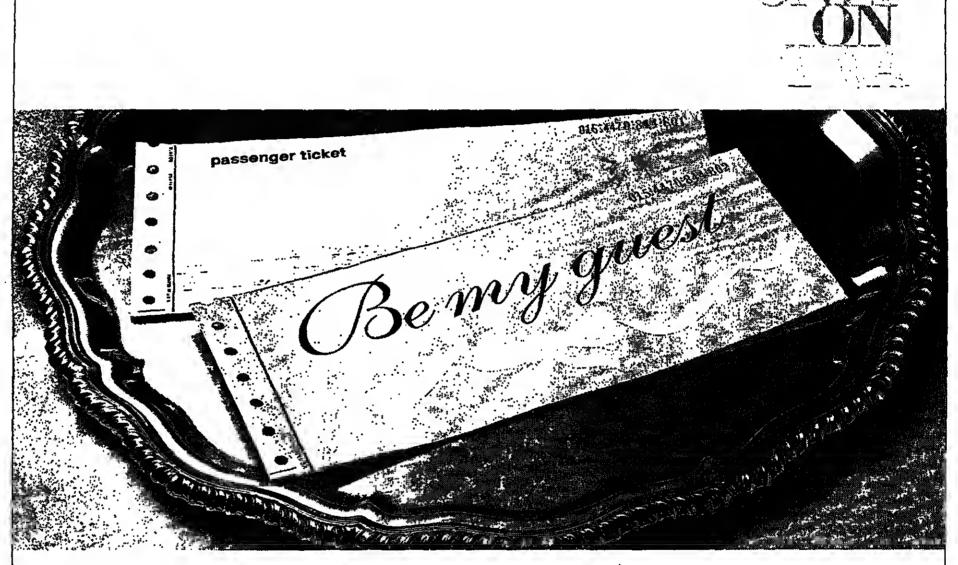

Mr Hashimoto subsequently wrote to Mr Kantor challenging this. "I hope this is some sort of misinterpretation of your remarks," he wrote. "But would like to urge you to refrain from making such remarks which could be interpreted in effect as requesting numerical targets. Such a comment clearly makes our future talks more difficult."

Whila the latest round of talks did not produce results, Japanese officials remained optimistic that agreement could he reached. Trada in glass products is not an emotive issue and it is unlikely that US trade officials would risk aggravating tensions with Japan over a sector in which it usually has a bilateral trade surplus, a trade official said. Last year Japan bought Y3.4bn (\$34m) more flat glass from the US than it exported there, according to Japanese govern-

ment trade statistics. The situation was less promising in the parallel talks on vehicles and vehicle parts. Negotiations have not been resumed since the US cited Japan's vehicle parts aftersales market as being characterised by "unfair and discriminatory trade practices" and umilaterally began an investigation under Section 301 of its trade act.

Mr Hashimoto yesterday reiterated that the use of Section 301 remained a major obstacle to resuming negotiations on these markets.

"Section 301 is still in effect. It is difficult to know what to believe when on the one hand they are saying "we are going to hit you" and on the other they expect friendly talks," he

Fly TWA and you can take advantage of our unique "Be my guest" offer.

All you have to do is bny a ticket for yourself to the US and you'll receive another one free.

But whereas ordinary companion ticket offers only allow your guest to travel with you, we're delighted to say we're far more generous

On TWA, we also give you the option of giving it to someone who'd like to fly over from the US and visit you at a later date.

What's more, the offer doesn't just apply to Ambassador Business Class or Royal Ambassador First Class passengers, because we've extended it to Comfort Class, (economy) as well.

For full details, just contact you local travel

# Washington expects bonanza with auction of airwaves

Tha US Federal Communicationa Commission has received applications from 74 companies, consortia and individuals to hid next month in its auction of hroadband wireless telecommunications frequencies, which it expects to be the largest ever auction of public sector assets. The licences are to run the per-

expected to compete with today's cellular telephone technology.

Applicants, who need not necessarily hid and must still make an up-front payment by November 18 if they want to take part in the auction, include all the regional Bell telephone companies, long distance telephone companies such as AT&T and Sprint, and cahle television groups such as Cox, TCI and Com-

But other companies such as through his company ALAACR EDS, the computer services subsid- Communications, for markets in EDS, the computer services subsidiary of General Motors, and Excelsior Parking have also applied to take part in the auction. EDS submitted applications mostly in small and medium-sized markets, avoid-

ing large metropolitan areas. So has Mr Craig McCaw, the founder of McCaw Communications, the leading celiular telephone company which he sold to AT&T. In general. Mr McCaw chose to hid, which he knew he would not be competing with AT&T, but both are listed as applying for the Buffalo

Some 23 hidders submitted incomplete applications and have a week

market.

to amend their filings.

The FCC conducted its first auction of spectrum frequencies in July, raising \$617m in hids for narrow band frequencies for advanced

paging services – although several of the largest bidders later

Another auction for regional advanced paging licences is now in its 25th round of hidding, with high bids totalling \$394m.

The hroadband auction, due to start on December 5, is expected to be much bigger than these and could take more than a month to complete. The FCC's innovative auction rules allow applicants to bid by computer on all the available licences at the same time, so they can change their hidding strategy to target a different region if they see their first choice as too

The 51 regional markets attracted an average of 26.5 applicants each, with 20 companies submitting applications for Los Angeles and 22 for New York. Applicants for the large New York market will have to pay an upfront fee of \$15.8m hy Novemtiny American Samoa market will have to pay only \$28,200.A company bldding for nationwide licences would have to pay \$150m upfront. In the past, the US has granted

vetnam n

frequencies either on the basis of public hearings or by lottery. The auction is expected not only to raise money for the government, but to bring down prices for the consumer by awarding competing licences in

AMERICAN NEWS DIGEST

# Russia cuts off Cuba's oil supplies

Caribhean state has oot met its promised level of sugar exports to Russia, Mr Oleg Davydov, the Russian trade minister, said yesterday. The cut in supplies to a country which once enjoyed the closest links with the former Soviet Union is expected to further damage the recession-hit Cuban economy. The decision is in line with Russia's attitude to other countries which once enjoyed oil imports for barter, or at prices far below the world market level - including former Soviet states

which are oow independent countries. Mr Davydov said Russia had exported 1.5m tonnes of oil to Cuba, but had received only 500,000 tonnes of sugar - 550,000 tonnes short of the amount agreed. He said Russia would sell the remaining 1m tonnes of oil it had agreed to ship to Cuba oo the world market, "adding around \$120m to the national budget". "If after our own augar harvest the need arises to import more sugar cane, theo we are prepared to opeo negotia-tions again with Cuba oo this issue in 1995," Mr Davydov said. He added, however, that the barter of sugar for oil was

unprofitable. An official of the Cuban sugar organisation, Cubazucar, said the deal, agreed last December, was still active – although only partly fulfilled. "It doesn't mean the accord has stopped." However, Cuba would not be able to deliver sugar until December or January, after this year's harvest. Cuba has suffered two consecutive poor harvests - 4.2m tonnes in 1992-93 and around 4m tonnes in 1993-94. The official said he hoped Cuba could match the 4m tonnes figure in the coming harvest, but external forecasts suggest output as low as 3.5m tonnes, the lowest for more than 40 years. John Lloyd. Moscow and Pascal Fletcher, Havana.

#### Latin American outlook better

Latin America's economic outlook appears slightly more favourable than in recent years, according to a report published today by the InterAmerican Development Bank. A promising world outlook, private investment inflows, likely higher prices for raw material exports and the expected ratification of the Uruguay Round world trade agreement all added to the optimism. Crowth for the region this year was expected to be similar to 3.5 per cent in 1993, the third consecutive year of per capita growth.

The report, Economic and Social Progress in Latin America, sald regional economic integration was "creating favourable opportunities for Latin American trade and Investment". Last year it noted capital inflows exceeded outflows by \$69hn. About 76 per cent of inflows into the regioo's non-monetary sector – about \$47bn – were in the form of direct investment and portfolio investment. Stephen Fidler, London

#### US schools grow more violent

American schools are becoming more violent, not only in hig cities but in smaller towns and surburbs, according to a 700-city survey to be published today hy the National League of Cities. Only 11 per cent of the communities surveyed said violence was not a problem. The survey listed 44 per cent of suhurban cities and towns, nearly two-thirds with populations under 50,000. One out of four reported incidents involving serious injuries or deaths in the past year and 40 per cent said gangs were a significant problem.

Among other findings, 70 per cent said police were being assigned to patrol schools and 19 per cent said metal detectors were used to find weapons. Over the past five years, 38 per cent of the cities said the problem has risen noticeably, and 90 per cent of the cities send police to school athletic events. The study quoted Atlanta councilwoman Ms Carolyn Long as say ing "school is getting rougher in a dangerous way. The academic challenges are being made more difficult by the disturbing presence and growing fear of crime and violence in our schools." Reuter, Washington

#### Caymans plea on refugees

The administration of the Cayman Islands is again seeking US assistance in ridding the British colony in the north-western Caribbean of 1,200 Cuban refugees, most of whom have arrived in the islands since August. A delegation from the Cayman Islands has gooe to Washington to ask the US government either to give the refugees visas to enter the US, or to transport them to refugee centres in Panama or at Guantánamo Bay, the US naval base in southern Cuba.

The Caymanian administratioo says it has exhausted this year's budget for taking care of the refugees, most of whom are living in tents. It had earlier said it would repatriate the Cuhans, but few among the 1,174 refugees appear either willing to go home or to be transferred to Panama or to Guantánamo Bay. The US government had earlier rejected Caymanian requests to take the refugees out of the colony, but this week's visit to Washington follows what Caymanian officials said was a recent "promising" reaction from Washington. The colony, which has a population of 30,000, is an offshore financial services centre and a holiday resort. Canute James, Kingston.

#### Peruvian guerrillas surrender

Hundreds of peasants who say they were forced into the service of Peru's leftist rebels sought last-minute pardons hefore the deadline for accepting a government amnesty expired government officials said yesterday. Elsewhere scores of repeotant Maoist Shining Path guerrillas turned themselves in before the deadline expired at midnight on Monday. Reuter,

US President Bill Clinton campaigning in Philadelphia on behalf of Senator Harris Wofford (centre)

# From roguery and villainy to an ideological battleground

two important

tions this year.

While the one

featuring two

November 2 candidates whose recent careers have heen spent in the relative obscurity of local government, has turned into an ideological fireworks display.

The second race pits Mr Parris Glendening, 52-year-old chief executive of Prince George's County in the Washington suhurbs, against Mrs Ellen Sauerhrey, 57, once a hiology teacher and for most of the last 20 years a Republican state legislator. He is a conventional progressive Democrat. she is the new pin-up candi-

date of the Republican right. The contrast with the Senate race could hardly be more marked. In the Democratic corner stands Senator Paul Sarbanes, seeking a fourth term, and in the Republican Mr Bill Brock, once a senator from Tennessee and previously US trade representative and chairman of the national Republican party.

Both are running as the souls of relative moderation, in Mr Brock's case to the point of

Maryland's political history may be littered with rogues and villains – two former gov-ernors, Mr Marvin Mandel, a Democrat, and Mr Spiro Agnew, the Republican who became vice presideot, hoth faced criminal charges - hut it has never been known as a bat-tleground for political ideology. Its first settlers from Britain in the 1630s were Roman Cath-olics sent hy Lord Baltimore to

lot oext week, but in the Septemher Republican primary upset Congresswoman Helen Delich Bentley, oo mean cooservative herself, for the right to oppose Mr Glendening, who enjoyed a much easier passage. She did so primarily on the hack of her proposal to cut state income taxes by 24 per ceot over the next four years and to freeze spending on vir-

tually everything. As the cam-

#### Jurek Martin on two Maryland races, one on unfamiliar ground

escape Puritan repression and it was the first colony to establish in law the principle of religlous tolerance. Today, the mayor of Baltimore, Mr Kurt Schmoke, is hlack, the outgoing Democratic governor, Mr Donald Schaefer, endorsed President George Bush in 1992, and the state has tough laws against guns and protecting the right to abortion.

Its suburbs form part of the Washington metropolitan area and Annapolis, its picturesque capital and home of the US Naval Academy, perches on the Chesapeake Bay, but its heart and soul remains the revived industrial port city of Baltimore. Its ecocomy is diverse and, some pockets of inner-city and rural poverty excepted, prosperous.

Mrs Sauerhrey is in many respects an unlikely candidate half-renouncing a staunchly for Maryland. She was not paign unfolded she also promised to roll back environmental regulations and to divert tax revenues to private schools.

With the appareotly successful tax-cutting example of Governor Christie Whitman of New Jersey fresh in the national mind, she became the instant darling of the conservative movement.

This being 1994, the year of the uncivil elections, Mrs Sauerbrey and Mr Glendening, who has Mrs Kathleen Kennedy Townsend, eldest daughter of Robert F Kennedy, as a running mate, were soon mincing no words, in commercials and in debates. She slammed him as as vet another "tax and spend" Democrat, while he hammered her as outside the Maryland mainstream.

The polling evidence is that Mrs Sauerhrey's assault is not different states the working. A Washingtoo Post hang by a thread.

Glendening a 53-37 per cent lead, with 10 per cent unde-cided. Another Post survey published yesterday found him ahead hy nearly nine-to-one among hlack voters, nearly 25 per cent of the electorate.

This is far in excess of the usual Democratic margin and was attributed to his successful 12-year management of Prince George's County, the most racially diverse in the state. Mrs Sauerhrey held a 46-44 lead amoog whites hut had not shown signs of breaking out of her base in the Baltimore suhurbs and in conservative rural areas.

On the Senate side, Mr Sarbanes held a 57-32 point edge over Mr Brock in a Baltimore Sun poll two weeks ago and is generally reckoned comfortably ahead. A Sarbanes campaign is normally low-keyed but in common with the times he has accused his opponent of being a carpetbagger, of a poor attendance record while in the Senate and of taking oo Japanese companies as clients as soon as he finished his stint as trade representative In the Reagan administration.

Mr Brock, who ran a legendarily dirty campaign in Tennessee to oust Senator Albert Gore, father of the vice president, in 1970, has seemed passive in respoose, excepting conventional attacks on the Sarbanes record as a hig spender. His hopes of being the first senator to represent two different states this century

# Salinas rejects notion of one complex plot

President Carlos Salinas of Mexico delivered his final state-of-the union address yesterday, offering a rohust defenca of hia six years in office one month before he hands over to his successor, Mr Ernesto Zedillo. Mr Salinas sought to answer

critics that his government had put economic reform before political change, arguing that "democracy cannot flourish. . . when financial disorder, deficits and inflation are exacerbated." He asserted that "experience shows that ahrupt political changes promoted from above without the consensus of parties and the support of society merely lead to a break with the old without

consolidating the new."

Nevertheless, Mr Salinas
said significant democratic progress had been made during his administration, and "pluralism is now the norm in our public affairs." The high turnout and generally trouble-free August presidential elections "mark our passage towards a

better democracy. The outgoing president sought to explain the shocks Mexico has suffered this year + namely the peasant revolt in the southern state of Chiapas, the assassinations of presidential candidate Luis Donaldo Colosio, and Mr José Francisco Ruiz Massleu, secretary-general of the ruling party - as

tration's economic and social "I do not resort to the facile

solution of an overriding plot as a general explanation for theae acts of violence... These grave events reflect the action of isolated individuals or groups, but they may also be spurred hy a feel-

ing of rejection for changes that have been made." The president announced that foreign currency reserves were \$17.24bn at the end of October, a fraction more than the level two weeks ago. He said the economy would grow by almost 3 per cent this year, implying growth of about 4 per cent in the second half of the year. He said that for the third year in a row there would be no fiscal deficit.

Mr Salinas accepted soma responsibility for the uprising in Chiapas, referring to "excessive caution" in not taking preventative security measures and failings of local government. He reiterated his call for a peaceful solution.

In a tacit admission of the problems his administration had not tackled, Mr Salinas said Mexico still faced "a major challenge of justice. Our econ-omy is healthier, but must still provide many new jobs. . . our freedoms are greater. . . but many constraints and inequities remain which must be corrected before we can become the democratic, modern nation we aspire to be."

# Canada tightens immigrant curbs

By Bernard Simon in Toronto

Canada plans to dilute its traditional hospitality towards immigrants under a new long-term policy unveiled yesterday.

Besides cutting the 1995 immigration quota by about 12 per cent, Mr Sergio Marchl, immlgratioo minister, announced tighter curbs on family members seeking to join relatives already in Canada.

The government will in future place a greater emphasis on attracting entrepreneurs and other independent immigrants with skills or wealth to cootribute to the ecocomy. The refugee quota will rise

hy as much as three-quarters to 24,000-32,000 a year.

settlers in the family reunification category, especially parents and grandparents, place a relatively heavy burden on health and social services.

Mr Marchi said tha authorities may require bonds to he posted hy immigrants sponsoring their families.

The immigration clampdown coincides with pressure on the government to review Canada's multi-culturalism policy, under which ethnic communities are encouraged often with support from public funds - to retain their distinct

Patrick McCurry in São Paulo explains why Brazil's decision to send in troops may not work

# Troops pack an uncertain punch in Rio

tary to control Rio de Janeiro's largely discredited police forces follows mounting media pressure for action against violence in the city. But there is little expectation that the move will do much to solve the city's problems of violence, corruption and drug trafficking.

Rio state Governor, Mr Nilo Batista, agreed on Monday to allow the military to direct the united operations of the state-controlled military and civil police forces in city. There had been speculation if he refused President ltamar Franco would seek a "state of defence" decree, allowing federal troops to be sent to the city.

Tha move brings unwelcome reminders of Brazil's two decades of military rule, which ended in the mid-1980s, although most ohservera believe that military leaders have not sought a role in compating heavily armed drug traffickers in the city's warren-like hillside shanty towns.

It is hard to know if violence is on the rise because of the lack of reliable statistics, hut media pressure for action has increased following a oumber of violent incidents in the last two

These include a reveoge attack hy 120 police that left 13 shanty town resideots dead, the death of a 15-yearold girl from stray police hullets and the killing of a multinational executive by car thieves.

Another incident that has put pressure oo the government is the wide-

spread fraud uncovered during coo-gressional elections in Rio de Janeiro undeclared civil war."

Drug traffickers and illegal gamhling racketeers - widely believed to have a large portioo of the state-cootrolled police in their pay - are thought to be involved.

According to Mr Paulo Calmoo, a political scientist, action is heiog taken now because the presidential election, held on October 3, is out of

"There seems to he a coosensus that oow is the time for action, so that there is no major crisis awaiting [presideot elect] Fernando Hen-rique Cardoso when he takes office next January." Mr Cardoso has said he supports seeding in troops "if necundeclared civil war."

Some analysts helieve Mr Cardoso's candidate for the second-ballot election of the state governorship, to be held oo November 15, has been benefiting from the cootroversy. "The government could easily wait until after the second ballot. There is no civil war," says Mr Emir Sader, a Rio-based academic specialising in research into violence.

He accepts, nevertheless, that there has been a deterioration in the situatioo in recent mooths. It not clear whether troops will be

sent into the shanty towns, although they would probably be welcomed by many residents there as protectors. There is always the risk they would be corrupted in the same way as their police colleagues if they stayed for a prolonged period.

The problems of crime and violence are widely viewed as the result of Rio de Janeiro's economic decline starting with its replacement in 1960 as capital by the city of Brasilia. The decisioo of former governor Leocel Brizola to restrict police activity in the shanty towns in the 1980s - after complaints from residents about police behaviour allowed drug dealers to grow into a parallel authority.

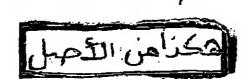

"Nothing has beeo done in the last 15 years to tackle Rio's social and ecocomic problems and now they are trying to correct the situation in a few weeks," says Mr Sader.

## JAL to start Vietnam flights

Japan Airlines (JAL) will start regular flights to Vietnam later this mouth with the launch of services to the country's business capital, Ho Chi Minh City. The Japanese Transport Ministry said yesterday it intended to grant approval this week to the company's plan to operate twice-weekly round-trip flights from Kansai International Airport near Osaka from November In the last year, leading European and Asian airlines, including Lufthansa, Air France and Cathay Pacific, have begun regular services to Vietnam as the country's economy has expanded rapidly in the wake of an accelerating economic reform programme and the lifting of US sanctions. Japanese corporations have been among the most active in pursuing opportunities in the growing Vietnamese market and JAL expects to carry more than 19,000 passengers a year. The airline will use DC-10 aircraft with 216 seats on the new route. Gerard Baker, Tolqio

#### Cambodian killings condemned

Britain yesterday condemned the killing of three western hostages, executed by their Khmer Rouge captors, as a barbaric outrage and said it would press Cambodia to bring those responsible to justice. The British Embassy issued a toughly worded travel advisory requesting that their nationals avoid Cambodia after Mr Hun Sen, Cambodia's second prime minister, confirmed that the hostages' remains had been exhumed near Vine Mountain, about 150km south of Phnom Penh.

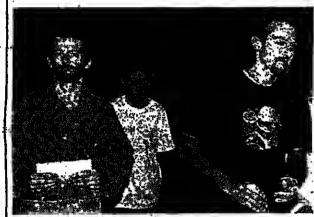

Briton Mark Slater, 28, Jean-Michel Braquet, 27, from France and David Wilson, 29, an Australian, were taken hostage hy the Khmer Rouge on July 26 after a train ambush in southern Kampot province in which 13 people were killed. Along with three ethnic Vietnamese and an unknown number of Cambo-dians, the three foreigners were marched at gunpoint to a Khmer Rouge base near Vine Mountain. Reuter, Phnom Penh

#### India PC industry growth soars

India's personal computer (PC) industry grew at an average of 50 per cent in the first half of the current 1994-95 financial year over the same period of 1993-94, a senior industry official said yesterday. The growth rate ranged between 30 and 70 per cent in various sections. Mr K R Palta, president of the Manufac-turers' Association of Information Technology, told a seminar on the industry.

India's PC industry had a turnover of Rs43bn (£844m) in 1993-94, Mr Palta said. "If we sustain this (50 per cent) growth rate, doubling this figure would not be difficult." The industry was chasing an annual sales target of 1m PCs, he said. "It has to hit the target to survive." Mr Richard Watts, a senior executive of Hewelett-Packard, said. Indian PC-makers must try to tap opportunities emerging from the linkage of digital computing with communication and consumer electronics. Reuter, New Delhi

#### British tourists are set free

Three British tourists - Paul Ridout (left), Christopher Croston and Rhys Partridge - held hostage by Kashmiri militants were freed by Indian police yesterday, less than 24 hours after the authorities discovered they had be policemen and one kidnapper were killed in a 20-minute predawn shootout after Uttar Pradesh state police stormed a militant hideout in Saharanpur, near New Delhi, to rescue the Britons. Police believe three more militants were involved in the kidnapping and have launched a massive hunt to trace them. The three were handed over to the British High Com-mission yesterday. Al Hadeed, a hitherto unknown militant group, had left a note at the BBC office in New Delhi on Monday afternoon, demanding the release of eight Kashmiri militants or threatening to kill the three British hostages. Police said they were able to locate the Britons so swiftly because of a tip-off from Mr Bela Joseph Nuss, an American tourist whom they rescued by coincidence in Ghaziabad on the outskirts of Delhi on Monday. Shiraz Sidhoa, New Delhi

#### US jets bomb Kuwait desert

B-1 and B-52 bombers flying non-stop from bases in the US bombed the Kuwaiti desert yesterday to remind Iraq of the global reach of US military power following a flare-up on the Gulf War border. Two B-1s and two B-52s dropped 110 bombs on the desert floor 13 hours after takeoff from bases at Elsworth, South Dakota and Minot, North Dakota. The B-1 Lancers and B-52 Stratofortresses were part of exercises by 100 British and US warplanes staged over Kuwait and also in part over a western-imposed no-fly zone in southern Iraq. Reuter.

#### Fair trade sought in tea

The Fairtrade Foundation, an organisation supported by leading development agencies and consumer groups, yesterday launched a fair trade label for tea. The foundation said its label would ensure better conditions and social benefits for workers on tea estates in developing countries. The arrival of these teas marks a watershed," said Mr Phil Wells, the foundation's standards manager. "It is the first time that independent inspection of tea estates, on behalf of consumers, has been allowed to take place."

The first teas come from two estates in Sri Lanka and the Nilgiri mountains of southern India. They are produced by Clipper Teas and will be sold by Sainsbury, the biggest UK supermarket group, as well as smaller food shops. Mr Wells said the foundation hoped initially to capture about 3 per cent of the British market - which consumes 70ha cups of tea a year. Alison Mattland, London

#### N Korea 'halts N-plant work'

North Korea said yesterday it had halted construction of two controversial graphite-moderated reactors following a landmark pact with the US in which Pyongyang agreed to freeze and dismantle its nuclear energy programme. The agreement was signed in Geneva last month. "We have already begun taking received in the control of the control taking practical steps to put it (the pact) into effect," a North Korean Foreign Ministry spokesman was quoted as saying by Korean Central News Agency monitored in Tokyo. Under the October 21 accord the US said it would assemble an international consortium to finance the \$40m (22.50m) construction of either one 2,000MW or two 1,000MW light-water reactors that do not produce weapons-grade plutonium. Reuter, Tokyo

#### Angolan oil town captured

Angolan government forces have recaptured an important of town from Unita rebels in heavy fighting, state media reported yesterday less than 24 hours after the two sides initialled a peace accord. Government troops had also been advancing on the Unita stronghold of Huambo, a government official said. Under the accord reached in the Zambian capital, Lusaka, the government and Unita are to declare a ceasefire on November 17. Reuter, Luanda

# Hong Kong stamps on Japan's postal pride

By Emiko Terazono in Tokyo

An increasing number of Japanese subscribers of mail order catalogues from companies in Japan are finding their brochures mailed from Hong Kong. The detour, prompted by Japan's expensive postal rates, means companies save 20 to 30 per cent on postage costs by sending bulk mail to other countries where the items are remailed back to Japan.

Ralph Willis: a willingness by business to invest

delivery, it has suffered losses of Y100bn (£630m) from its postal operations in the past three years, with the figure set to grow following a 24 per cent postal rate rise earlier this уеаг. The remailing business has

country's Posts and Telecom-

munications Ministry, which

bas a monopoly on postal

ballooned, and mail sent from Hong Kong to Japan currently equals five times that sent Such schemes have hit the from Japan to Hong Kong.

Japan costs Y50 (31 pence), while it costs only Y27 (17 pence) to send a postcard from Hong Kong to Japan. Other countries with low postage rates, including Singapore, Denmark and the Netherlands. have also become favourite

remailing centres. "Remailing is fairly widespread with beavy mailers including Japanese companies," says Mr Marc Fuoti, an official at Japan Marketing by returning the letters to the

Mailing a postcard within Data Systems, a marketing sending post office. In the latresearch company. Domestic and foreign newspapers, magazines and direct mailing companies are among the many which use remailing. The posts ministry estimates that more than 1m items were remailed

in the year to March. The posts ministry has tried to clamp down on remailed letters by refusing to deliver them, charging sender companies domestic postage rates, or

est year ministry officials charged domestic postage rates on more than 180,000 cards and letters which had been remailed.

In another attempt to counter remailing, the Universal Postal Union, an international regulatory body of postal trade, stipulated in September that when a country judges a letter or card to have been remailed, it can claim delivery costs from the postal

where the mail was posted. But this week, taking a different tack, Mr Toyotaro Kato, chief of the postal bureau, said the ministry planned to increase the discount rate for bulk mail. Next spring it will ease restrictions which limit the discount on postage to 30 per cent, he said. The postal bureau also plans to reduce costs by cutting personnel and capital spending and hopes to elimi-

#### September current account shortfall of A\$1.8bn exceeds forecast

## Australian trade deficit worsens

By Nikki Tait in Sydney

Australia clocked up a A\$1.809hn (£830m) current account deficit in September. the second successive month in which it has produced worsethan-expected trade data, although the latest figure did represent some improvement on the A\$2.11bn August deficit which so badly unnerved financial markets.

The latest deficit, calculated on a seasonally adjusted basis. compared with market forecasts of around A\$1.7bn. lt means that, over the first quarter of the current 1994-95 financial year, Australia's current account deficit has exports and mineral fuels reached A\$6.96bn, an increase of 35 per cent over the previous

As analysts at Bankers Trust pointed out yesterday, extrapolating this growth for the entire financial year would give a deficit of A\$22.2bn. In its May budget, the government of Prime Minister Paul Keating estimated a current account deficit for 1994-95 of A\$18bn, or 4 per cent of gross domestic product.

On the export front, the unadjusted fignre was unchanged from August at

being offset by higher sales of metal ores and minerals and wool, imports eased back from the abnormally high figure of A\$6.69hn in August, to A\$6.06bn.

The Australian bond and share markets weakened on the balance of payments news - in spite of the distraction of yestarday's Melhourne Cup horse race - with sentiment also discouraged by stronger-than-expected building approv-

als figures. Pessimists believe that if Australia fails to improve its

trade balance soon, it could be beaded for further interest rate rises and a repeat of the "boom and bust" episodes which have plagued it in the past.

Yesterday, however, Mr Ralph Willis, treasurer, said that growth in imports during tbe first quarter overall reflected the economy's move out of recession, and the increasingly willingness hy

husiness to invest. "While imports fell in September, strong import growth in the September quarter is coosistent with ongoing strength in domestic economic activity," he commented.

# Islamists spurn poll offer as Algerian impasse deepens

By Francis Ghilès

The pledge by Algerian President Liamine Zeroual to hold presidential elections before the end of next year was yesterday dismissed as meaningless by Islamic fun-damentalists who pledged that their battle to overthrow the regime would continue.

General Zeroual's statement on Monday night came amid worsening violence and just 48 hours after be had publicly acknowledged that the attempts to conduct a dialogue with the principal opposition group, the outlawed Islamic Salvation Front (FIS), had come to nothing.

The admission that the talks had failed

mount FIS leaders, were freed from prison and put under house arrest in an attempt to improve the atmosphere for negotiations. However, it seems that protagonists on both sides had done all in their power to sabotage any hint of progress.

General Mohammed Lamari, described locally as a hardline "eradicator", was last weekend promoted to the rank of général de corps d'armée. Gen Lamari had warned in the latest issue of the army's monthly magazine that the figbt against the "obscurantist and retrograde forces, traitors to their nation and Islam" would con-

was made only six weeks after Mr Abassi tinue "to the very end, whatever the price Madani and Mr Ali Benhadj, the two para and sacrifices that would have to be paid". Gen Zeroual meanwhile said that the FIS's Mr Madani had refused to endorse a call to end all violence. He also claimed that Mr Benhadi had sent two letters to his supporters since he was put under house arrest, urging them to "intensify their terrorist acts". In response Mr Rabah Khahir, spokesman of the FIS abroad, denounced the "threats and appeals to terror" made by the "criminal General Lamari" and advised the head of state to

> The stage thus appears to be set for a further twist to the spiral of violence accused the Algerian security forces and ing on the principle of free elections, FIS

which, according to western and Algerian observers has, since the elections the now "total disregard of international and banned FIS was expected to win in January 1992, cost an estimated 30,000 lives.

Underscoring the violence, bombs exploded in two of the nation's cemeteries yesterday which on November 1 attract thousands of Algerians who go to bonour those who died in the eight-year-long struggle against the French army. One blast killed five children and wounded 17 people in the western town of Mostaganem, the official news agency APS said. in a report last week, the human rights organisation Amnesty International

humanitarian law." Torture, which had been virtually eradicated between 1989 and 1991, "has become widespread in police, and gendarmerie stations and military and security centres." said the report. Trials had been unfair at every stage of the proceedings and violated the most fundamental requirements of international law.

Many observers have doubted all along that a clear line could be drawn at this stage of the confrontation between "moderates" and "radicals". Even while agreeleaders have always insisted that Islamic law must prevail, something which most Algerians would probably find unaccent-

Algeria increasingly presents to the outside world the tragic face it did in the late 1950s – one of blood, torture and anarchy, which no rational force within the country

seems capable of ending. Neighbouring Morocco and Tunisia are watching the mounting violence with ill. concealed anxiety as are Spain, Italy and France. However, whatever their political persuasion, those outside Algeria appear to have no better idea than Algerians themselves for a solution to the turmoil

# Israel reopens to workers

Israel yesterday distributed the first batch of 8,000 entry permits for Palestinian building labourers from the Gaza Strip and the West Bank. The labourers will cross the old green-line border into Israel today for the first time since the Hamas suicide bombing which killed 22 bus passengers and wounded 47 in Tel Aviv

two weeks ago.

The number of permits will be gradually increased. The first group are married men aged 40 or over. Before the closure about 65,000 workers travelled daily to jobs in Israeli construction, farming and ser-

The reopening eases fears that keeping the workers from their livelihood fuelled support for the Islamic fundamentalists. In Gaza alone, unemployment was running et up to 60 per cent even before the closure. The Palestinian Workers Union estimated that the closure cost West Bank workers \$4m (£2.5m) a day.

At the Brez terminal between Gaza and Israel, the Israelis are investing \$30m in sophisticated computer equipment to combat a racket in forged permits. Once it is installed, every Palestinian worker will be checked on screen against his or her photograph and personal data.

Ministers admitted that none

of the recent attacks inside Israel was committed by per-

Yossi Beilin: closure necessary

mit holders. Mr Yossi Beilin deputy foreign minister, said yesterday the closure had been necessary to restore calm.

The Palestinian flag was raised yesterday alongside the Israeli flag at two border crossings from Egypt and Jordan. From now on entry through Rafah and the Allenby Bridge will be controlled jointly by Israeli and Palestinian pobce.

In a complex arrangement agreed in Cairo six months ago, Israel retains overall responsibility for security at the crossings. Residents of the Gaza and Jericho enclaves. now ruled by Mr Yassir Arafat's Palestinian National Anthority, will be checked only by Palestinians. Residents of the still-occupied West Bank will pass through Palestinian and Israeli counters. Israeli citizens will be checked only by

## Tricky task to lay Mideast bank's foundations By Mark Nicholson

Many Arab and Israeli political and business leaders were hailing the prospective Middle East and North African Development Bank as the most "concrete" achievement of the Casablanca regional economic summit which closed yesterday. But if so, not only is the concrete neither set nor moulded, there will be much tricky negotiating before even the mix is agreed upon.

This, according to yesterday's "Casablanca declaration", will be the task of a "group of experts", so far unchosen, who will "examine different options for funding mechanisms including the creation of a Middle East and

North Africa Development Bank". The experts are expected to meet in Washington before the year's end and make an initial report in six months. It will not be easy. Although the bank has general political support from the US, the EU, Egypt, Jordan, Israel and the stinians, speakers over the past three days in Casablanca have canvassed a wide and sometimes contradictory variety of possible structures, uses, lending criterie and locations for the institution. Its creation is seen by many as addressing political rather than economic needs, and some question the need for it institutions such as the

Kuwait-based Arab Fund for

Economic and Social Develop-

ment and the Islamic Develop-

ment Bank already exist. Mr Omar Mohanna, head of corporate finance at the Cairobased Misr Iran Development Bank, said flatly: "It would take a lot of time and then be a white elephant." He said a more practical option would be that suggested yesterday hy Mr Mahmoud Ahdel Aziz, chairman of National Bank of Egypt, for a wbolly private-sector regional bank, capitalised at \$500m (£316.4m) with joint and equal Arab and Israeli participation.

But to its proponents, such as Mr Micbel Marto, deputy governor of Jordan's central bank, there is a clear need for a government-backed institution. "Every area of the world has a development bank, but

for so long. For major projects there is no institution which can do what a development hank will. And there will be others, not in themselves economically viable, but which must be financed for their external economic effects "

The bank is likely to be capitalised at \$10bn, with 60 per cent held by Organisation for Economic Co-operation and Development countries. There appeara agreement that it should concentrate on financing big regional infrastructural projects. But even among its political backers, almost every other aspect of the hank is likely to attract considerable

debate. Egypt, for instance, is uneasy about attempts to create regional institutions of any

players such as Lebanon and Syria, which have not reached peace with Israel, remain out-side what has now become the

Within the Israeli government there are differences. with Mr Jacoh Frankel, the central bank governor, arguing strongly that potential sharebolders in the bank should concentrate on making direct, immediate investments in the region, rather than engaging in "academic debate" over lts structure.

The Palestinians are also uneasy. They say the bank's apparent role in financing big development projects would be inappropriate to their present small economic enclaves in Gaza and the West Bank. "Will

kind while critical regional a bank like this really attend to our needs? From what we hear from the Americans this bank will not be offering any concessionary finance. But we would like to see some benefit from it," said Mr Nabil Shaath, Palestinian minister for economic planning.

Some Gulf states have been positive - Qatar yesterday pledged its support. Others, in particular Saudi Arabia are reluctant to commit money to the bank. Britain is also understood to be suspicious of creating another regional bank given the unhappy experiences of organisations such as the European Bank for Reconstruction and Development, the Middle East Bank's most oftquoted model, and the African Development Bank.

# Joint venture group aims to be investment catalyst

How to get hard-headed businessmen to find and invest in profitable private sector projects in the Middle East has been one of the greatest challenges at the Casablanca Sum-

One small non-profit organisation is showing the way with big results. The US-backed Builders for Peace seeks to match American with Palestinian companies to invest in private businesses underwritten by the US government in Palestinian controlled

Since it was established by US Vice President Al Gore last year the group, composed of American business leaders of Arab and Jewish ori-

of nine joint venture businesses worth more than \$100m (£63.2m) of capital investment. The projects, in botel construction, housing, food processing, light manufacturing, crude oil processing and bottled water production, are expected to generate \$168m in annual operating revenues and create 5,000 jobs.

Eight more projects are in the design phase following a mission to five US cities by Palestinian businessmen sponsored by Builders for Peace. Mr Mel Levine, a lawyer and former US congressman, said Builders for Peace recognises the importance of private enterprise as the basis of economic growth in the Gaza Strip and West Bank. The group wants to

ment. "We are not interested in politics. We are interested in business opportunities which are designed to make a profit undertaken by people who are determined to take a risk." he said.

**Bmilders for Peece works closely** with two US agencies - the Overseas Private Investment Corporation and the Trade Development Agency. The US government has allocated \$125m over five years to Opic to grant political risk insurance, loan guarantees and small loans to US companies doing business in Palestinian self-rule areas. Five of the nine projects developed by Builders for Peace have received Opic assistance, giving

provide a "jump start" for the economy and belp alleviate unemployand tangible risk reduction". The TDA helps joint ventures with the preparation and evaluation of feasibility studies.

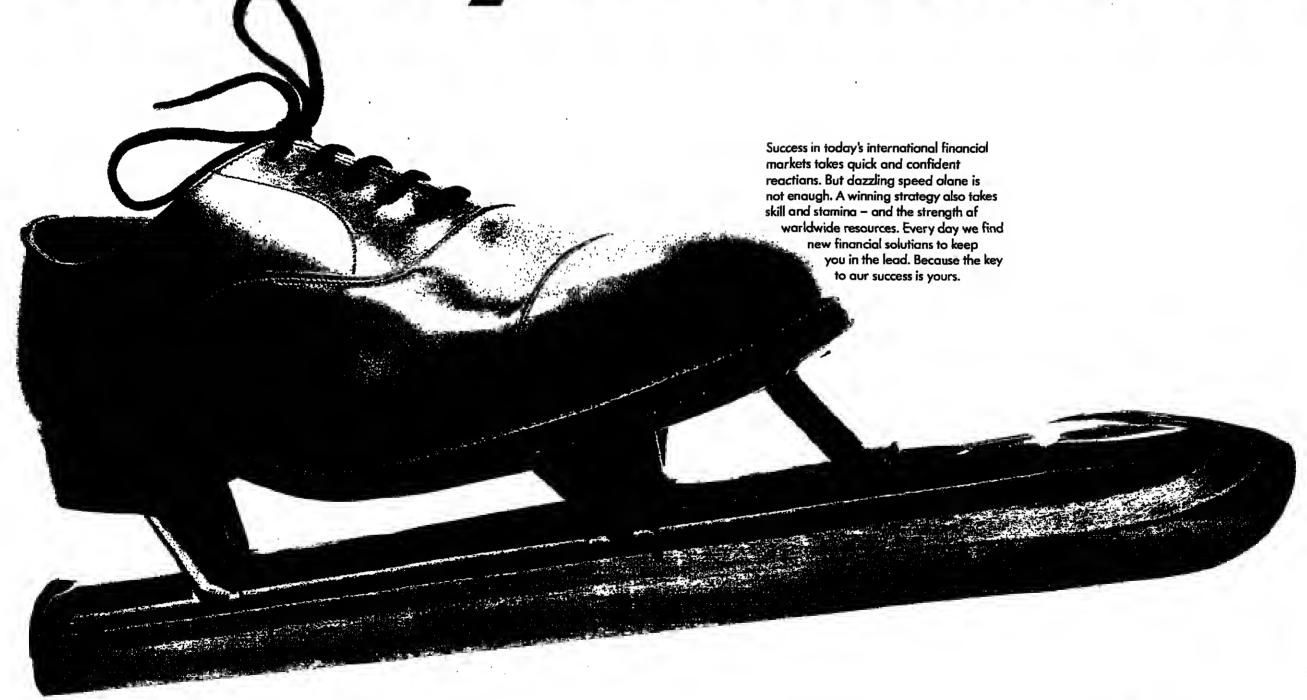

One of the nine projects under way is the construction of Gaza's first fully serviced business botel. The \$70m botel is being build by GRdG, a US company, and will be managed by Marriott which may also take an

equity share to the project. Mr Ried Keram, a director of GRdG, said Builders for Peace had been critical to getting the project off the ground. "They gave us a big boost, helping with access to the US government and to Opic," be said. "This hotel is going to serve as a measuring stick for successful investget involved for the first time in the Palestinian economy."

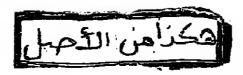

Builders for Peace, backed by official risk insurance from Opic, provides a role model for wider private sector investment in the Middle East and answers a lot of questions raised by businessmen at Casablanca.

Many businessmen have voiced scepticism about the creation of new regional financial Institutions such as a Middle East development bank. Instead the private sector bas demanded financing mechanisms snch as risk insurance, project finance, export credits and the development of better business links between western and Middle Eastern

# **Editor faces** investigation by angry MPs

Mr Peter Preston, editor of The Guardian, faces an investigation by MPs into the newspaper's use of a doctored House of Commons letterhead during its inquiries into the payment of a minister's hotel bill

Miss Betty Boothroyd, the Speaker of the House, yester-day cleared the way for an emergency debate today which is expected to lead to s vote on whether the nswspaper should be the subject of a privileges committee probe.

Her decision came after prime minister's questions, when former Tory ministers led a sustained assault on Mr Preston and the activities of investigative journalists.

Mr John Major, the prime minister, launched mads a stinging attacked on the role of the press in the recent wave of so-called "sleaze" allegations against MPs which have led to two ministerial resignations. "If it is commonly accepted in journalism that the end justifles any means, then I believe journalism will regret stooping to that particular standard.

Meanwhile, Labour MPs on the powerful privileges committee of the House of Commons rejoined the body for a private session to try to break the procedural deadlock over "cash-for-qusstions" inquiry. The seven had boycotted the hearings over the gov-ernment's insistence that they

be held in private. The committee hroke up without resolving whether its inquiry would be conducted

entirely in private. Sir Paul Beresford, the housmg minister who is the latest target of press allegations, strongly denied any wrongdoing over combining government duties with part-time

Yesterday's developments at Westminster came as solicitors

owner of Harrods, wrote to Mrs Barbara Mills, director of public prosecutions, to call for an urgent decision on whether he would face criminal charges for his alleged attempts to 'blackmail" the government.

Mr Major told MPs last week that an unnamed intermediary had made allegations against several ministers and the prime minister and Mr Fayed to discuss the DTI report into his takeover of House of Fraser, Harrods' par-

Today's debate is expected to be on a motion calling for The Guardian's sctions to be investigated by the privileges com-

Announcing the dehate to MPs yesterday, Miss Boothroyd said the "essential" issue to be covered was: "The alleged action of The Guardian newspaper in representing that a etter sent by it to the Ritz hotel in Paris was sent in the name of a memher of this

The newspaper has admitted using a doctored Commons letterhead to seek details of a minister's bill incurred at the hotel, which is owned by Mr

Fayed Miss Boothroyd's decision followed an investigation by Sir Alan Urwick, Serjeant at Arms, ordered by her on Mon-

Mr Major said MPs had a right to expect the highest standards from the press just as it demanded the highest standards from parliament.

"Over many years The present editor has from time to time thundered against general standards in public life," he sald. "That is the right of the press to do that. I simply invite them to observe their own

## Supermarkets push up prices

## Minister defends changes for milk

By Alison Maitland

agriculture minister, yesterday defended deregulation of the milk market as more supermarket groups marked up the price of a pint by at least 2p

Mr Waldegrave said the move to a free market inevita-bly meant "winners and losers", but the new arrangements were already "releasing the creative energies of the industry." He added: "I believe that in a comparatively short time the change which bas taken place will be seen in a more positive light."

The statutory Milk Market-ing Board, sole buyer of milk from farmers for 61 years, was replaced yesterday by a power-ful producers' co-opsrative, Milk Marque, which has won control of two-tbirds of suppiles in England and Wales. Retailsrs yesterday hlamed their higher prices on the

increased cost of milk supplied by Milk Marque to dairy manu-facturers. Sainshury, the biggest supermarket group, joined Tesco in raising milk prices to 28p s pint, and said butter and heese prices would also go up. Safeway put its price up to

Mr William Waldegrave, the tive". Asda, the superstore chain, said its four-pint cartons were rising by 9p, or 2.25p a system had increased prices by 10 per cent.

Mrs Gillian Shephard, forme agriculture minister, sald when she approved the new arrangements in June that consumers should not expect to pay more for milk.

The agriculture ministry now says the increased prices charged to dairy companies by Milk Marque should add no more than 0.5p to a pint. But Mr Waldegrave denied yesterday there had been a shift in benefits of deregulation.

"it's never comfortable in the short term as you move into a new era of competition," be said. "But I'm a firm believer that competition is the best way in the long term of benefiting consumer interests.

His comments failed to placate the newly named Dairy Industry Federation, which represents milk processors.

## Lottery adverts anger charities

Marketing Correspondent:

Charity fundraisers yesterday lodged a complaint with the Advertising Standards Authority, the advertising watchdog, ahout advertisements promoting the National Lottery in last Sunday's newspapers. The advertisements, headlined "Every time you play the National Lottery, someone else gets a better chance", also said:
"For every pound that you spend playing the National Lottery, at least a quarter will go to hundreds of worthy causes throughout the UK." The Institute of Charity

Fundraising Managers, the fundraisers' professional body, said it was concerned that the advertisements might encourage people to stop donating to charities and switch to buying lottery tickets. These go on sale later this month. Mr Stephen Lee,

institute director, said charity fundraisers had long supported the lottery, but this support "has always been based on the principle that income from the National Lottery will be truly additional to existing levels of support to our sector".

Research commissioned hy the National Councit for Voluntary Organisations has estimated that the lottery could result in an annual los of charitable income of between £190m and £270m, said Mr Lee.

He added: "We were led to believe that the lottery will be promoted primarily as a fun activity, not as a means of supporting charities and voluntary organisations." Nowhere In this initial advertisement can I see any reference to lottery games, the level of prizes, or the chance of winning a prize connected with the Lottery.

Lottery tickets are due to go on sale later this month.

# Hard battle to privatise the Post Office

Andrew Adonis on obstacles which may prevent Britain from emulating the Netherlands

The postal industry is one of the few in which mainland Europe has a privatisation lead on the UK. Whereas the Netherlands privatised its Post Office earlier this year, and Germany is committed to following suit, the UK government continues to dither about transferring the Royal Mail to

mercial television channel, Alice Rawsthorn writes.
The Independent Television Commission, the body that regulates commercial television yesterday advertised the 10-year licence for Channel 5. It is scheduled to come on stream by early 1997 and will reach up to 70 per cent of the UK.

Mr Robert Devereux, chairman of Virgin Communica-tions, confirmed that his company was likely to mount a hld, as to whether to do so. Virgin could face flerce competition from other bidders. Mr

Ward Thomas, chairman of Yorkshire-Tyne Tees Televi-

the public sector for a minimum of two parlia-

the private sector.

Mr Michael Heseltine, trade and industry secretary, has still to convince his cabinet colleagues that he can carry Tory MPs in support of privati-sation. If he falls, a year of preparatory work may have been in vain.
If the status quo continues it

will be partly as a result of the fears raised by opponents of privatisation. But it will also be a consequence of the government'e failure to give serious consideration to the "middls way"

option of granting the Post Office full commercial freedom in the public sector. The government is looking at such an option, hut has spent tha past four months deriding it as impractical.

The government tried to meet many of the concerns raised by opponents of privati-sation in its consultation paper

published in July. A Labour party leaflet delivered across north London at the weekend says that the govMr Michael Hesettine, trade and industry secretary, last night tabled a complicated new plan for partial privatisation of the Post Office. our Political Editor writes. His last-ditch attempt to rescue the government's privatisation would involve a 40 per cent sell-off of the Royal Mail division and the transfer of a further 20 per cent of the shares to an independent

ments and would include a "golden share",

guaranteeing the government the final say in controversial strategic decisions. The indepenowners of rural post offices.

dent trust would comprise representatives of employees at all levels of the Royal Mail and, crucially, would include members of the Feder-ation of Sub-Postmasters, which represents the

With ministers preparing for a critical meeting later today on whether to scrap the sell-off, Mr Heseltine told Conservative opponents of privatisation that the new scheme would guarantee the future of rural post offices.

**Post Office milestones** 1969: Post Office is changed from a government department to a public corporation

1976: Post Office moves into profit (and has been continuously so 1981: Postal services and telecommunications functions are split

into separate enterprises 1984: British Telecommunications is privatised

1990: National Girobank sold 1992: Government review of the Post Office set up

1994 July: Government consultatation paper recommends

local post offices facing cto-sure, an increase in the price of stamps and cuts in postal

in fact, under government plans the Post Office's Counters division - which is responsible for high street and village post offices – will remain in the public sector. As for the

erament's plans "will lead to price of stamps, the latest increase - 1p on first and second-class letters almost a year ago - followed a sharp se in the Treasury's levy on the nationalised industry's profits.

Last year tha Post Office had to pay the Treasury £182m. This year it will be £226m, a

Office's post-tax profit for 1993-94 and nearly twice as much as a reasonable dividend payment if the industry were

in the private sector. The government is also proposing to establish a postal regulator to ensure that price increases are justified by costs. Oftel, the regulator of the privatised telecoms industry, is imposing sharp price cuts on British Telecommunications – whose charges are substantially less, in real terms, than they were at the time of privatisation a decade ago. BT used

to be part of the Post Office. The government could offer further assurances about prices and service levels after privatisation. But as one Conservativs MP puts it: "Such adjustments don't really mat-The fears our opponents are deploying so successfully would not be reduced." He added: "The experience of

water privatisation, which remains bitterly unpopular and probably should not have gone

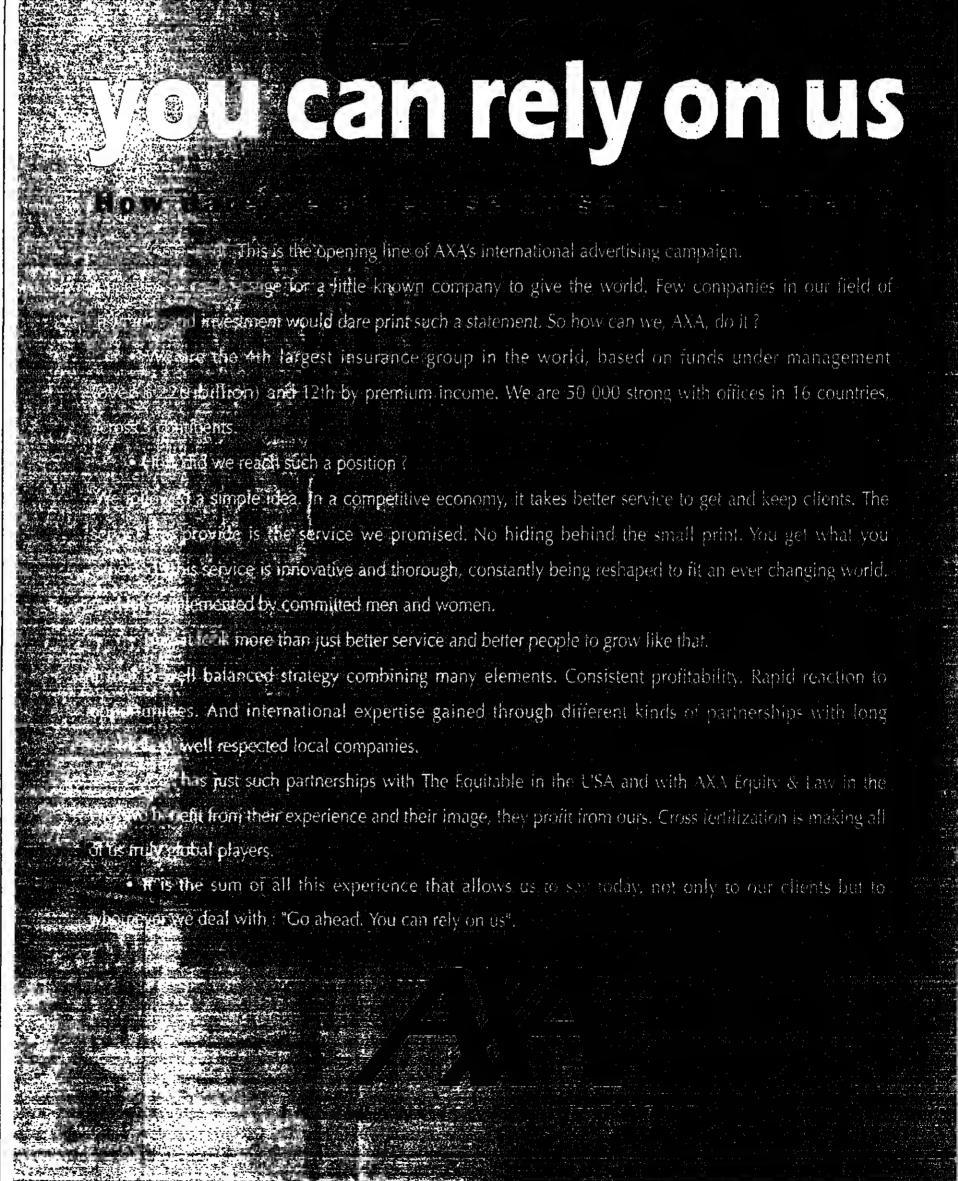

ahead, has not helped." The government could still, however, call the Labour party's bluff and propose to give the Post Office full commercial freedom in the public sector.

Mr Bill Robinson, a former adviser to Mr Norman Lamont when chancellor of the exchequer, has set out such a course in a paper for the consultancy London Economics. He says that privatisation of the Post Office will not necessarily make it more efficient.

Having examined previous privatisations, London Eco-nomics concludes: "Privatisation itself is not a fundamental driver of efficiency improve-ment. Competition, effective regulation and a determination to restructure the business when necessary matter more."

The Treasury has until now been resolutely opposed to granting the Post Office full commercial freedom in the public sector - however catsgoric the statutory safe-

However, Mr Robinson cited the cases of New Zealand and Sweden, where state-owned postal services have been granted full commercial free-

# Bank acquires home loans group for £56m

Abbey National, the banking group, has bought Household Mortgage Corporation, the UK's largest centralised mort-gage lender, in an agreed cash offer of £56.3m (\$89m).

The move gives Abbey a new method of distributing mortgages to set alongside the sales it makes through its branch network while its credit rating should give HMC access to

funds more cheaply.

HMC has outstanding mortgages of about £1.6bn, which gives it at around 0.4 per cent of the total outstanding UK mortgage market. This puts the deal on a par

with the acquisition by Halifax Building Society, the UK's largest mortgage lender, of the UK residential mortgage business of Banque Nationale de Paris, which has outstanding mort-

gages of £1.5bn.
Like other centralised lenders, HMC has no branches, and business is passed to it through independent professional advisers such as lawyers and accountants. It has 28,000 customers and has developed some complex and sophisti-cated home loans.

It will continue to operate in this way as part of the Abbey National group, and will maintain a separate brand name as

a continuing business. This makes yesterday's agreement different from other recent deals in which mainstream mortgage lenders have bought loan books from lenders who entered the UK housing market in the 1980s and no longer see it as central to their

Abbey's purchase in February of the £900m mortgage book of Canadian Imperial Bank of Commerce is among the most conspicuous recent examples of that trend.

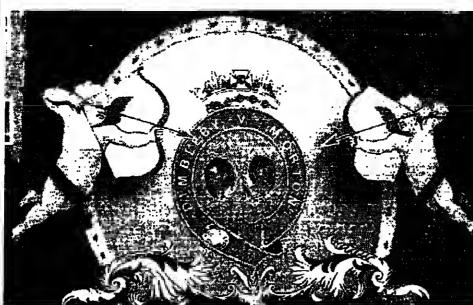

HMC announced in July that it was seeking a sale, and a number of mortgage lenders. including some large building societies, expressed an interest. Mr Maxwell Packe, HMC

managing director, insisted that Abbey's bid was "the best offer, taking all factors into account". All the sbarebolders bad approved its acceptance. he said. HMC made profits of £4m in the four months to July, but like other centralised lenders has suffered in the UK bousing recession. Last year it reported a profit of £700,000. Holders of HMC's 3.1m for-

mer preference shares will receive 535p in cash for each share - more than the 398p price for each of tha 10.8m ordipary shares to reflect the value of preference dividends which were not paid.

 Ministerial decisions about changing the rules governing the way huilding societies operate are likely to be delayed beyond the original deadline for the far-reaching govern-ment review. That may mean the changes will not become law before the next general election to the House of Com-

mons in 1996 or 1997. The two-stage review of societies' powers and duties was launched in January

Prince Charles and Princess Diana face in opposite directions in a London shopwindow display. Jonathan Dimbleby and Andrew Morton, whose names appear next to the royal couple, are authors of rival books about them. Dimbleby'a "anthorised biography" of Prince Charles, in which be admits adultery with the wife of a senior army officer, was published in the UK yesterday. "Her New Life", Morton's second book about Princess Diana will appear later this month

## Ford to halt output from Escort factory for 12 days

Production at Ford's Escort car and van plant at Halewood in north-west England is being halted for 12 days this month to cut stocks, taking more than 9,500 vehicles out of production. There are 500 workers at the factory.

The cuts mean that, by the end of this month, Ford will have taken 20,000 Escorts out of production since short-time working began last month. Employees will be paid their basic wage on the "down days" but will lose bonus and overtime payments.

Ford blames a weaker-thanexpected UK market for the cuts, although none of its main

Workers at Yarrow Shipbuilders in soutbern Scotland, an offshoot of GEC, the UK defence and electronics com-pany, have voted for industrial action after rejecting a pay offer worth 2 per cent linked to the introduction of performance-related pay. All trade unions at Yarrow, the UK's largest warship yard, will meet tomorrow.

rivals is taking similar action. Halewood-built Escort cars are sold only in the UK, although some Escort van output is

Ford's Dagenham plant in east London, which makes Fiesta cars and vans, will work

# Investigator into Heathrow tunnel will report soon

Preliminary findings of an inquiry into the collapse of a tunnel under construction at London's Heathrow airport are expected early next week, our Construction Correspondent writes, The early next ween, our constitution correspondent writes. The result could have financial implications for other large transport projects using the New Austrian Tunnelling Method involved in the collapse at one of two stations being built for a new railway from central London to the airport.

Construction has also stopped at two stations on the Underground system in central London where the Austrian method was being used. Meanwhile the existing Underground station at the airport's Terminal 4 is likely to remain closed for 10 days for safety checks. The technique allows tunnels to be excavated by conventional diggers, rather than by expensive tunnel boring machines.

Two inquiries have been launched into the tunnel collapse The first, led by Mr David Williams, BAA technical director, is due to announce its preliminary finding next week. A second inquiry by the government's Health and Safety Commission will also investigate "broader implications for the use" of the Austrian method.

The commission is expected to examine whether the tech nique, developed for rocky ground, is suitable for soft London clay where it is being used for the first time on a large scale. Questions were raised previously about the suitability of the Austrian method for different ground conditions following the collapse of a tunnal in Munich in September.

#### Cardinal pleads for poor

Cardinal Thomas Winning has portrayed successive governments as "robbing the poor to help the rich". The former archbishop of Glasgow in Scotland was one of 30 cardinals created by the Pope at the weekend and only the third Scotlish cardinal in 400 years. He wrote in the Daily Mirror that "part of the blame for the plight of the dispossessed has to lie

He found it hard to defend the support of UK governments for flat-rate taxes and described as "the biggest political mis-take ever" the poll tax introduced by the Thatcher government in the 1980s and abolished after a tide of protest in 1990. Cardinal Winning, who is 69, said the pressures encouraging selfishness were stronger than ever. "Money can make people like animals," he wrote. "When they get the taste for it, it is hard to get rid of it."

#### Sports car output to double

TVR, an independent maker of sports cars, is doubling the size of its manufacturing plant in Blackpool, north-west England, and starting its first night shift in order to build a third range of cars and expand production. The company said it had taken orders worth £10m for the Cerbera, a new 2+2 coupe model exhibited at last week's UK motor show which will enter commercial production before the end of the year.

The £33,000 car will be the first to use an engine of TVR's own design and manufacture, a 350 horsepower V8. TVR said the Cerbera would help lift the company's output to more than 1,000 cars this year for the first time in its 40-year history. The company said: "The £10m covers the supply of 276 cars and means that production next year could well rise to 1,350-1,400." TVR produced 827 cars last year, and just over 500 in the first seven months of this year.

#### Police start cut-price patrols ···

Police in the city of York yesterday stopped making routine patrols by car because of a shortage of funds for fuel. Officers now patrol on foot or on bicycles and use cars only for emergency calls and special investigations. The shortfall has been caused by a big increase in police pensions, which are financed from the same budget as fuel.

#### Last hangman dies

Mr Syd Dernley, the last surviving hangman in Britain, died yesterday at the age of 73 - 41 years after his five-year career ended. His widow recalled yesterday at their home in Mans-field, central England, that his proudest boast was that he was the fastest executioner in the profession. He helped end the lives of 25 criminals. "He was a craftsman, like a carpenter, if you like," his widow said. "He took a pride in his job, but he wasn't a callous man. Nobody suffered; he was very quick."

## Connection blown up by IRA will cost £1m to restore

## Ireland power link to reopen

By John Murray Brown In Dublin

Officials from Northern Ireland

Electricity, the privatised power ntility, are assessing what needs to be done to restore the power link with the The interconnector between

the two parts of the island was blown up by the Irish Republi-can Army several times in the 1970s. The power link has become a symbol of the drive towards cross-border co-operation in the wake of the IRA and loyalist ceasefires.

Northern Ireland Electricity bas been in "active discus-

All-island co-operation in areas such as energy, telecommunications and tourism are likely to increase if there is a lasting political settlement. In the past week, the Northern Ireland board and the republic's supply board have commissioned two cross-border emergency connections in the north-west of the Nortbern Ireland, traditionally an "ener-

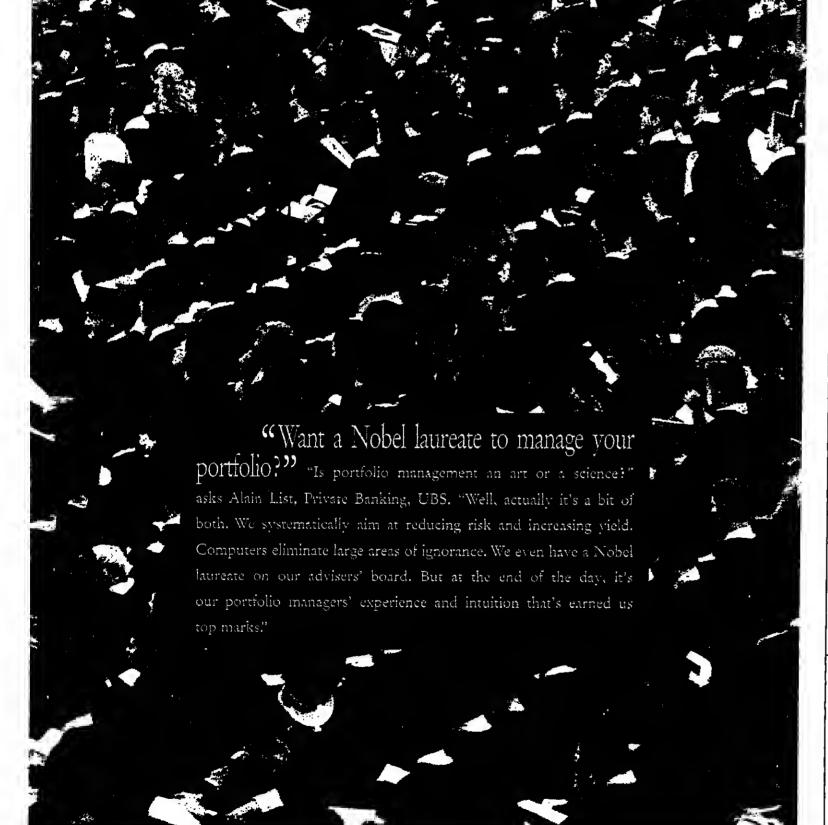

gy-poor" area. That project attracted support under the European Com-mission's "Valoren" scheme, and the north-south intercon-

sions" with the republic's Electricity Snpply Board about port. NIE, Northern Ireland's day that the interconnector with the republic could be working again in five months. Substations will have to be reequipped to account for the disparity in voltages used in Northern Ireland and the republic. The total cost of restoring the interconnector is

estimated at £1m. NIE has 4 power stations with installed capacity of 2,300MW, which is 40 per cent higher than peak needs. The interconnector will enable NIE to meet the republic's projected increased demand.

reopen

It described the eye-catching if ambitious proposal for Citizens' Service, a potentially "big" political idea for tackling unemployment through the mobilisation of young people in nationwide community

Crowther-Hunt'a interest stems from the fact that the Prince's Trust Volunteers, a royal charity backed by 100 large UK employers of which she is full-time director, already adopts a strikingly similar approach. Indeed, she and her patron will no doubt have been pleased that in several places the Commission cites the PTV as a possible model for its own scheme.

Labour's implicit endorsement of PTV – party leader Tony Blair gave Citizens' Service a warm welcoma even though it is not official party policy - comes with the Prince's charity poised for a anhstantial expansion over the next few

> Current capacity is likely to be doubled to about 4,000 places per amum by next March, but prime minister John Major has pledged

ne passage in last week's the government a support to 400-page report of the achieve a target of 25,000 volunteers a year by the end of the century -"a figure which would certainly make a difference," suggests PTV chairman Mike Woodhouse of Bowater.

Under the Volunteers programme, a mixture of young people in jobs and the young unemployed join 15-strong teams, which undertake an intensive 60-day programme (normally full-time, although it can be spread over 6 months). Of the 60 days, 20 are spent on classic "team building" activities and 40 on community projects and placements (for example, working with the old and disabled, in schools, hospitals or on environmental projects).

Government and royal patronage aside, PTV's growth plans will depend on the organisation's ability to persuade large employers that the scheme is a valuable and coat-effective staff training resource, and that they should therefore release more of their young employees to participate in programmes.

The magic ingredient, according to enthusiasts, comes from the mix of employed and jobless. "Like most companies we are trying to break down hierarchies and introduce team working," says Mike Riley,

Prince's Trust Volunteers: poised for substantial expansion over the next few years

chief executive of LLanelli Radiators in Wales, part of the Japanese Calsonic Corporation. "We find that sending people on PTV programmes offers young graduates or those who have come to us from less academic backgrounds the chance to work with others, often under pressure, and to develop their leadership skills. I'm a hig supporter."

KPMG, J. Sainsbury, Marks and Spencer and National Westminster Bank – and the Benefits Agency, Royal Mail and the Inland Revenue in the public sector - are among organisations that support Volunteering. Employers pay £1,200 per place as well as their secondees' wages: the unemployed continue to receive social security benefit.

PTV claims that the results since it started in 1990 have been positive for everyone. It quotes a recent survey in which 70 per cent of employ-ers saw a significant change in their participants in at least one skill area; 50 per cent in two or more areas, and almost 30 per cent in three or more areas. Improvements in team working, communication and problem-solving were also noted

Routioe surveys of unemployed Volunteers taken three months after programmes had ended show that 70 per cent have either found a joh or are in further education or training, while around half continue to volunteer in a significant way after leaving the course.

# For aspiring board directors

P setf Fancy a seat on the board of a company chaired by ICI's fictitious, the board posts are on offer for just the two days of a where Andrew Teare of English China Clays is chief executive? Just such an opportunity was made available this week by

headhunters Spencer Stuart, the Wharton Business School of Pennsylvania and the international accounting and consulting firm

Before would-be directors rush to sign up, though, they should bear in mind that the company in

training programme next March, and they come with a price tag of £4,000 plus VAT.

Known as the Director's Institute in the US where it was launched last year this so-called Directors' Forum has been devised by the three joint venture partners to fill what they perceive to be a gap in the UK market for directors' training. The programme - aimed at execs and non-execs alike - is

essentially a board simulation exercise based on the imaginary but true-to-life MegaMicro during which participants address issues facing the company in the course of audit and remuneration committee meetings and a full board meeting.

Strategy, succession, remuneration, product liability. and new financial instruments are among corporate governance subjects that will be raised.

An important feature is the panel of advisers - an impressive list of the great and the good who have

indicated their willingness to offer advice, lead the discussion, or even play a role in MegaMicro (bence the close involvement of Henderson and Teare in the first programme). Panel participation is one way the Forum hopes to distinguish itself from rival programmes such as that run by the Institute of

# Talent defects to the private sector

David Goodhart continues a series with a look at the task of overseeing a group of job centres

Margaret Walker runs 12 job centres in south-east London, serving areas with some of the highest and most o o o intractable unem-Public services ployment in Britain. As a dis-

management trict manager for the Employment Service, she is responsible for about 600 job centre staff and an annual budget of £13.1m, £9m of which is spent on manpower. Those 600 are in turn in charge of paying out benefit to more than 50,000 people, policing the rules which claimants must abide by, and trying to return them to the labour market as quickly as possible.

Bustling between her different joh centres. Walker, 34, seems the very picture of the efficient, comionate, public-sector mana She has certainly got results. Her district of the Employment Service (the government agency which runs the job centres) was last month awarded one of the government's Chartermark awards for good service.

She has also benefited, winning significant performance honuses. But such bonuses have only raised her salary to a little over £30,000 per year, not a large amount hy private-sector standards for someone with her responsibilities.

And not enough to keep Walker in the public sector. Later thia month she takes up a post with the recruitment company NB Selection. "Private-sector experience will be useful. I envisage returning eventually to the public sector, perhaps to run a big hospital."

But Walker clearly feels there is a glass ceiling preventing people like her rising much further in the civil service. She believes this is more to do with her personality tban her sex.

She certainly displays an un-civil service directness about the frus-trations of the job, "There are still irritations like the annuality rules on money, which force you to hand back part of anything you save at the eod of a year," she says. Walker also believes promotion opportunities are shrinking as lay-

ers of management are cut out.

Margaret Walker: promising young manager lured else

"When you have a large number of people who entered the department in the 1970s, flat management makes it difficult for the people that came in later," she adds.

The exit of a promising young manager such as Walker illustrates the problem faced by organisations - especially in the public sector - moving from a "promotion culture" to a performance pay culture.

"In theory the point of such a shift is to make it more attractive to people like Margaret to stay doing something they are good at, such as running joh centres, rather than moving them on to things they may be less good at," says Jeremy Cowper, head of corporate development at the Employment Service. In practice it may be causing promising young managers to

Another problem for the public sector is gaining the right balance between local managerial discretion and national rules. An organisation which hands out hillions of pounds of public money cannot afford to give local managers too much discretion, but with no discretion at all it becomes impossible to attract talent.

Walker has had some freedom she has, for example, introduced a non-statutory childcare system for single mothers - but most of her joh has been ahout applying national rules.

"We are trying to combine humanity with the spirit of the law," she says.

Walker was recruited from the ranks of the unemployed. After going from a Midlands grammar school to Oxford she failed her bar finals and found herself jobless for a year in 1982. "Having experienced the system

with all its petty humiliations I know how harrowing it can be," she says. But she insists things have improved since then. There is better integration of joh search and benefit receipt under one roof, and a new language of clients rather than claimants.

Given a free hand to make one change to the system Walker says she would introduce a third category between formal employment and claimant status.

"I come across a lot of peopl who are hasically unemployable but who still have quite a lot to offer, we need some mechanism for allowing them to receive benefit unconditionally while doing various kinds of unpaid work."

It is not an idea which will find favour with a government trying to toughen the conditions for receiving benefit. But the governmeot is about to become her exemployer, so Walker does not care.

## **PEOPLE**

## Neil Davidson to make his mark in milk

Neil Davidson, a director of eration, formerly known as the Northern Foods, one of the Dairy Trade Federation, loses Under its retiring president, its statutory right to negotiate Jim McMichael-Phillips, the ers, was yesterday elected president of the Dairy Industry Federation, the new body representing milk processing com-

His election coincided with the deregulation of the milk market, under which the statutory Milk Marketing Board was abolished and Milk Marque, a voluntary farmers' co-operative, launched as its successor.

Davidson, 43, is responsible for all Northern Foods' milk activities, representing 50 per cent of turnover. He joined the group in 1977 and for the past two years has been responsible for milk buying. Under deregulation, the feddairy trade. As an industry lohby, however, it will now grant automatic seats on its council to all major dairy com-Davidson signalled that he wanted a more constructive relationship with other parts of the industry following the acrimony that has marked the past

milk prices on behalf of the

"My aim is to lead an organisation which represents the interest of both large and small huvers of milk is clearly focused on what it is trying to achieve, and is positive and constructive in its outlook," he

18 months of preparation for

federation was accused by the House of Commons agriculture committee earlier this year of "intransigence" in its opposition to the new arrangements.

Davidson says he looks forward to a healthy dialogue with William Waldegrave, the agriculture minister, and farmers' leaders. But he noticeably did not refer to Milk Marque. with which the dairy trade is engaged in a fierce row over

He also maintained the dairy trada'a assault on the new system, saying it had "distorted the market and led to artificial raw milk price increases".

Sir Brian Shaw - Knight of the Road. Sir Brian (above), chairman of the Port of London Authority, is to be the next chairman of The Automobile Association, which repremotorists and solved 4.5m breakdowns last year.

Sir Brian, 61, will take over as chairman at the end of next year when the current incumbent, Sir Ralph Carr-Ellison, turns 70. Sir Ralph, a landnwner in the north east who has been chairman since 1986, has presided over a period of rapid change. The AA's membership has increased from 8m to 8m and the voluntary organisation has invested heavily in information technology to handla over 6.5m calls a year from motorists.

Sir Brian, a former chairman of the Furness Withy shipping group, will inherit a major private business. Last sents one in three of all UK year the AA reported pre-tax retirement next April.

profits of £39.7m on income of ■ Roger Letby has been £576m and net assets of £178m. Although half the AA's income still comes from subscriptions, 28 per cent comes from insurance and financial services and provides the bulk of the organisation's profits. Other AA ventures include Britain'a second biggest driving school and the introduction of an emergency service for homeowners (AA Home-

IN THE HIGH COURT OF JUSTICE (IN ENGLAND) CHANCERY DIVISION

No. 006010 of 1994

#### IN THE MATTER OF ENGLISH & AMERICAN INSURANCE COMPANY LIMITED!

#### IN THE MATTER OF THE COMPANIES ACT 1985

NOTICE IS HEREBY GIVEN that, by an order dated 23 September 1994 made in the High Court of Justice in the matter of English & American Insurance Company Limited ("the Company"), separate meetings were ordered to be summoned of Scheme Creditors (as defined in the scheme of arrangement hereinafter mentioned) of the Company for the purpose of considering and, if thought fit, agreeing to a scheme of arrangement proposed to be made between the Company and its Scheme Creditors pursuant to section 425 of the Companies Act 1985 ("the Scheme"), namely:

i. Scheme Creditors who are Protected Policybolders (as defined in the Scheme).

ii. Scheme Creditors who are 3 July 1980 - 6 October 1983 ILU Policyholders (as defined in the Scheme); and

iii. General Scheme Creditors (being Scheme Creditors other than Protected Policyholders and 3 July 1980 - 6 October 1983 (LU Policyholders)(as defined in the Scheme). The meetings will be held on 15 December 1994 at the King George III Room, The Brewery, Chiswell Street, London EC1Y

4SD. United Kingdom at the times mentioned below, namely: i. In the case of Scheme Creditors who are Protected Policyholders, at 11.00 am3;

ii. in the case of Scheme Creditors who are 3 July 1980 - 6 October 1983 ILU Policyholders, at 11.10 am2; and

iii. in the case of General Scheme Creditors, at 11.20 am3.

The chairman of the meetings will address Scheme Creditors generally on the Scheme and on issues relevant to voting at the commencement of the first meeting. Scheme Creditors may attend and vote at such of the meetings for which they are eligible either in person or by proxy and

are, in any event, requested to complete the appropriate form of proxy and return it to the Provisional Liquidators of the Company at English & American House, Bruton Way, Gloucester GL1 1DA, United Kingdom by 11.00 am on 15 December 1994, although if no so returned, it may be handed in between 9.30 am and 11.00 am on the day of the meetings at the place

Each Scheme Creditor or his proxy will be required to register his attendance at such meetings as he is entitled to attend prior to its commencement. Registration will commence at 10.00 am.

The Scheme is proposed between the Company and its Scheme Creditors. (being creditors in respect of any claim arising out of a liability to which the Company is subject at the date of the Scheme, or to which it may become subject thereafter by reason of an obligation incurred before that date, except any claim which would have been preferential in a liquidation of the Company or a claim in respect of the costs or expenses of the Scheme both of which will be payable in full) save that, in the event that Protected Policyholders and/or 3 July 1980 - 6 October 1983 ILU Policyholders, at the relevant meeting convened for the purpose (or at any adjournment thereof) fail to approve the Scheme by the majorities required under section 425 of the Companies Act 1985, the expressioo "Scheme Creditors" shall thereafter he construed so as to exclude Protected Policyholders and/or 3 July 1980 - 6 October 1983 ILU Policyholders (as appropriate).

Any creditor of the Company who is or believes that he may be entitled to attend at any of the meetings may obtain a copy of the document containing the Scheme and the explanatory statement pursuant to section 426 of the Companies Act 1985 and forms of proxy for use at the meetings from the Provisional Liquidators of the Company at KPMG Peat Marwick, 20 Farringdon Street, London EC4A 4PP, United Kingdom or at the office of their solicitors mentioned below at their given

By the order, the High Court of Justice has appointed Anthony James McMahon or, failing him, Roger Smith to act as chairman of the meetings and has directed the chairman to report the results of the meetings to the court.

DATED 28 October 1994

Clifford Chance 200 Aldersgate Street

3 On a cosmittee stirm as the previous meeting shall have concluded at been adjourned.

## Expanded role for Sach at RBS

Derek Sach, 46, who joined The Royal Bank of Scotland two years ago from the 3i Group, has underlined his steady rise up the Scottish bank's management team by being appointed to the newly created post of director of group risk.

Although not a main board director, Sach takes over many of the responsibilities of John Barclay, RBS's deputy chief executive who retired last summer. Sach will be responsible for the co-ordination of the management and control of risk throughout the Royal Bank Group. He will report to Bob Spiers, 58, a former finance director of Britoil, who took over as Royal Bank's finance director in July 1993. Spiers is expected to retire

gests that Sach may be being groomed to replace him on the Royal Bank board eventually. Sach, who used to run 3i's UK business, set up the Royal Bank's specialised lending services. The division, which has a staff of 300 and teams in when he turns 60, which sug- Edinburgh, Manchester and

London, has pioneered a number of techniques to rescue and assist customers in difficulty. One indication of the success of Sach'a approach to a problem which dogs every bank is that the number of receivers appointed by the Royal Bank has fallen from 420 in 1992 to 150 last year and he expects this year's figure to be around

While Sach admits that the decline in the number of receivers is partly to do with the recovery in the economy, he also believes that it has something to do with the Royal Bank's "completely new approach to customers with problems". Sach will continue to be responsible for the specialised lending services division

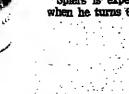

■ Jouni Kokko, international economist at SG Warburg, is leaving in mid-November to return to his native Finland to be head of market advisory at Enskilda Corporate, the investment banking arm of the Swedish bank SE BANKEN in Helsinki. ■ John Thomson, formerly

The plant is an experiment by several leading European petrochemical companies to address one of the most difficult issues facing their business: plastic recycling.

With public and legal pressure building up to re-use more of the plastic that seems to go needlessly to waste, the industry is anxious to be seen to be seeking solutions. But it is not an easy task because, as Michael Buzzacott, chief executive of BP's polymers and olefins division, says: "Plastic recyci-ing is fundamentally uneco-

Waste plastic can be used in several ways. It can be burnt as a fuel for power generation, it can be melted down to make new plastic products (a process known as mechanical recycling), or it can be taken a stage further and reduced to petro-chemical feedstock - the raw material for plastic-making. But most of it currently ends up being incinerated or buried

According to APME, the

Place for plastics

A European consortium

hopes to overcome the

high costs of recycling,

writes David Lascelles

tics makers, only a quarter of plastic is recoverable because the rest is too dirty, too small or, like plastic film, too filmsy to be handled.

Even this figure creates a false impression because twothirds of recovered plastics are burnt for power generation - a fate widely considered to be unacceptable - and only one third (or 7 per cent of total plastic) is recycled into new products. In the UK, the figure even lower: 5 per cent, according to a new survey by Mintel, the market research

Part of the problem is techni-

ficult because plastics have to be sorted into their different types, and the plastic that emerges is second rate. The difficulty of collecting, cleaning and sorting plastics also adds

vastly to the costs. In Germany, where tough packaging laws have pushed the process furthest in Europe, the cost of recycling plastic is put at DM3,000 (£1,250) a tonne, or twice the cost of virgin plas-tic. "If we have to pay such a high fee for plastics, then the competitiveness of this product is in danger," says Johannes Brandrup of VKE, the German

Beyond 2000, most plastic waste will be burnt to produce energy and a shrinking portion will go into landfill. Viechenical recycling is expected to remain relatively stable, while petrochemical fee

would require the industry to recycle 15 per cent of plastic, or twice the current amount. APME estimates that mechanical recycling will only be able to contribute half of this, so other means, notably feedstock recycling, will have to be

Incineration without energy recovery

Disposal options

developed to handle the rest. The Germans are currently leaders in this technology. Both VEBA and BASF have substantial plants capable of recycling 55,000 tonnes a year.

about German dominance, and five of them linked up to sponsor the Grangemouth feedstock recycling experiment in order to promote an alternative. They are BP, DSM of the Netherlands, Elf Atochem of France, Enichem of Italy and Fina of Belgium. Their £4m project was

launched last year and is due to bear fruit at the end of this year with the completion of the 750-tonne a year pilot project. The plant accepts mixed

maximum of 2cm across and passes them over hot sand which converts them into a gas. This is distilled back into plastic feedstock and comes out in two forms, one looking like wax and the other like olive oil. This can be fed back into the petrochemical plant to make fresh plastic.

One difference between the Grangemouth plant and the German process is that it could be replicated at many small

ones. These plants, with capacity of 25,000 tonnes a year. would be located at chemical works or even beside munici-pal waste tips, which should reduce the costs of collection compared with the centralised German system. They would also manufacture their own

energy and be self-sustaining. But although engineers at Grangemouth are pleased with the technical performance of their plant, the economics of plastics recycling remain a formidable obstacla, mainly because of the collection and sorting costs which account for

two-thirds of the total. According to Christian Troussier, chairman of the consortium, the most economic way of using waste plastic is to burn it as a fuel, but this is widely viewed as wasteful. The least economic way is mechanical recycling, although that tends to be the most popular with the public

Feedstock recycling, he says, fits somewhere in the middle. It is not as expensive as mechanical recycling, and it has public acceptability. To make it work, he believes that up to two-thirds of the cost would have to be covered by a "service fee" - in other words people would have to pay to have their plastic recycled, either voluntarily or through a

Buzzacott says: "The limit on

how far we go will depend on the green conscience of Europe. But in the end, the consumer or the taxpayer will Relevision Christo

Fabric thoug

have to pay.

This view is disputed, how aver, by the anvironmental lobby which accuses the plastics industry of deliberately exaggerating the cost of plastic recycling in order to obstruct regulatory moves. The industry could do much more. it

costs. Some environmentalists say that manufacturers of plastics containers should go farther and design their products so that they are more readily reusable, doing away with recycling altogether.

argues, to reduce collection

The plastics industry feels. though, that the debate about recycling ignores some key aspects. For example, only 4 per cent of crude oil is turned into plastics. The rest is burnt as fuel. So if people are con-cerned about wasting a non-renewable resource, they would do better to curb the use of

petroL Moreover, greater use of plastics can itself save energy. Dieter Burkle of Elf Atochem says that 100kg of plastic can replace 200-300kg of metal in a car. This weight reduction should save 750 litres of petrol over the lifetime of the car, which is a significant contribu-

ifteen catastrophic hurri-canes, floods and storms cost worldwide insurers more than \$80bn (£50bn) since a period of weather extremes set in five years ago, according to an article in the latest World Watch Institute's journal.

In 1992, Hurricane Andrew struck Florida and set a new record for damages at \$25bn. The Mississippi floods in 1993 cost \$12bn. Europe was hit by four severe windstorms in 1990 which accumulated damages of \$10bn. Japan was struck in 1991 by Typhoon Mireille with

## Insurers in a storm

As the damages mount, insurers have begun to take seriously the global warming theory advanced by many scientists. The fear is that the warming, spurred by "greenhouse gases", produced by fossil fuels, could seriously disrupt the world's atmospheric

and oceanic systems. The lack of agreement in the scientific community has made the insurers wary. But their interest is being applauded by environmentalists who see the insurers as a potential counterweight to the power of the oil and coal interests in the global warming debate.

Christopher Flavin, author of the World Watch article, is urging the insurers to enter the struggle over climate police. "Few industries are capable of doing battle with the likes of the fossil fuel lobby. But the insurance industry is," be says. "On a worldwide basis the two are of roughly comparable size and potential political clout."

The insurance industry could, for example, push government to tighten energy efficiency rules for new buildings. It could actively lobby for a stronger global climate pact. It could also use its investment capacity. "If they [compa-

Unless the industry begins to use its clout in the struggle over climate policy, its future "is likely to be stormy indeed."

ing energy system," says Fla-

## Planting business skills in Ethiopia

The Borena tribe. nomadic pastoralists in southern Ethiopia. easure wealth by the number

of animals they own. This can pose problems in the harsh environment of the Borena region, just north of the border with Kenya. Nancy Dunne | Although drought regularly depletes sources of food and water for cattle, cameis and sheep, there is resistance to sacrificing some animals to improve the others' chances

Tradition exposes further clashes between economics and environment. The Borena sell animals when prices are high but walt to buy grain until they need it months later. By then they have less cash and grain prices have risen - often

because of drought. Ethiopia seems synonymous with drought. Yet four decades ago about 60 per cent of the country was forested, compared with less than 3 per cent today.

Hence an experiment to bring business skills to the Borena. The community is learning to run grain co-operatives, to operate credit schemes and to plan ahead, in a project launched by Care International, the aid agency. Care's immediate aim is to act before a famine strikes.

Grain which might in a crisis have been donated free is being sold at a below-market price to the Borena. They can then sell through co-operatives at an agreed profit. About 300 tonnes of grain

World Food Programme for the project. By selling the grain to the Borena, Care ensures an affordable local market price for grain, diversifies business skills in the community and even makes some money after costs. This allow it to fund other local projects, such as credit schemes for small businesses and teaching the community to construct sealed storage pits for grain, which

Ethiopia's problems are largely linked to land use and a fast-growing population. Deforestation for farming, fuel, fencing, tools and housing have left the land vuinerable to soil erosion and desertification. Intensive subsistence

agriculture has so depleted soil that Ethiopia can no longer feed its 55m people - even when harvests are good. While the weather is an important determinant of food production, aid and environmental experts alike believe some answers lie in small-scale, self-help projects: such as reforestation, agricultural terracing to contain erosion, irrigation to control flooding and soil and

water conservation. "Famine is not about drought, it is about vulnerability to drought. There is drought in Europe but no famine," says Fiona Meehan of Rest, the Relief Society of

Tackling that vulnerability

is often an uphill struggle, as evidenced by various. reforestation projects. Farmers are not always committed to their success because they fear losing reforested land to the government; saplings are sacrificed for fuel or forage material in times of need; and seedling losses have also been high, having been badly planted or an inappropriate

The country has 25m goats. whose hides are exported. They are worth about \$2m (£1.25m) a year for gloves, out they eat all the young shoots, says Girma Woldeglorgis, vice-president of LEM Ethiopia, an environmental group. "It's not worth it to

sacrifice so much for so little." Ideals of conservation may seem outlandish in a country, where thousands have died from hunger this year, but ... economic diversification is important for the future. The transitional government of Ethiopia – which replaced the Mengistu regime three years ago - has allocated \$37m this fiscal year to the preservation and development of natural

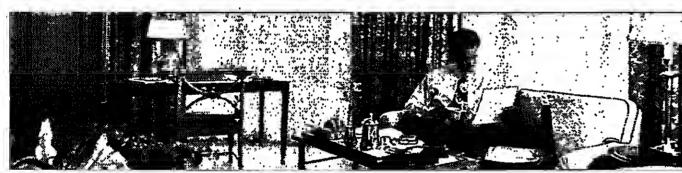

It is also considering preservation of 8.5 per cent of the nation's land for forests. parks and wildlife reserves. Ethlopia has more unique species than any other African country and earned \$23m last year from its immature but. growing tourism industry.

Channel 4's culture series Without Walls to attack the "middle class culturati" who dominate television for suppressing the working-class hero Alf Garnett, it was not Johnny Speight, creator of Till Death Us Do Part and therefore of Garnett, who was so striking. Nor was it the black TV presenter Darcus Howe, who bravely and sanely argued for the true freedom of speech which the Garnett series represented. The most memorable moment came when Bushell showed us his local Working Men's Club on St George's night with a crowd of Londoners roaring out "Wa are red, We are white, We are English dynamite". Why was this such an astounding and unforgettable scene? Because (this was Bushell's point) while the TV man-darins provide us with countless programmes about West Indian working-class cultura, Scottish working-class culture, and even Chinese working-class culture, they sys-tematically suppress any reference to English working-class culture unless it is generations out of date, very left wing, or very sentimental. Gosh, Vanessa, "We are red, We are white, We are English dynamite"? that's fascist isn't it? Oh yah, Emma, let's show that nice clip of the battle of Cable Street again.

Those who say "Come on, don't pretend it's Orwellian, it's all perfectly harmless", might reflect on the fact that, in the most recent screening of The Dam Busters on television, the name of Guy Gibson's black labrador had somehow been changed from Nigger to Trigger. Thus do the Thought Police become a reality. Someone in television is already doing Winston Smith's joh.

The idea of re-making old television dramas which were originally broadcast live, or recorded and then wiped .

hen Garry Bushell, for reasons of economy, is a good television critic of one. But what possessed BBC2 to The Sun, went on choose Dennis Potter's Message For Posterity as the re-make to open a new series of "Performance"? After its first production in 1967, my predecessor, T.C. Worslay, gave a detailed explanation on this page of why it was an inferior example of Potter's work. After describing the play, about an old politician having his portrait painted, Worsley wrote "So what has it all amounted to? Alas, nothing at all. Every issue has been burked. A non-confrontation has taken place, and a purely arbitrary dénouement has been tacked on - much too arbitrary, this attack of madness, to make the flip comment 'Wa always win in the end' have any resonance. I am severe towards Mr Potter's work only because I am so sure that his real gifts will one day flower into something remarkable". Ten out of ten to Worsley and "Must try harder" to the BBC, which magnified the silli-ness of choosing a poor apprentice piece by having it directed as ineptly as any major drama undertaking from them in the last 10 years.

> In BBC2's Walking The Wall and Fall Of The Wall we have seen television doing one of the things it does best: synthesising recent history. The first programme was concerned with the physical entity of the wall. from the moment it was built until the moment it was sold off in large and small pieces, with fake lumps on sale in street markets. The second told the fascinating story of how the wall, and hence all the contingent dominoes, fell. By combining newsreel clips with the key protagonists speaking to camera - from Otto von Habsburg who led the trans-wall picnic, to Hungarian prime minister Miklos Nemeth who described looking into Gorbachev's eyes at the Warsaw Pact meeting and knowing he could breach the iron curtain

Topical myth: in 'Drop the Dead Donkey', an excellent series, most of the newsy bits are inserted in voice-overs rather than visual scener

engrossing first-hand account of one of the most heartening key events of the 20th century.

Have you seen the appalling new chat show in which six embittered men sit around slagging off women? One of them will say "The only things I need a woman for are sex and washing my socks", and the rest all agree and try to say something even more contemptuous about women. Unthinkable on such a politically correct channel as BBC2? Well yes, of course. The programme, called The Last Word, actually features six women slagging off men, saying "All I need a man for is sex and DIY" and so on. Totally differwith equanimity - it provided an ent. Germaine Greer (who else) is in

the chair, and the only mystery is what the usually sensible Ann Leslie is doing among such a cheerless, self-pitving bunch. How the world has done them down! How men have done them down! Bow their parents have done them down! How ghastly it is to have to have children! How terrible it is not to have children! Incapable or terrified of simple human affection so long as the opposite sex is involved, they accompany everything they say with a constant drone of anti-male sentiment, like that swful background keening you get from a hurdy-gurdy. Saddest 45 minutes of the week.

The opening episode of Ellen, a newly imported American comedy

series on Channal 4 on Friday, caused considerable laughter in our household. True, it is yet another programme about a bunch of oddly assorted 30-somethings, but it has that fast-fire wise-cracking quality which is missing from so much British comedy. Off for a major "intergender ordeal". Ellen opens her coat to reveal a little black oumber and asks "Okay you guys, does this say desperate?" The following programme, Paris, a comedy in which Alexei Sayle plays an artist in 1920s France, has reached its mid point (three out of six episodes) without raising more than a snigger and a coupla of groans on the old green sofa. Sayle, one of the truly original

talents of his generation, is not

suited to this sort of sitcom.

Peopla are always inexplicably keen to parrot myths. On Monday yet another commentator writing about Drop The Dead Dankey repeated the assertion that "Topical quips are cut seamlessly into script at the last pos-sible moment before transmission". Actually 98 per cent of the comedy in this - still excellent - series, set in a television newsroom, arises from well established character traits (Sally's superciliousness, Damien's cowardice). The few topical quips delivered in vision are so obviously tacked on that they are scarcely worth the trouble. Most of the topicality is, anyway, inserted voice-over above the end roller.

## Theatre/Alastair Macaulay

## Shakespeare's Language

their original form, you may often feel alarmed at the way they are adapted, translated or deconstructed. I confess to a certain alarm at the current Everybody's Shake-speare seasoo at the Barbican. Sure, it will be interesting to see what Germans, Japanese, Israelis, Georgians and others are doing with Shakespeare; sure, I wish I could see all the Shakespeare films. But we can bet that all this Bardomania will cootain a fair share of Bardoclasm. I try to remind myself that I can love Carmen Jones

Venice makes me nervous. It is good news, then, that the Royal Shakespeare Company's own contribution to the season leads us right back to the heart of the Bard - his language - in a week-long series of public workshops led try the company's brilliant veteran director, John Barton. Barton hurls no thunderbolts at us or at his actors and he reveals no special mysteries. He is the same source of rare good sense as in his 1984 TV series Ploying Shokespeore. and as in many of his wonder-

ful RSC stagings. He starts

from the simplest premise:

as well as Carmen. But the fact

remains that the prospect of a

Peter Sellars Merchont of

f you love masterpieces in trust the text. And he asks tha most basic questions: do the actors make the audience listen? What kind of character would say these words?

Working from these sound beginnings, he helps his actors to reveal marvels. During the week, he will work with Judi Dench, Peter Hall, Jane Lapotaire, Fiona Shaw and others. On Monday, he tackled scenes from Henry V with Penny Downie, Harriet Walter and Tony Church. The latter gave us a hilariously characterful account of the Archhishop of Canterbury's fustian speech on the Salic law, but when Barton asked him to point up the speech's many proper names. we reached another level of meaning at ooce. And that level was to become yet more pronounced in later speeches, wheo we heard names, names, coming hack with deepening nuances. As Church himseif remarked, after Walter had giveo a vivid account of Henry V's reading the lists of the dead, Shakespeare personalises the names of the dead more than he had when they were alive - so heighteoing the play's considerable pathos.

Bartoo threw Downie and Walter without any preparatioo into the delectable scene wheo Princess Katherine

Alyse. Their account of this was a gem of spontaneity.
Which was Barton's point in
Shakespeare's day, actors
would have had no formal direction and little preparation for each oew role. Today, we have to work to regain that natural entry into Shakespearian speech. But "you won't bring Shakespeare alive with-out that Elizabethan sense of

learns English from her maid,

tha language." The antitheses of the Prologue; the broken sense of discovery in Mistress Quickly's account of Falstaff's death; the heightened effect of having the French king pronounce French names à l'anglaise; the drama to be mined from the Herald. Mountjoy's speech if spoken with barbed suavity; the brilliantly deflationary conclusion given to the play by the Epilogue sonnet . . . all these emerged with oew clarity.

And as the veteran Church kept learning from Bartoo's points and his colleagues' performances, I remembered the exciting lesson f once learnt from seeing Ninette de Valois rehearse Robert Helpmann in a role she had created for him 41 years before: one is oever too old to learn.

At the Pit, Barbican Centre

## Munich Opera Hytner's Don Giovanni

he Bavarian State Opera's new produc-tion of Don Giovanni is Nicholas Hytner's latest excursion into opera an art form he is threatening to give up in favour of spoken theatre and film. The staging is simple, abstract and clear. does not overwhelm the music, and gives Peter Jonas his first solid success as intendant in Munich.

Why, then, does Don Giovanni not come across as powerfully as it should? The polished singing cannot be blamed, nor can Colin Davis's inspired conducting. The answer lies in Hytner's own ambivalence. He sees Don Giovanni not as a morality play, but as an opera which ques tions social norms - offering no judgments, providing no solutions. Like Mozart's music, Hytner refuses to give indicators of good and bad. They co-exist, and we must draw our own conclusions.

Boh Crowley's decor is painted blood-red from start to finish. Two featureless portals frame a succession of drop-cloths in the intimate scenes, s curved tunnel in the ensemhles - and provide e dramatic showcase for the arrival of the Stone Guest, accompanied by the Great Reaper astride a real white stallion.

The all-red setting emphasises some pointed symbols – the hand of the almighty, the crucifixes of a patriarchal society. It also throws into relief Hytner's intelligent direction of the principals, dressed in hlack 18th century costumes. The cast works with concentrated poise - but the result is curiously hloodless.

One reason may he the shortage of humour. At Monday's opening performance, the only langhs came when Giovanni tempted Zerlina with visions of bedded hiss - illustrated hy a pop-np neo-classical villa. But the main reason seems to be that Hytner is too keen on maintaining equilibrium. William Shimell's Giovanni is neither a seductive anti-hero nor a villainous thug - he is a charmer who fails to achieve a single conquest, an aristocrat who indulges in bun-fights with his servant.

Despite a flawless Champagne aria, Shimell is constantly in danger of being upstaged by Lucio Gallo's Leporello - whose leery grin, crisp bass and artless diction make him more naturally hot-blooded. Angela-Maria Blasi's Donna Elvira is no scatterbrain, hnt an Ann Trulove who loves her Rake. She is virtually indistinguishable from Sheri Greenawald's Donna Anna. Peter Seiffert's Ottavio makes do with one aria, but he sings flawlessly.

Most personable of all are René Pape and Alison Hagley. Pape's Masetto is no pushover, and he has a rounded bass which should suit him for the title role. Hagley's Zerlina is gentle seduction personified: "Batti, batti" was outstanding. And so was the condocting. There was more life, humanity and fear of death in the overture than anything in this summer's Salzburg production es the full and Sir Colin realis symphonic weight of the penultimate scene.

**Andrew Clark** 

#### more appetising today by giving it a sharp kick in terms of historical period or theme. The sadness is that such galvanic activity usually serves to mask the inability of dancers and companies to discover the qualities of a work by mora reputable means. Directoral caprice becomes a sub-

generated around Derek Deane's

new production of Giselle for

English National Ballet. The

transfer of the action to the Austrian Tyrol in the 1920s — shock, horror — has been cited as a means of making the ballet more interesting for audiences, and a note in the programme opens with the question.

tion: "How do you make an old ballet come alive or a new audience?"

The short answer to that is "By dancing

it well". But fashions being what they are

in opera and classic drama, the idea is common that the old repertory is made

stitute for technical probity, stylistic respect, aven rational understanding. Hence such fatuities as Mats Eks' relocating of Giselle in a loony-bin, or the continuing open-season for Nutcracker abuse, where any foolery is better than attention to score or choreography. And so we now have Deane's Giselle, given its first performances at the Palace Theatre during ENB's current Manchester season. It has to be said that his innova-

tions are largely cosmetic. This is not a radical re-thinking of a Romantic masterpiece. The text is traditional, the staging intelligent in reminding us of the dramatic tensions in the second act, where the wilis are shown as vengeful spirits rather than the usual horde of po-faced misses trying to look meltingly graceful while hopping across the stage in arabesque. Were it not

for the ludicrous outfits of the Courland hunting party, and a few egregious touches in the first act, this Giselle would be run of the mill, and no less welcome for

A 'Giselle' of intelligence

Visually, the production is undistinguished. Charles Cusick-Smith provides a skewed and unlovely front-cloth of a Tyrolean resort, which rises to reveal a set for White Horse Inn. Giselle inhabits the obligingly identified "Stag Lodge" which faces a hostalry where her mama is house-keeper. (Cue bell-boys and maids for the

Clement Crisp reviews Derek Deane's new production for English National Ballet

pas de six). Albrecht arrives in a Rolls-Royce, whose luggage-boot will serve as hiding place for sword and cloak. So far, so dubious and, thank heavens, half-hearted. The peasants are peasants still, in timeless balletic peasant gear (the boys have Bisto-Kid caps, which are a mis-take). There is little sbock for the traditionalist even with the arrival of the Courland hunting party. All Courland hunts look like refugees from the wonderful world of soft furnishings. This gaggle are merely more ludicrous than most, in stuperying hats and maniac suiting (Bathilde wears a frenzy of ocelot and a pair of curtains), with Charlie Drake as the Emperor Franz Joseph in a guest appearance from Mayerling. A winning touch are the skis borne by the servants - so usual The production is knocked hysterically

for six, and on Monday night it took the sincerity of Agnes Oaks' mad-scene and the intensity of Thomas Edur's Albecht to remind me that we were watching a tragedy. The second act is, happily, timeless and true. The setting is of a rocky wilderness - rather too contrived in its menace - and the action well-staged, well-danced. Agnes Oaks may not be one of nature's Giselles, and her teak-dyed hair seems an affront to her blonde beauty, but everything that care and intelligence can do make the role credible, and her mad-scene is excellently thought-out.

Edur, that aristocrat among danseurs, is a heaven-sent, haunted, elegant Albrecht, his reading in the great tradition, his dancing of purest distinction. Susan Jaffe is a fine and menacing Myrtha, and Deane who has restored a powerful sense of terror to this act - makes us feel a frissoo of Romantic horror amid the circlings of vampiric, vengeful wilis. (When Fanny Elssler first danced Giselle in London 150 years ago, the programme note declared that Albrecht had fallen among "the wilis' fangs". Deane admirably evokes this longlost ferocity).

ENB's dancers were in excellent shape on Monday night: the peasant dancers were buoyant; the wilis (Theda Bara to a woman) moved with implacable grace. Let the company persuade the Courland mon into mufti, and ENB will have a sound and useful Giselle.

**Clement Crisp** 

ENB tours Giselle and Swan Lake to Leeds and Liverpool during November.

## **Edward Mortimer**

From the people who gave you Rio 92 (the Earth Sum-Summit. You I expect. Behind all the razzma-

tazz there was a fairly simple north-sonth dialogue. The north was alarmed about the fate of the planet, and had noticed that some of the world's remaining stocks of non-renewable resources, such as rain forest, were concentrated in the south. The south noticed that, for ooce, it seemed to possess something of interest to the north, and sought to turn that to advan-

Southern leaders suggested, politely or otherwise eccording to temperament, that if the planet were to be saved its resources should also be more equitably shared. Some also pointed out that the north, by its sheer volume of consumption and production, was doing far more damage to the global environment than the

It was a frustrating dialogue for both sides. Ecologists and development economists alike felt that the urgency of their concerns had not really been recognised. The sums of money pledged seemed pitifully small in relation to the ambitious targets set, and there wes every sign that even those

s would not be fulfilled. The leaders of nortbern democracies were not ready to ask their electorates to accept the radical change of life-style thet Agenda 21, the action programme endorsed by the Rio summit, implied. Indeed, the powerful end comfortable elites of north and south alike were clearly not about to make such changes in their own life-

Yet many believe that on balance the exercise was worthwhile. There is now a wider recognition in the north thet the threat to the global environment cannot he dealt with unless the conditions of squalor and hopelessness in which more than a quarter of the globe's inhabitants live, without access to clean drinking water or sanitation, are also addressed

There is a corresponding awareness among southern is, their peoples will be the first victims of continuing

We all need to change

Next year's summit in Copenhagen should define social progress

snvironmental degradation. Policy changes so far may be inadequate, but at least they are mostly in the right direc-

So perhaps the "world sum-mit for social development", to he held next March, is the logical next step. This time It is the south which is hringing its agenda to a northern capital. interestingly, the moving spirit behind the Copenhagen summit is the UN representative of a star pupil in the class of southern governments applying current northern economic

This time it is the south which is bringing its agenda to a northern capital

orthodoxy: Ambassador Juan

Even the Chilean govern ent, it seems, has decided that Chicago School economics are not enough. Chile has put itself at the head of e move ment of southern states seek ing to remind the north that the UN was never meant to be only a world police force. It also aimed, in the words of the preamble to its charter, "to promote social progress and better standards of life in larger freedom", and "to employ international machinery for the promotion of the economic and social advancement of all peoples".

A "new world order" confined to issues of peacekeeping and peace enforcement would mean little to the billion-plus people who live in poverty. without jobs, without basic would also be unsustainable in the long run, even if the

world's leading military powers were willing to devote their forces to it, which they are not. A world where the top 20 per cent of the population receives 83 per cent of the income, while the bottom 20 gets only 1.5 par cent, and the gep appears to be still widening, is hardly likely to be a peaceful

Yet no one imagines the social summit will be the occasion for a crude redistributioo of global income. No doubt industrialised countries will yet once more pledge their best efforts to reach the target of spending 0.7 per cent of gross domestic product on development aid. But no one will believe them, at a time when even Sweden is slashing its aid budget; and few people any longer believe that if the target re reached it would make e great difference to so-called

'developing countries". Same of these countries really are developing, which means they ere generating resources and providing oppor-tunities for investment. Many are not, including at the ment almost all African countries. The degree of success does not correlate with the amount of concessionary finance a country receives. If anything, lt correletes

So what will the summit discuss? All the nostra of the age, from debt relief to labour market flexibility. The latest draft of its declaration contains on s that 84 "commitments" in eight pages, with no hierarchy of priorities among them, and

therefore zero credibility. issue which Rio opened up, hnt certainly did not resolve: what does "social development" actually mean!

It cannot he equated with economic progress, if that means helping the south to "develop" in the way the north has developed. Apart from the fact that that would destroy many treditional cultures, reducing the richness and diversity of our species, it would clearly he ecologically

This planet will not support 12bn or even 8bn people living way we in the north do now. All of us are going to have to change our way of life, our aspirations and above all our appetites.

\*From the leaflet Why o Social Summit?, UN Department of Public Information

apan's consumer electronics manufacturers have acbleved a position of enviable dominance in their industry, after two

decades of spectacular growth. Their ability to continue that growth, however, is now in doubt for the first time since Japanese TV sets and stereos began finding their way into homes throughout the world in

Companies such as Matsushita and Sony are finding that manufacturing electronics equipment is no longer as profitable as it used to be, and are moving into entertainment and information services, which eppear to offer better prospects. But the Japanese consumer electronics manufacturers have yet to prove that they can huild more profitable businesses in these new markets.

Japanese manufacturers' profits on consumer electronics have been squeezed from three directions: singeish demand. particularly in the home market: falling prices; and the yen's sharp appreciatinn.

Nearly every Jepanese isehold now owns e colour TV set, and 73 per cent a video cassette recorder. Demand is therefore weak for traditional New products such es widescreen TV are not ettracting the kind of consumer interest needed to compensate.

"There are many new, excit-ing products, but they are not contributing to profits much because the scale of them is so smail," says Mr Nobuyuki (dei, managing director of Sony.

Japan's consumer electronics narket has also suffered from fierce competition and from the growing availability of cheap products made in lowcost countries, primarily in south-east Asia, "Audio products the world over heve become really cheap," laments Mr Yoichi Mnrishita, president of Matsushita

Price-cutting has become rife as retailers struggle for business, and cheap TVs and VCRs flood in from Taiwan and Korea. "It is no longer an industry in which it is easy to justify high prices," asserts Mr Koichiro Chiwata, industry analyst at Salomon Brothers, the US investment bank.

To add to the woes of the Japanese manufacturers, the yen's sharp appreciation has lts. The strength of the yen reduced Sooy's revenues by more than Y500bn (£3,2bn) last year, according to the company. The yen's continuing appreciation this year will further depress manu-

Japan's consumer electronics groups are being forced to adapt, says Michiyo Nakamoto

# Spark goes out of the world-beaters

facturers' revenues.

These pressures have hed devastating results on the financial performance of the consumer electronics makers Sony's operating profits dwindled to Y99.7bn for the year to March 1994, less than one-third the Y302.2bo it made in 1991. Its operating profit to sales ratio was 2.7 per cent last year against 10 per cent in 1990.

Matsushita's operating prof its shrank to Y173.6bn last vear, from Y472.6bn in 1991, Its operating profits were 2.6 per cent of revenues, down from 7.5 per cent in 1990.

The company expects e 33

per cent rise in ordinary profits for the current year to Y85bn, helped by retionalisation measures. But the result will still be less than a third of Matsus hita's 1990 profits of Y277bn. Despite the deterioration in the consumer electronics busiess eovironment, the compa-

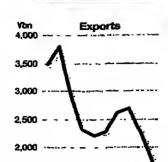

nles are abliged to continue numping large sums into research and development. Both Sooy and Matsushita speot about as much on R&D in the last fiscal year as they did in 1991, when nperating profits were between 21/2 and three times higher.

R&D costs are likely to rise further. With manufacturing costs that are amnng the highest in the world, Japan can no longer rely on "people-depen-dent assembly" but must shift tn a "technology- and knnwedge-intensive production systeni", according to Mr Haruo Tsuji, president of consumer electronics group Sharp, "For that, R&D is crucial," he says,

Such efforts have giveo Japanese companies technological superiority in making parts of the new generation of multimedia electronics equipment, which will deliver a wide range of entertainment and information services to husiness and

Sharp dominates the market for liquid crystal display panels used in portable products, such as personal organisers JVC is a leader in the digital compression technology that squeezes informatioo - from sound and data to video .

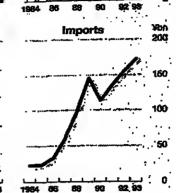

Japanese consumer electronics: squeezed Production

down the telephone line or on to digital discs, such as CDs. Japanese electronics makers such as Sony, also dominate the market for recording media sucb as CD-Roms, the portable discs that are used to store computer data, and the drives that run the discs. But as more and more infor-

metion becomes evailable to consumers at home, equipment such as CD-Rnms which receive the information is expected to become less important – end less profitable – than the services that feed into it. This can already be seen with products such as personal computers and cellular telephones, where the most profitable businesses are in providing the software or telephone networks, rather than making the hardware.

"It is the owners of the net works who will he the main beneficiaries of the multimedia age, followed by those who provide the services," says Sony's

Mr Idei. He believes that the consumer electronics companies will gradually become such service providers over the next 20 years.

The recognition that providing multimedia services such as video-on-demand and interactive games offers a more attractive source of profits than making the hardware has led both Sony and Matsushita to invest recently in cable TV and satellite broadcasting.

Sony has invested in e Japanese satellite broedcasting company and Y600m in Tnkyo's sixth TV station. It has also taken a 25 per cent stake in a Latin American cable TV operator. Matsushita has interests in 30 cable TV companies and has built up a computer data and network service in Jepan.

The consumer electronics companies have also been supply the programmes and entertainment services for

these networks. Control over software, the argument goes, will ansure support for new hardware systems and the distribution systems.

Sony, for example, says that would have been hard to sell its new MiniDisc portable audio products without being able, through its ownership of CBS records, to ensure that recordings were available to play on them.

The Ban jew of I

was this view that prompted the larger Japanese alectronics companies to march into Hollywood during the 1980s and acquire famous US film studios and their valuable stock of films and television programmes. Sony bought Columbia Pictures as well as CBS Records, while Matsushita bought MCA, the entertain-

The move has yet to pay off: most Japanese investments in Hollywood have brought more headaches than profits.

atsushita has recently bsen publicly emharrassed by demands from MCA executives to cede management control of its entertainment subsidiary, which it believes is crucial for its future in multimedia.

Sony is believed to have suffered e substantial loss last year from Columbia Pictures. The studio has remained in the doldrums this year, with few hit pictures - prompting the departure of its head. And Pioneer has had to make successive capital injections into Carolco Pictures, its US film

subsidiary.

For the Japanese equipment makers, steeped in a culture of consensus-building and longterm decision-making, mana ment of the spiralling costs, big egos and short-term thinking that characterises Hollywood studios has proved more difficult than they imagined.

Desplie these setbacks, most Japanese consumer electronics companies see little choice but to hold on to their entertainment assets. "As software becomes more important, we cannot remain hardware makers alone," emphasises Mr Tsuzo Murase, executive

vice-president of Matsushita. The advent of multimedia and the stagnation in traditional manufacturing activities appear to leave Japan's consumer electronics with little choice but to move deeper into the unfamiliar world of entertainment media. As they do so, their best hope will be that the rewards they reap finally live up to the greater challenges

#### **Guilty of** dated thinking

From Miss S M McLaughlan. Sir, Re Matthew Batstone's article, "Men on the supermarket shelf" (Management: Marketing and Advertising, October 27), it is not only marketers and advertising executives who are guilty of 1950s thinking. I oote that Batstone describes an advertisement as "showing a man cleaning the kitchen floor for his wife". Is he not cleaning the floor because it is dirty? Unless he is a guest in his wife's house, it is presumehly, his flnnr elso, unless she is about to pop over to his kitchen and help out with a few chores there? S M McLaughlan,

30 Lion Road. Nyetimber, Sussex

## Real genius

From Mr Hector Eduardo Luisi. Sir, in his review of Roméo et Juliette ("A night off for the inteliect", October 31), Richard Fairman states quite correctly that turning Shakespeare into opera is work for a genius, as the two indisputable successes (both of them hy Verdi) show. Surely he means three, all of them by Verdi: Falstaff, Macbetto and Otello. Hector Eduardo Luisi, 7415 Beverly Road,

## Not so blameless on pensions From Mr M A Bentley. Sir. Mr R S Parkin (Letters, "pension account" – ie, such as pension plans.

October 27) is perhaps a touch too quick in pointing the accusing finger for the personal pensions scandal solely at the life insuraoce industry, while placing the occupational pension plans on a blameless ped-

While correct in recalling the predictions made at that time by pension fund managers and consultants, he should also remember that this same group took no initiative to provide the customers (the employees) with what they really wanted. This was a simprovided by money purchase defined contribution plans, where what is paid in by and on behalf of an individual remains identifiable and quantifiable and is not diverted to supplement early retiremant pensions and executive top-up

pensions of other colleagues.

If the occupational pension fraternity had taken steps in the mid-1980s to accommodate the market demand "in house" by providing alternative or supplementary defined contri-bution plans, most employees would never have spared a

However, by insisting on a one size fits all/father knows best" policy of final pay plan the experts only bastened the stampede of misinformed but frustrated individuals who were thus encouraged to taste the forbidden and therefore exotic fruits of personal penslons.

Alpenquai 30, P O Box 2065, CH-6002 Lucerne,

## Government failing to shape opinion

From Sir Jeffery Bowman. Sir I was delighted to hear reports that Lord Howe is forming a group to argue the case for Europe ("Howe warns on Tory EU rebels", October 17). I find nothing mnre depressing today than the way in which almost all the UK's difficulties are ettributed to Brussels or to Brussels hureau-

To me, the issue is simple. The UK is a small country which is not particularly well endowed with natural resources. So far as the future is concerned, we shall not be successful ecnnomically or influential politically unless we play a leading role in a strong Europe.

Similarly, Europe will not be strong unless its members act

together and cede certain of their powers to the Union, something we have alreedy committed ourselves to do.

Working with our fellow

members of the European Union to create a strong and powerful Europe is clearly not a simple task. To me, however, cootrary to what seems to he the accepted view in this country, it is not only very important but also e very stimulating, exciting and challenging

prospect. I recognise, of course, that there are many aspects of the European Union which are unsatisfactory and in substantiai osed of improvement, it must, for instance, become much mnre democratically

eccountable. The UK should be striving to | Essex CM3 3EP

make changes as e committed member, not ecting as if It were a country reluctantly involved in a Union of which it would really prefer not to he

The greatest failure of the present government in the IIK is, in my view, its failure to appreciate and to communicate to all of us hnw important Europe Is. It is not a good excuse to say that public opinion is against Europe at the moment. The joh of political leaders is to shape public npinion, especially on an issue of such vital importance to our future.

Sir Jeffery Bowman, The Old Rectory. Nr. Chelmsford

#### Charging for road use is way to improve quality of urban life

From Mr Richard Bird.

Maryland 20814,

Sir, The report of the Royal Commission on Environmental Pollution is clearly one of the most important documents on the subject of the car and the environment this decade ("UK traffic growth curb urged by commission", October 27). Surprisingly, it appears to attach very little weight to charging for road use - the one political step which could have a significant effect on the quality of

Additional fuel taxation will not of itself make much impact on traffic density in the places where pollution problems are most acute - the UK's towns and cities. It is a blunt instrument which will penalise the alternative to the car and will add to natinnal freight costs. The commission has dealt fully and forcefully with the costs to the nation of pollution-

related diseases such as asthma and cancer, road-related deaths and noise. To be added to this burden are the loss of millions of hours of productive time due to congestion, the inability to plan journeys properly and the rapid deterioretion of public transport

Road pricing is the only way to break the spiral in a free market economy. It is the only means to force an efficient and responsive economic link hatween the supply of and | passing of the necessary legis-

rural driver who has little demand for limited road space and release significant revenue for investment in public transport networks.

While the tolling of motor-ways by 1998 is already a commitment of this government, road pricing could start much earlier in the cities, and work outwards through the road network, eventually forming a unified road use charging system with the potential to charge for use of all types of road. The necessary technology exists; It Is simple, low

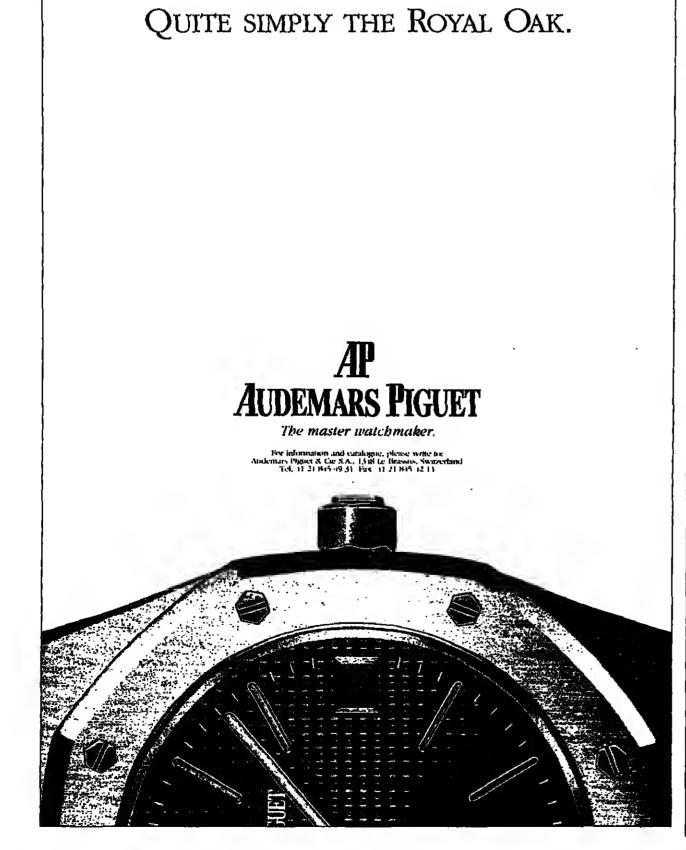

There are, though, two important hurdles to overcome - both within the control of Parliament. The first is the

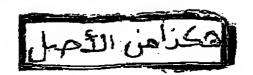

cost and easy to install

lation to enable local authorities to charge for the use of road space. The second is the issue of hypothecation; the Treasury must allow the larger part (if not all) of the revenue derived from road use charging to be directed to improving all areas of the nation's public transport services and, where appropriate, for those decisions to be made locally.

The government will oot be serving the eims of the commission and the majority of UK people unless it tackles these issues squarely and swiftly. Richard Bird, director of research and

development, UNIPASS, London W11 3BU

# The Bank's view of prices

As Mr Eddie George pointed out last week, practitioners of monetary policy have no crystal ball to tell them when to act. What the governor of the Bank of England has instead is a medium-term target for inflation, a wide range of economic forecasts, and a judgment on how to reconcile the two.

OVEMBER

And the second s

To gauge by the Bank's latest inflation report, his institution's current opinion is that September's interest rate rise has reduced the gap between target and fore-cast. If interest rates were to remain unchanged, the report says that the single most likely outcome for inflation in the first half of 1996 is 21/2 per cent. This is at the top of the government's 1.2% target range, and somewhat lower than the 3 per cent forecast in May. But there is a better than even chance of its being exceeded, at least without further increases in interest rates.

. As the Bank is keen to stress, the scope for error is wide. Its own forecasting record ahows that already. It has been caught out, once again, by the slow pace of inflation in the three months since its last report. Instead of rising slightly in the third quarter, as predicted, the government's target measure fell further in September,

to a new low of 2 per cent.

The Bank lists five risks to the government's target for the end of the parliament. One, the growth rate of narrow money, has picked up since the last report. It grew at an annual rate of 7.3 per cent in September, compared to 6.5 per cent in August, and is still well above its 0-4 per cent monitoring

Of greater interest are the other potential inflation risks cited by the Bank. As the report rightly notes, rising demand - especially overseas - appears to be putting upward pressure on producer prices. Thus far, lower unit labour costs have helped companies absorb much of the increase. Furthermore, tough competition at the retail level has largely spared consumers a rise in final prices.

This means that the growth rate in producer prices, which has picked up in recent months, continues to exceed that of ratail prices. But neither of the factors currently restraining the latter will necessarily last indefinitely. The same caution applies to the likely course of events in tha labour market, the last - and most important - of the Bank's poten-tial risks for future inflation.

Underlying nominal wage growth has been moderate and rather stable in the recovery thus far. As with the increased competition among retailers, this could represant a positive structural change in the economy. But similar "miracles" have been declared in the past.

Tha Chancellor may be convinced that things have changed. But the Bank would rather not take any chances. There is a danger that it will turn out to be crying wolf. Given past experience, that must be more sensible than assuming the wolf is slain.

# Spy scapegoats

Senate intalligence committee's denunciation yesterday of Mr James Woolsey, head of the Central Intelligence Agency, was predictable - and, predictahly, a little unfair. He stands accused of insufficient punishment of those responsible for Aldrich Ames, the Soviet mole, whose eight years' spying for Moscow wreaked bavoc in the CIA's network of foreign agents. The Ames case did not happen on Mr Woolsey's watch, and it is the sort of nightmare experience which has visited all intelligence agencies, including the British, over the years. But these days scapegoats are expected and demanded.

What the report does correctly highlight is a mindset in the CIA inherited from the pest, which is war world. It also raises reasonable questions about the role of intelligence agencies these days. A wholesale revolution in attitudes may be asking too much, but change there must be: in accountability, in methods, in targets, and

in psychology. Throughout the cold war, western intelligence agencies were focused above all on the threat from their east bloc rivals, the KGB, and its even more efficient offspring such as the East German spy network. Spying on each other was a mutually self-justifying operation which almost certainly led both sides to exaggerate the threat from the other. The track record of the CIA and the rest of the western agencies in failing to Union indicates just how much they suffered from self-delusion.

It must be said that whereas the failures of the intelligence community are depressingly obvious the CIA's track record in Haiti is only the latest example - Its suc-cesses can by definition not be trumpeted from the rooftops. Just to cite one example, the Lancaster House constitutional conference which brought peace and independence to Zimbabwe would almost certainly have been much less successful without the efficient eavesdropping of British spies. Today's threats are far less pre-

dictable than they were in the cosy cold war years. Proliferation of nuclear, chemical and biological weapons is perhaps the greatest single threat; forecasting of highly wars is another big task for the intelligence fraternity. The pursuit of international terrorists and drug traffickers is a role which could well be shared with more conventional police agencies.

These are all tasks which certainly require a continuing intelligence capacity. But the relatively dispersed nature of the threats means that agencies like the CIA can and should become much more accountable in their work. Much of it is after all based on thorough and intelligent analysis of available information, not bribing and bugging. And the more such agencies learn a psychology of openness and accountability, the less opportunity there will be for the likes of Aldrich Ames to predict the collapse of the Soviet betray them.

# Digital doubts

So much is talked about digital television that the creation of a new channel is practically warranted just to carry the verbiage: Yet there are reasons to be sceptical. Politicians have been particularly guilty of talking up the pros-pects. But in their desire to predict the future of one of the world'a fastest-changing industries from a single piece of technology, they are overlooking, not for the first time, that the technol-

ogy is still in search of a market. The dehate is heating up because the technology to compress a television signal digitally has only just begun to work. In increasing greatly the amount of information which can be delivered, it enables television opera-tors either to send out 10 times as many channels or to improve the quality of the picture, through high-definition or wide-screen pic-

tures, for example. But there are snags: most importantly, the need for expensive new equipment at some points along the line between the studio and the viewer's home. Such additional costs are likely to be highest for digital terrestrial television, which would need new equipment at almost every stage along that line studios, transmit ters and, most problematically, further black boxes on top of viewers' sets. One slice of those costs the need for new transmitters would be removed if the signal were distributed by satellite direct to viewers' homes. The costs would be lowest if the signal were

systems for onward distribution: cable operators would need new reception equipment, but not

Of those three options, tha two which depend on satellite distribution are worth taking seriously at present. Yesterday Canal Plus, the French pay-TV channel, said it planned to be the first in Europe to deliver digital satellite services to homes. It remains to be seen, however, whether demand for enhanced services will emerge either for dozens more channels or for better quality pictures - and how much viewers will be prepered to pay for them.

The option which is least worth taking seriously is the one the UK government has most enthusiastically embraced: digital terrestrial television. This summer, the government said that it would reserve for future digital services one of the two frequencies it had previously set aside for a fifth terrestrial television channel. The result is to reduce the proportion of the country which Channel 5 will cover from about 70 per cent to just over 52 per cent, although the range may yet be boosted if other

frequencies become available. Yesterday the Independent Television Commission advertised the Channel 5 licence for a second time, although its coverage and commercial viability remain uncertain. What is clear, however, is that the full potential of a new service which could be immediately available to viewers has been jeopardised for a technology which may remain unwanted. sent by satellite to cable television

#### hen it emerged last week that former boxer George Walker had been cleared of masterminding a £19m fraud at Brent Walker, the news was greeted by financial commentators much as cricket correspondents treat another defeat for England in an off-season. There was a ritual groan to the effect that the UK's Serious Fraud Office (SFO) had done it again; another failed prosecution at

a cost of millions to the taxpayer. The response is understandable whatever the merits of the verdict in the Brent Walker case, if only because of the cumulative evidence that justice in white-collar crime trials is so arbitrary.

At one extreme, financial services salesman Roger Levitt inflicted serious losses on scores of investors, for which he was required to do a mere 180 hours of community service after pleading guilty to fraud in a complex plea bargain. At the other, Ernest Saunders made plenty of money for investors and no fortune for himself in the Guinness takeover of Distillers, yet went to jail.

There is nonetheless a risk that the SFO, for all its blunders, is picking up an undue proportion of the flak. To judge a prosecuting authority by the number of people sent down is a crude yardstick. Police-men are not rewarded on the basis of successful convictions, or the effectiveness of a regiment judged

by the number of people it kills.

Moreover, the high burden of proof required in criminal cases, the capricious judgments of some juries and the loopy behaviour of certain judges are features of the criminal justice system as a whole, not of fraud trials in particular.

The complexity of frand raises questions about relying on financially unqualified jurors to reach verdicts. But the frequent failure of juries to convict in fraud trials might also reflect a lack of consensus about the use of criminal penalties where there are either no obvious victims, or where the losses are hard to identify.

There is, in fact, a growing tide of opinion among financial regulators that the line between criminal and civil penaltias has been wrongly drawn; and that a beefed-up regula-tory apparatus, applying a less demanding standard of proof, could more effectively tackle some of the work now done by the courts. What criteria should determine the division of labour?

Some financial fraud constitutes obvious robbery. In the Barlow Clowes case, for example, Mr Peter Clowes took money from investors and used it to finance personal expenditure, including the purchase of a yacht. He was rightly convicted. In a country where more than 40 per cent of people found

# Arbitrary justice in the City

Recent fraud prosecution failures have advanced the case for more powers for financial regulators, says John Plender

guilty of thefts of under £200 go to prison, reducing the sanction in such cases would be an unacceptable instance of double standards.

In contrast nobody in the Brent Walker case was accused of having a hand directly in the till. The nature of the alleged crime was that the company inflated its profits by incestuously lending money to third parties to enable them to buy the products of its film division.

Between 1984 and 1987, the manipulation of the figures caused Brent Walker's shares to rise artificially high. This allowed the company vastly to enlarge its capital by issuing fresh equity and to make acqui-sitions on the back of misleading information. Investors paid too much for the shares, while bankers were deceived on the creditworthiness of the company and its director-shareholders.

Yet hy the time Brent Walker ran into trouble in 1990, it was a larger, very different group from what it had been in 1987, the last year misinformation was propagated. The financial crisis at the company was due less to falsification of the film division's profits than to excessive borrowing on subsequent deals.

As a result it is impossible to attribute specific losses to the origi-nal act of falsification. Yet there was substantial damage, in that many shareholders and creditors would have lost less if the lower level of real profitability in the mid-1980s had been disclosed. Bankers and investors would not have advanced money on the same scale; so Brent Walker would have gone into its financial crisis with a smaller share capital, owing less. There are a number of misde-

trials. Banks and the investors who stayed in the shares were deceitfully coaxed - in the jury's view, not by Mr Walker - into a loss-making course of action. While nobody had a hand in the till, that does not mean that direc-tors reaped no personal benefit. Directors' pay packages and pen-

meanours here, as so often in fraud

sions usually bear some relation to corporate size. If manipulation facilitates growth by acquisition, the directors may be substantial financial beneficiaries.

At the same time profits manipuwith the Guinness takeover of Dis-

lation led to market rigging, an activity which can damage the City's international reputation and drive business to other financial centres. Such issues about the integrity of markets might be thought to be a matter for the regulators rather than the courts. Note, though, that in the Blue Arrow case, where merchant bankers failed to reveal a rights issue had flopped, convictions were reached, before being quashed on appeal.

Finally there is a public policy issue on the economic consequences of takeover activity, which arose

tillers as well as at Brent Walker. If large companies change hands on the basis of false information, a misallocation of economic resources could result. Most people would agree that this is anti-social behaviour. They might not all agree that it merits a jail sentence.

It is tempting to generalise about criteria for criminal as against regulatory sanctions on the basis of a combination of incurred losses and an intent to deceive. There was much sympathy with Mr Justice Clark last year, for example, when he said in an SFO case against two stockbrokers

T.C. Coombs, who were acquitted: "I cannot help thinking that this sort of enquiry in a case where there has been no financial loss to any individual would be far better left to the regulatory jurisdiction of the appro-priate hodies rather than a full-blown criminal trial."

Yet in practice so many cases of corporate and financial skulduggery involve grey areas that comprehensive generalisation is impossible.

Hence the merit of a pragmatic approach proposed by the chairman of the Securities and Investments Board (SIB), Mr Andrew Large. Mr Large believes that in cases with a potentially criminal dimension, regulators and prosecutors should co-operate at an early stage to establish how the public interest would be best served. If the high burden of proof required by the courts is likely result in failure to secure a conviction, then regulatory sanctions might be appropriate.

ne precedent is the US approach on insider dealing. There, it is both a criminal offence and an administrative offence, for which the Securities and Exchange Commission (SEC) may secure penalties of three times the profit made. While the most serious cases are dealt with by criminal prosecutors, there are many cases where the SEC confiscates the profits and imposes such financial penalties.

"The knowledge that the criminal route is available is a deterrent," says Mr Large of the US approach, "while the availability of civil set-tlement provides a quick – and public - disposal in cases where prosecution is not essential."

Tha SIB has already explored the opportunities for greater co-opera-tion with the prosecutors. It has reached agreement in principle with the SFO about the sorts of cases that might be better handled by the civil regulators. But it lacks powers under the Financial Services Act to investigate insider dealing and market manipulation. And, like the Stock Exchange, it lacks a statutory

power to fine.
In the light of the SFO's unhappy experience in frand trials and the perceived failure to pursue insider dealers, there are clear attractions in an enlarged role for the regula-tors. The risk is that financially expert British watchdogs may not be as tough on financial misdemeanours as those in the SEC.

The trade-off is between financial expertise and the independence of the jury. It follows that if the gov-ernment does decide to tilt the balance in the system towards regulatory sanctions, a much greater degree of transparency will be required if public concern about potential coziness between regula-tors and their peers is to be avoided.

## Can the debate on minimum labour standards be moved beyond caricature, asks David Goodhart

For love of labour

alaysia is "a country of cheap and docila labour which has banished free trade unions". Mr Lane Kirkland, one of the most powerful trade unionists in the western world, recently told the UK Trades Union Congress.

The views of Mr Kirkland, head of he US union umbrella, the AFL-CIO, are typical of western union leaders. The reason for such attacks is not hard to find. Dr Mahathir Mohamad, the Malaysian prime minister, is one of the most outspoken critics of the idea of worldwide minimum labour standards. Supporters of minimum standards especially among the unions therefore assume that Malaysia is teaming with sweat shops and child

There are poor working conditions in some sectors of the Malaysian economy, particularly among immigrant plantation workers. There are also some restrictions on trade unions. But in most other respects, Mr Kirkland's views are being left behind by events, as Malaysia races to catch up with Aslan tigers such as Korea and Taiwan. When workers come here for an interview, it is not us interviewing

standards of health and safety. And even trade unionism is "semi-free", according to Mr G. Rajasekaran, secretary general of the

turing sector they operate with greater freedom than in most other countries in the region. Malasia's high wages are already causing many assembly operations to relocate to China or Thailand, says Mr Tan. The government wants to emulate neighbouring

Singapore in shifting to high value-added production. With its GDP per capita nearly US\$8,000 (using purchasing power parity), just above Creece, the poorest European Union country, it can no longer compete with the oew low-wage Asian competition. Thus, Malaysia is now too

advanced to be affected by most of the minimum labour standards that union leaders such as Mr Kirkland would like to impose in return for access to western markets.

"Malaysia would scarcely be affected by what is proposed. If the

plan really was for a global minimum wage - as Mahathir claims we would be the first to oppose it," says Mr Abdul Razak Hamid, head Malaysian Trades Union Congress. of the Malaysian textile union in So why does Dr Mahathir persist

in his attacks on the west and on Malaysia's own trade union leaders? Accusations of western hypocrisy on labour issues have belped to

raise his standing in the developing world. He is also worried that the west will try to impose what he believes to be an inappropriate form of trade unionism on countries such as Malaysia through minimum labour standards. Yet beneath the rhetoric, some

flexibility is apparent. Mr Anthony Yeo, the senior official at the Ministry of Human Resources who represents Malaysia at international Labour Organisation meetings, opposes any link between trade and labour standards. But he adds that the ILO should be given more authority to stamp out real abuses. such as child and slave labour. He also says that, while restricted com-

pany unions are currently the most appropriate for the Malaysian elec-tronics sector, "we might at some future stage adopt a different approach".

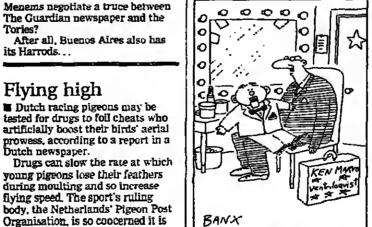

If Malaysia is to make the transition to a high value-added economy, it will have to relax the paternalism that pervades the country. Modern cated workforce capable of making independent decisions. "That also means trusting citi-

zens to form free trade unions," says Mr Steve Pursey of the International Confederation of Free Trade Unions based in Brussels

Mr Pursey - reflecting a more sophisticated trade union view than Mr Kirkland's - believes that developing countries such as Malaysia, which have advanced beyond the first stage of industrialisation, have most to gain from minimum standards legislation. It will protect them, he argues, from being undercut by the cheapest labour economies before they are ready to switch to higher value-added production. From their different perspectives.

Mr Pursey and Mr Yeo suggest that the debate about minimum standards is at last moving beyond the realm of caricature.

Agency chief faulted over disciplinary action | US factory

# **Senators criticise CIA** for handling of spy case fears of

14

US senators demanded fundamental changes in the culture of

They castigated its director for his response to the discovery of a Russian spy within the agency's counterintelligence division this

The Senate intelligence committee said it found "a bureaucracy which was excessively tolerant of serious personal and professional misconduct among its employees, where security was lax and ineffective".

The committee also criticised the disciplinary action taken by Mr James Woolsey, the CIA director, after the unmasking as a spy

In a detailed report, the committee said "gross negligence" had allowed Mr Ames to remain undiscovered for almost nine ary and jailed for life after admitting spying for the Soviet Union and then Russia.

The findings come at a difficult time for the CIA, as the justification for maintaining a \$27bn annual intelligence budget after the end of the cold war comes under increasing pressure.
Although most of the money

goes on the electronic surveil-

**Editorial Comment Page 13** 

lance conducted by the National Security Agency, it is the CIA that has been the target of most

political attacks. Apart from its handling of the Ames case, the agency has been challenged on questionable judgments in countries such as Haiti, where it repeatedly undermined President Jean-Bertrand Aristide and kept supporters of the mili-

The committee said it had found "a system and a culture unwilling and unable - particularly in the early years of Ames's betrayal - to face, assess and investigate the catastrophic blow Ames had dealt to the core of its operations".

As a result, more than 100 intelligence operations were compromised and 10 Soviet sources of the CIA and the Federal Bureau of Investigation were executed.

In dealing with the case, the report says, Mr Woolsey had only issued letters of reprimand to seven retired and four current

CIA employees. None of the

employees was fired, demoted, suspended or even reassigned.

The committee sharply criticised this disciplinary action as falling "far short of the level of sccountability expected by tha committee". One committee member, Senator Howard Metzenbaum, urged President Bill

## Bank of England points to need for interest rate rise

By Philip Coggan and Motoko Rich in London

UK interest rates will probably naed to rise over the coming months to keep inflation on target, the Bank of England implied in its quarterly inflation report

The UK's central bank said the inflation outlook had improved since its last report. Its forecast of underlying inflation (which excludes mortgage interest pay-ments) in mid-1996 has been reduced to 2.5 per cent, from around 3 per cent in its last fore-

The report will set the agenda for today's monthly monatary meeting between Mr Eddie George, the governor of the Bank of England, and Mr Kenneth Clarke, the chancellor of the exchequer, which will discuss interest rate policy. The twoagreed to an increase in base rates from 5.25 to 5.75 per cent after their September 7 meeting.

Institute of Directors, a leading employers' organisation, said it saw no evidence of overheating

range for inflation of 1-4 per cent, Norman Lamont, added the aim of reaching the lower half of the government'e target range by the end of this parliament. The Bank now regards the lower half of the

being lower."
The Bank is particularly concerned about the recent pick-up

# Banking on low prices

UK base rates will rise. Nothing in yesterday's inflation report from the Bank of England will change that. But the reduction in the Bank's mediumterm inflation forecast to 2.5 per cent means that a rise in rstes is not pressing. Nor may the eventual increase need to be as great as the markets

The report could still provide Mr Eddie George, the Bank governor, with an excuse to push for an immediate rate increase in his meeting today with Mr Kenneth Clarke, the chancellor. It plausibly argues that the probability of overshooting the 2.5 per cent forecast is greater than that of undershooting. The main risk is that pro-ducer price inflation will feed through to retail prices. Moreover, the Bank clearly feels uncomfortable with a pro-jection right at the top of its 1 per cent to 2.5 per cent target range. Even so, the betting must be that Bank will wait for further evidence before

urging action.

Central to the Bank's analysis is the assumption that September's increase in base rates will cut inflation by nearly half e percentage point. The reasoning is that consumers are still so heavily weighed down by debt thet interest rate rises will have a bigger effect on demand than in previous cycles. If the Bank is correct, inflation could fall to the middle of its target range without any need for base rates at the peak to rise beyond 7 per cent.

All this is encouraging for markets. Though US bonds may continue to be knocked by fears over US inflation, the better inflation outlook in the UK should lead to a further narrowing in yield gap between gilts and Treasuries. Equities would then be carried

#### British Petroleum

BP's debt mountain, which previously threatened to engulf the group, is firmly under control. Disposals and strong cash flow have reduced debt by \$6bn since 1992, helping to cut the interest burden. On the trading front, the outlook appears promising with profits growth driven by a recovery in petrochemicals prices and continued cost cutting.

BP is now in the happier position of deciding how much of its cash flow should be invested and how much distributed to shareholders. After its previous traumas, the management is right to be cautious. But earnings can be advanced only so far by reducing costs and there is a danger the group

FT-SE Index: 3096.3 (-1.1) BP/Shell Transport

could miss opportunities through

under-investment. With BP's return on capital at 12 per cent - better than all but a couple of its US rivals - the company can afford to increase capital spending. But BP'e exploration effort is proving highly productive, so it may not need to invest a great deal more to increase its global market share.

The stock still has ground to recover after its collapse in 1991 and 1992. As the group's rehabilitation continues, it should continue to outperform its oil peers. BP remains at a discount of up to 15 per cent against US groups on both a cash flow and price earnings basis. True, the yield is still low. But if the company can deliver on the mar-ket's expectations of 20 per cent dividend growth, that will no longer appear so great a drawback.

#### Hongkong Telecom

The 15 per cent growth in Hongkong Telecom's half-year earnings was in line with expectations. But the figures were s disappointment nonetheless The reason was the pedestrian 11 per cent increase in turnover - pedestrian. that is, for a company valued at a substantial premium to the Hong Kong market. But for a reduced tax rate and a lower management fee paid to Cable & Wireless, Hongkong Telecom's parent, earnings growth would have been more modest.

Worryingly, the main culprit behind the sluggish sales picture was China. The country generates about a third of the group's international revenues, and enormous excitement among investors. In the first half, growth in call traffic with China slowed to 21 per cent compared with the 30 per cent of

recent years. The unexpected slow-down is unlikely to be temporary. It highlights the risk and volatility associated with China, rather than just the opportunities. That Chinese growth rates have slipped does not obscure the enormous potential of the Chinese market, which Hongkong Telecom is well placed to exploit. But yesterday's figures will rightly serve to puncture the somewhat unreflecting euphoria which followed last month's announcement of a planned \$300m direct investment in the

country. Hongkong Telecom is under pressure in other areas of its international business and will shortly face intensified competition in its domestic market as well. The company may be well-placed and well-managed but the

#### Thames Water

The City's immediate response to Thames Water's higher than expected interim dividend was to mark up the whole sector. This was based on the assumption that, unless Thames' 11 per cent increase attracted too much political flak, the rest of the herd would follow its lead. One snag with this argument is that Thames is partly catching up after last year's unusually low rise to reflect the poor performance of its non-core business increase over two years was only 18 per cent

per cent.

Mora importantly, the Thames increase is entirely backward-looking. The company stressed that it should be seen in the context of the very profitable final year of the old regulatory regime and not as a pointer to prospects in the much tougher five years to come.

The new price caps will mean very modest revenue growth after inflation Though Thames can cut operating costs further, a steadily rising tax rate means it will be hard to raise earnings much faster than inflation, Significant real dividend increases will therefore have to come from reducing earnings cover. Thames could increase its payout by nearly half and still cover it twice. But the company is unlikely to go that far. Annual real growth of 4 per cent over the next five years is about as much as can be expected. Given the better dividend prospects elsewhere and the political risks to water companies if Labour wins the next election, s 30 per cent yield premium to the market is not over gener-

# **BP** spurred by petroleum demand

Share price (pence)

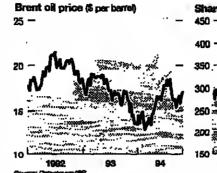

British Petroleum yesterday said demand for petroleum products was growing faster than expected because of economic recoveries in key regions, including the US, Europe and south-east Asia.

BP executives in London said higher sales volumes were one of the main factors behind the company's strong third quarter quarter performance. Replacement cost profits of £415m (\$655m) were 23 per cent up on the previ-ous quarter and the same period last year.

Mr David Simon, chief executive, said oil production in the first nine months of the year was up 4 per cent, while natural gas volumes showed a 20 per cent increase. Chemical volumes were up 10 per cent. "The growth in volumes was better than predicted," he said. "There is a buoyancy on the demand side that is most encouraging."

Japan was the only major country where increased demand failed to appear, according to Mr

## DnB signals end of banking crisis with

dividend forecast By Karen Fossii in Oslo

Den norske Bank, Norway's largest commercial bank, yesterday consigned the country's four-year banking crisis to history. The bank said it expected to pay its first dividend since its

formation from a merger in 1990. Nine-month pre-tax profits almost trebled to nearly NKr2bn (\$307m) from NKr720m last year. The bank benefited from a sharp improvement in non-performing loans and a reversal in loan losses, with a marked domestic improvement.

The volume of non-performing losns fell by NKr3bn to NKr7.2bn from the start of the year with one-third of the decline occurring in the third

quarter.
"In light of this performance, the bank expects to be in a position to declare a dividend for 1994," said Mr Finn Hvist

group managing director. The bank's continued improvement was curbed bowever by a reduction in gains on sbares bonds and foreign currency fol-lowing rising domestic interest rates. Last year the bank benefited greatly from declining

Net interest income declined by NKr368m to NKr3.6bn but the reduction of non-performing and donhtful loans cut interest expenses by NKr268m.

Other operating income - from securities, bonds, foreign exchange and other financial instruments - fell by NKr987m to NKr1.7hn, Nevertheless, the bank's result was helped by a gain of NKr147m with lower than expected loan losses. This compared with Ioan losses of NKr2.5bn in the same period last

The bank said the volume of doubtful loans had been cut by NKrIbn since the end of 1993. "It is gratifying that our efforts in following up problem commitments have produced results," Mr Hvistendahl said.

DnB said a NKr37m rise to expens partly reflected an increase in statutory guarantee fund contributions but that personnel expenses were cut by NKr48m to NKr1.65bn. The bank's ratio of deposits to lending rose to 68.8 per cent from 66.1 per cent.

## Stockholm halts sale of energy stake

By Christopher Brown-Humes in Stocidolm and Richard Wolffe

The newly-elected Stockholm city council yesterday effectively vetoed plans to sell a 17.3 per cent stake in Stockholm Energi, Sweden's third-largest anergy producer, to Yorkshire Electricity, the UK utility.

The SKr1.8bn (\$248m) deal appears to have fallen victim to horsetrading on the council, which owns Stockholm Energi. The swing to the left in the Stockholm elections reflected a broader national trend which carried the Social Democrats back to power last September with a more critical policy on privatisation. The municipal elections left the Social Democrats needing support from two parties opposed to the agreement. When the deal was agreed in June, a centre-right coalition was in control. It is understood that Yorkshire

will receive around SKr200m in compensation.

"This is purely a political deci-sion," said Mr Inge Telander, a spokesman for Stockholm Energi. He said the group, which produces around 13 terawatt hours (twh) of electricity a year, had needed a partner to bolster its halance sheet after its SKr2bn purchase of hydropower generating facilities in June 1993. A deal with Yorkshire would have strengthened its equity-to-assets ratio from 11 per cent to more than 25 per cent.

The company was also seeking expertise from Yorkshire ahead of a planned deregulation of the Swedish electricity market. However, this deregulation was last week postponed by the new Social Democratic government. A proposal to list Stockholm Energi has also been abandoned.

"We will have to discuss with our owner other sources of finance." said Mr Telander.

Stockholm Energi reported a SKr217m profit last year on sales of SKr6bn. Half its ontput is generated by nuclear power and 35 per cent by bydro-electric power. Election changes have also cast

uncertainty over Electricité de France's plans to buy a 9 per cent voting stake in Sydkraft, Sweden's second-largest energy group, from three municipalities

Mr Malcoim Chatwin, York shire's chief executive, said: "We are obviously disappointed that the new political regime in Stockholm does not wish to go ahead with the agreement that was made with the former regime."

# **UK** water stocks rise as Thames lifts payout 11%

By Peggy Hollinger in London

A surprise increase in the interim payout at Thames Water pushed most stocks in the sector higher in London yesterday as the market upgraded dividend expectations

Thames kicked off the sector's interim season with an 11 per cent increase in the interim dividend to 8.2p, against expectations of an 8 per cent rise. Water shares rose 2 per cent in a falling market. Thames, however closed 1/2 p down at 5311/2p. Analysts said Thames's "sur-

prisingly generous" action could prompt other water companies to follow suit, assuming it did not spark an adverse political reaction. "We are expecting companies to show earnings improvement of 10 per cent overall. one. "If the others follow Thames's line they could deliver 10 per cent dividend growth quite

However, the water sector's critics lined up to attack the increase. "It just confirms cus-

tomers' views that the original price controls allowed companies and shareholders to benefit more than consumers," said the National Consumer Council Thames justified the rise, say-

ing it had achieved 11 per cent underlying earnings growth to 36.8p and enjoyed an exceptionally good first half. Pre-tax profits rose 11 per cent to £151m (\$239m), excluding last year's £25m exceptional charge for rationalisation and losses on contracts. Turnover was 6 per cent ahead at £572m.

Sir Robert Clarke, chairman, was confident of a good outcome for the rest of the year, although he would not be drawn on the dividend outlook. He warned investors not to

expect such a generous dividend under the new "Life is going to be tougher," he said. "To expect increases of 11 per cent would not, perhaps, be sensible."

Thames's non-core international businesses - Which had been responsible for the unex-

#### increased losses from £2.6m to £6.6m in the first half, excluding last year's charges. Sir Robert stressed that

# Stock markets face younger rivals

stock markets has greeted a largely unpredicted recovery in the econotal Europe this

German economy, for instance, was widely expected to grow by less than 1 per cent - by 0.8 per cent, according to the OECD last December - hnt recently the main economic institutes have raised thair consensus GDP growth forecast to 2 per cent and the out-turn is likely to be higher still. But the German stock market has fallen 11 per cent in 1994 so far, dominated by sharply rising bond yields and the fear that short-term interest rates will bottom out sooner than expected. There are similar patterns in France, where the index is down 15 per cent, and election uncer-

tainties still lie ahead. In the UK, which is perhaps 18 months ahead in the economic cycle, and where the GDP growth rate has accelerated closer to 4 per cent, the cantion in the emity market has been rather more predictable. Short-term interest rates, after all, have passed the cyclical trough.

These cyclical influences on European share prices are the subject of an intriguing analysis by Merrill Lynch's European strategy director Mike Young. The headline warning is that price-earnings ratios will collapse, to 10 or less. Given that average earnings per share in Germany and France may well double in 1994 and 1995, taken together, and may not peak until 1998, this will not be the disaster

it might sound like. But it implies a long, sideways-to-downwards struggle against cyclically adverse pressure According to Merrill Lynch, p/e

ratios in the main European markets will fall from a present range of 13 to 28 to a range of 6 to 12. The long trend towards rising p/es that lasted from about 1980 to 1993 is to be reversed. But the forecasts focus on the long-term trend and do not, says Mike Young, looking on the hright side, rule out the possibility that

The risk premium has dropped to an unusually, perhaps unsustainably low level in European markets

volatility could send share prices to new highs in passing.

The arguments are set out in terms of the theoretical relationships between the debt and equity markets. The expected risk-adjusted return on equities is equal to the expected fixed income return. But heroic judgments must be made about variables such as the real bond yield and dividend growth and the question of the equity risk pre-

This study manages to be bearish on all three counts. It cites evidence that the equity risk premium is sensitive to rising inflation, which is probably passing through a cyclical trough. Certainly the risk premium has recently dropped, in historical terms, to an unusually and perhaps unsustainably low level in European markets; and in the UK in particular it is likely to widen if pension funds raise their fixed income exposures to match the forthcoming minimum solvency standard. Real bond yields have already

risen sharply this year, and have certainly damaged share prices. Increasing demands for capital from developing countries will help keep real yields high (the figure is now 4.9 per cent in Germany, for instance) and maybe push them up a further 50 basis points, says the study. As for dividend growth, it is assumed that as the cycle matures, expectations here will decline during the next three to four years.

Merrill's analysis fits into a

broad global framework: the drift of capital from sluggish Europe to more dynamic regions, a con-(especially if European governments continue to borrow heavily) and a rising equity risk premium as risk capital, in particular, is drawn away by lugh returns in emerging economies.

But are the conclusious too gloomy? There are some more positive possibilities, including the growth of institutions in continental Europe such as mutual funds and pension funds that might increase the domestic demand for equities and hold the risk premium down. Moreover, the routine contrarianism of global investors (buy in a recession, is their rule of thumb, and sell on a recovery) may leave some mid-cycle opportunities unexploited.

Economic growth, investors may rediscover, can actually be a good thing, especially when it is

#### This ackerdisement appears as a matter of record only

#### Roche to shed R&D staff

Roche, the Swisa pharma-ceuticals group, said it would cut 1,930 jobs in its global research and development sector, of which 350 would be lost in Basle, agencies report.

The group's head of R&D, Mr Jürgen Drews, added that the number of research projects at Roche and Syntex, the US group acquired by Roche earlier this year, would be cut to 70 from the more than 90 cur-

rently in place.
It said the restructuring of tha R&D operations will be largely completed in early

Roche has already announced that it was planning to cut 5,000 jobs worldwide following its acquisition

## bank chief takes early retirement

By Hillary Barnes In Copenhagen

Mr Borge Munk Ebbesen, chief executive at Biknben, Denmark's third-largest bank, is resigning next year, 18 months ahead of his normal retirement date.

He will be replaced by Mr Henrik Thufason, currently managing director of tha savings bank's data centre.

Mr Ebbesen's resignation statement coincided with the publication of e three-year development plan for Bikuben. the country's premier savings

He sald: "I have decided to leave Bikuben so that the future management can be thare throughout the life of

The bank aims to increase its core earnings (operating earnings excluding unrealised gains and losses on securities) to DKr750m (\$127.1m) in 1997. This compares with a DKr1.2bn loss in 1993, when tha hank carried lose provisions of DKr2.69bn, about 4.7 per cent of ontstanding loans and

guarantees. In the first half of this year. a cnt in provisions to DKr532m from DKr1.68bn in 1993 enabled the bank to report core banking profits of DKr229m, hnt heavy unrealised losses on the bond and share portfolio meant it reported a first-half net loss of

DKr472m. The development plan, worked ont with the assistance of McKinsey & Co, management consultants, outlines e reduction in costs by cutting staff by 600 people to 4,300 and the number of branches by 40 to 260 by

The group will try to reduce its axposura to riak in securities end currency trading and to improve the quality of its assets, cutting bad loss provisions to e maximum of 1.25 per cent of

loans and guarantees by 1997. The bank's capital adequacy ratio et the end of June was 9.97 per cent, well above the Danish minimum legal level of

# Aga pleases market with solid nine-month result

By Christopher Brown-Humes

Shares in Aga jumped 8 per cent yesterday after the Swedish industrial gas group announced a stronger-thanexpected 23 per cent increase in profits in the first nine months

Profits after financial items amounted to SKri.18bn (\$163.9m), compared with SKr964m in the same 1993 period, after sales increased 10 per cent to SKr9.21bn.

The company upgraded its full-year forecast, saying it expected profits to be 20 per zil, which brought good third-

cent higher than last year's SKri.36bn. The group's A shares rose SKr5.5 to close at The figures have been

adjusted to exclude Frigoscandia, the world's leading cold storage chain which Aga demerged earlier this year to concentrate on its core busi-

At the opsrating level, income rose 15 per cent to SKr1.2bn due to sconomic improvement, rising demand for industrial gases, and rationalisation. Aga benefited from economic stabilisation in Bra-

quarter earnings for its unit

The company saw a reduction in net financial costs to SKr162m from SKr195m while its 34 per cent share of income from Gullspangs, the power company, rose to SKr132m from SKr113m.

The gronp's third-quarter performance was much stronger than a year ago, with income after financial items climbing 56 par cent to SKr398m sven though sales were only 7 per cent higher at

Investments in new plant and equipment jumped to

months from SKr980m in the same 1993 period. The biggest Finland, Norway, Germany, Chile and Mexico.

## Sales growth helps turnround at DSM

By Ronald van de Krol

Strong demand fuelled by European economic recovery enabled DSM, the Dutch chemicals group, to stage a turnround to a net profit of Fl 114m (\$67.4m) in the third quarter, from a net loss of Fl 52m in the same period of 1993.

The sharp improvement was caused mainly by a 13 per cent rise in sales volumes, particu-larly for polymers and caprolactam, a raw material used to

Fl 2.15bn from Fl 1.90bn. Selling prices rose by an average 2 per cent, but this was offset hy the negative effects of divestments and by lower exchange rates, particularly for the dollar.

The buoyant demand for polymers and other DSM products kept the group's plants operating at high utilisation rates, the company said. The unusually good results

in the third quarter, which is traditionally a weak period because of the summer holidays and slacker production at DSM's industrial customers, took net profit for the first nine months of the year to This compares with a net

loss of F142m a year earlier. Nine-month turnover was up 8.7 per cent at Fl 6.63bn from nearly Fl 6.1hn in the first quarters of 1993. The result was in line with

forecasts by analysts, who had predicted a net result above FI 100m for the quarter. DSM forecast that sales volthe final quarter, while selling prices and margins should also be higher on everage than in the third quarter.
This is expected to lead to e

further increase in fourth-quarter net profit, before extraordinary Items, compared with the third quarter, in spite of the prospect of significant maintenance Shutdowns.

Mr Simon de Bree, chairman, said the lower dollar trend was a cause for concern, but added this was not expected to have any significant negative effect. umes would remain strong in in the short term.

## Profits setback for Hafslund Nycomed

By Karen Fossii in Oslo

Hafslund Nycomed, the Norwegian group best known for its radiology products, saw nine-month pre-tax profits slip to NKr1.01bn (\$155.3m) from NKri.18bn. The decline was due to reversals in the securities portfolio and higher inter-

Group sales, including royalties, rose to NKr5.3bn from NKr4.7bn while operating profit wes unchenged at

Net financial items during the period were a charge of NKr132m, against incoma of NKr35m last year. interest expenses shot up to

NKr105m from NKr63m but foreign currency losses were cut to NKr34m from NKr50m. The group suffered losses on securities of NKr8m, compared with gains of NKr153m last

Nycomed Imaging's sales slipped to NKr1.89bn from NKr1.92bn with oparating profit declining to NKr1.15bn from NKr1.2bn due to increased competition and pressure on prices.

Nycomed Pharma improved side Germany. sales to NKr2.5bn from NKr23bn. Its operating profit rose to NKr467m from NKr369m on the back of posttive developments in the Norindia. dic and Benelux markets.

## Siemens plans \$3.5bn investment in Asia

the German include power generation, tele-Siemens. industrial group, plans to invest more than \$3.5bn in infrastructure projects in the Asia-Pacific region by 2000, Renter reports from Singe-

There is an enormous need for infrastructure goods in the [Asia-Pacific] region," Mr Heinrich von Pierer, president and chief executive, said after the company's first corporate executive committee meeting out-

Ha said more than \$1bn of the planned investment would be spent in China, and between \$500m and \$1bn invested in

proposed projects

communications, transport systems, industrial eutomation and medical engineering. Mr von Pierer said prelimi-

nary figures for the fiscal year to end-September 1994 showed the Asia-Pacific region contributed almost \$7bn in new orders and \$5bn in sales. "This marks e 10 per cent increase over the previous year. "While continuing to expand

in our home market of Europe and in the Americas, we will consequently develop the Asia Pecific region as our third regional pillar," he said. He said the group aimed to

a halts work more than double business volume in the area by 2000. :40d-clot dru2

By Richard Waters in New York

Cigna, the US insurer, is withdrawing from the reinsurance business as part of an attempt to turn round its lossmaking property/casualty insurance operations.
With premiums of \$507m

last year, Cigna was among the top 30 reinsurers world-

The company is selling its international reinsprance business, which generated premiums of \$270m in 1993; transfering its US agricultural insurance operations, with \$100m of premiums, to its domestic property/casualty insurer, and closing the rest of the US reinsurance operations, which had premiums of \$150m.

A STATE OF THE STA its departure from the business echoes moves by nther US insurers to reduce their exposure to property/casualty losses in the wake of big catastrophe and pollutinn claims. Prindential Insurance announced plans last year to sell its own reinsurance company, Prudential Re.

Cigna, which does not pub-lish separate results for its loss-making reinsurance business, said its overall property/ casualty insurance operations, which include reinsurance, lost \$69m in the third quarter and \$216m in the nine months

The company closed down its UK reinsurance business two years ago, but continued to take run-off losses on this business of \$10m last year. Cigna is selling its reinsurance husiness in Europe, sonth-east Asia and Latin America to St Paul, and its business in Japan and Korea

to Employers Re. The company reported overall third-quarter net income of \$123m, or \$1.70 a share, compared with a loss of \$94m, or \$1.31 a share, e year ago. The latest figures reflect a \$9m charge and \$26m of additional reserves to reflect the withdrawal from reinsurance,

#### Biogen halts work on blood-clot drug

By Frank McGurty by New York

Biogen, the US geneticengineering concern, said it was stopping development of one of its two most promising experimental drugs.

The decision represents a the company's efforts to become a fully integrated

drug manufacturer. The company said it had decided it would no longer pursue efforts to market an anticoagulant known as Hirulog, which is made from a chemical produced by leeches. Biogen, which is based in Cambridge, Massachusetts, said it would take e \$25m pretax charge in the third quarter to cover expenses related to

## TWA cuts net loss to \$8m in term

By Richard Tomkins in New York

Trans World Airlines, the US airline struggling to avert a financial crisis, yesterday reported that cost-cutting had enabled it to reduce net losses in its third quarter to \$8m from \$61.7m.

However, Mr Robert Peiser, chief financial officer, said it was still "crucial" that the company should win approval for the sweeping financial restructuring plan that it put to creditors last month.

\$800m of the company's \$1.8bn worth of debt for new equity. If the rescue plan succeeds, TWA believes it will be able to survive the lean winter months

and return to profitability next

However, many creditors believe they would get a poor deal under the restructuring plan and are threatening to oppose it

If the plan falls, TWA will quickly run out of cash and will almost certainly have to file for some form of bankruptcy protection again.

#### **GM** to change AGM rules to quell hecklers

By Richard Tomkins

General Motors of the US, the world's biggest industrial company, is to make drastic changes in the way it conducts geographic coverage and pro-vide facilities for incineration annual meetings in an attempt to quell the disruption caused by dissident shareholders and wide-ranging reorganisation designed to sharpen its focus

It plans to limit the amount of speaking time allotted to each shareholder and focus the annual meeting on formal husiness such as the election of directors end votes on company and stockholder proposals.

GM, which has recently held its annual meetings in cities where it has plants, will also eliminate ancillary events such as shareholder hunches, plant tours and test drives of new GM cars and trucks.

Mr John Smale, GM chairman, said the de-emphasis of the annual meeting would be accompanied by the creation of new regional forums that would be held in 13 cities between now and March next year. These forums would coincide with local motor shows and would be ettended by GM executives who would be on hand to answer shareholders' questions.

Mr Smale said surveys showed that GM shareholders felt the company's annual meetings were not an effective method of communicating with

## Sharp advance at Quebecor in third quarter

Quebecor. Quebecor expanding Canadian-Share price (CS) 50 | N 18 ---Nov 93 1994 Source: FT Graphite

based international commercial printing. publishing and forest products group, posted sharp gain in third quarter earnings and is raising its dividend by 18 per cent, writes Robert Gibbens in Mnntreal. Third-quarter net profit was C\$27.2m (US\$20.1m), or 39 cents a share, up almost 56 per cent from C\$17.5m, or 27 cents, a year earlier on reve-

nues of C\$1.07bn, up 35 per cent. Nine-months net profit was C\$70.3m, or C\$1.04, before special items, against C\$52.6m, or 77 cents, on revenues of C\$2.8bn, up 26.5 per

Quebecor, controlled by the Peladeau family of Montreal, is North America's second-biggest commercial printer and is expanding in Europe and Asia. It also owns e Canadian daily paper, plus weeklies and magazines. Its newsprint affiliate is one of North America's lowest-cost producers.

#### SHL Systemhouse returns to the black

SHL Systemhouse, e fast-growing Canadianhased computer systems and outsourcing group, posted a profit last year but acknowledges it must improve margins and raise efficiency, writes Robert Gibbens.

Net profit for the year ended August 31 was C\$17.5m (US\$12.93m), or 29 cents a share, against a loss of C\$145m, or C\$3.09, including e C\$135m restructuring charge a year earlier. Gross revenues rose 27 per cent to C\$1.2bm, with strong growth in service contracts.

Fourth-quarter profit was C\$1.5m, or 2 cents s share, against a loss of C\$149m, or C\$2.92, including the special charge. Revenues were C\$296m, up 32 per cent.

The company's order backlog at August 31 was C\$2.1bn, up from C\$1.5bn a year earlier.

#### Visa Int'l joins China 'Golden Card' venture

Visa International yesterday signed e consultancy agreement with Jitong Communications to help extend China's "Golden Card" national navments and credit-clearing system, writes Tony Walker in Beijing.

Mr Lindsay Pyne, president of Visa Interna-

tional Asia Pacific, said that the two sides would collaborate in speeding the establish-

ment of a national payments infrastructure. Visa would use its relationship with seven of China's specialised banks to assist Jitong, a wholly-owned subsidiary of the ministry of electronics industry, to promote its Golden

Card. Officials said Visa would not take an equity stake in the project at this stage, but it would "assist in introducing advanced technology and software for identifying counterfeit activities and for solving problems in linking

regional and international networks".

Jitong launched its Golden Card pilot project last year. Other participants include IBM and the China Great Wall Computer Group.

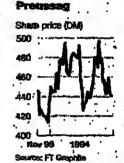

#### Terms for Malaysian timber sale accepted

The vendors of two large timber companies to be acquired by Malaysia's Berjaya Textiles have accepted the revised terms imposed by the Securities Commission on the proposed sale, a Berjaya Textiles statement said, Renter reports from Kuala Lumpur.

Berjaya Textiles is buying Sarawak-based Jaya Tiasa Plywood and Rimbunan Hijau Plywood with shares, which would result in a reverse takeover of Berjaya Textiles hy Malay-sian timber tycoon Mr Tiong Hiew King and his associates. The commission, in approving the deal earlier, had slashed the price tag of both companies

It cut the proposed price of M\$1.04bn (US\$406m) for the acquisition of Jaya Tiasa to M\$730m, while the price for Rimbunan Hijan was reduced to M\$107m from M\$143.69m.

#### Preussag profits 'clearly bigher'

Group profit at Preus sag, the German industrial group, was "clearly higher" in the fiscal year ended Sep-tember 30 than in the previous fiscal year, Mr Michael Frenzel chairman, said yester-day, AP-DJ reports from Berlin. He said group order inflows had risen by "around 4 per cent", and that order hecklogs as of

September 30 were 12 per cent higher than those of a year earlier. He attributed the gain in orders to growth at Preussag's shipbuilding and plant-engineering

He added that restructuring at the group's troubled Hagenuk telecommunications unit should be completed by the end of fiscal

## Study reveals larger PC market

the matter, although neither and so do not fall under

By Louise Kehoe in San Francisco .

The world personal computer market is significantly larger than previously estimated, according to a new market study. The latest PC product announcements also point to rapid expansion in the con-

Corp, a leading PC market research firm, now estimates that 43.8m PCs were shipped in 1993, an incresse of 6.9m units over its previous estimates. CII'a forecast for 1994 sales is 49.4m units, a rise of 7.5m. Small manufacturers, who typically build PCs to order. have been largely overlooked

sumer segment of the business. Computer Intelligence Info-

in prior estimates, CII said. "The so-called clone-shops

are the forgotten many and represent an important role in the distribution of PC systems. Our data show that the majority [59 per cent] of computer dealers and retail computer stores carry non-branded PCs," said Mr Dan Ness, director of microsystems research at CIL

Intel the leading supplier of microprocessors to the PC industry, said the new CII numbers were a more accurate reflection of the overall size of the PC market. Another important PC mar-

ket trend is the growth of consumer sales. About one-third of all PC sales in the US last year were to consumers or businesses with five or fewer employees, according to market researchers. This year, the consumer segment is expected to be closer to 50 per cent of all US PC sales.

Digital Equipment yesterday became the latest PC manufacturer to focus on this highgrowth segment, with the introduction of new models aimed at the US retail market. Taking an epproach similar

to that of market leaders Compaq, Packard Bell and IBM, Digital has developed PCs pre-loaded with software that enables buyers to set up the computer in 15 minutes or less. In a separate PC industry development that promises broader availability of software

applications, IBM and Hughes Network Systems yesterday announced a partnership to deliver software to retailers and corporate customers via satellite transmission.

## Pfizer to buy cardiology equipment manufacturer

By Richard Waters

Pfizer, the US pharmaceuticals group, has announced that it is buying a specialist manufacturer of hospital cardiology equipment in an all-stock deal valued at \$158m. The purchase will give Pfizer

a dominant position in the market for such equipment, and reflects the consolidation under way in the US healthcare sector. Faced with pressure from

hospitals and other buyers for lower prices, most healthcare companies have come to focus on market share as their primary short-term goal. Namic USA, based in Glen

Falls, New York, reported after-tax profits of \$5m on sales of \$57m in its last fiscal year, which ended on May 31.

The company claims to hold around two-thirds of the US market for equipment used in fluid administration, waste containment and pressure monitoring during angio-

Namic said it also accounts for about 20 per cent of the European market for this equipment and that the acquisition by Pfizer would increase its ability to expand in European markets.

Pfizer's own subsidiary which makes cardiology equipment. Schneider, accounted for just under 15 per cent of tha \$1hn sales generated by its hospital supplies operations in

# **Profits at HK Telecom** advance 15% at halfway

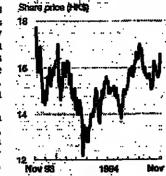

By Louise Lucas in Hong Kong Hong Kong Telecom

Hong Kong Telecom, which is 57.5 per cent owned by Cable & Wireless of the UK, yesterday met market expectations with a 15 per cent rise in net profits to HK\$4.19bn (US\$542m) for the six months to September 30. This compares with HK\$3.65bn at the halfway stage last year. Earnings were struck on an

operating profit of HK\$4.75bn, up 14 per cent from HK\$4.17bn the previous year. Turnover rose 11 per cent to HK\$13.29bn. from HK311.94bn, with the biggest increases registered by equipment sales and rentals. International telephona services, which account for 62 per cent of turnover, improved 9 per cent to HK\$8.24bn

The deceleration in international traffic growth was largely brought about by a slowdown in China traffic, which up until this year had been growing at a rate of more than 30 per cent annually. This bas slowed to 21 per cent, which the company attributes to the macroeconomic control easures and low telephone line penetration, which now stands at one telephone for

every 30 people. However, analysts ques-

austerity measures, which were in place during the previ-ous financial year, could have played in slowing telephone calls. China accounts for almost half of international traffic, and about one-third of international revenues.

Source: FT Graphite

Earnings per share grew 15 per cent to 37.6 cents from 32.8 cents: the dividend rose to 26.9 cents from 23.4 cents.

Hongkong Telecom also bore the brunt of reduced international call charges, which saw the price of calls on the most important routes to the US, Australia, Canada and the UK fall by 10 per cent. These tioned how much of a role the reductions, twinned with an

cost Hongkong Telecom about HK\$300m over the last six months, a figure which is expected to reach HK\$420m for the full year.

Mr Linus Cheung, chief execntive, said strong growth in mobile operations – in which Hongkong Telecom has a 34 per cent market share - and tight cost controls faciled the growth in interim profits.

over future growth, as earnings driven by cost control may prove more difficult to sustain. Analysts believe salaries, the second largest component of costs and up 8 per cent this interim, may be harder to contain once competition starts on domestic fixed lines next July.

The biggest percentage sav-ing was made on the management fees payable to Cable & Wireless. These fell 38 per cent to HK\$108m following a revised basis for payment: Hongkong Telecom now pays according to work done on its behalf by Cable & Wireless, rather than a revenue-related fee.

Hongkong Telecom expects returns on its China joint ventures, inveiled last month, by late 1995 to early 1996.

## **Amcor acquires RIG Rentsch**

By Nilda Tait in Sydney ,

Amcor, the Australian packaging and paper group, is hoping to almost double its European sales with the A\$134m (US\$99m) purchase of RIG Rentsch, a publicly-listed folding carton packaging business based in Switzerland.

for the Swiss company yesterday, offering SFr2,550 (US\$2,024) per bearer share, and SFr510 per registered share. Rentsch's principal shareholders, with about 72.5 per cent of the voting capital, have accepted the terms, and public shareholders, who hold the remaining 27.5 per cent, will be presented with an idenRentsch has annual sales of around A\$300m, of which about 60 per cent come from tobacco packaging. By coincidence, Amcor'a directors faced questioning over the ethics of packaging for the cigarette industry at last week's annual

Mr Athol Lapthorne, chairman, said Amcor had considered the matter - the Rentsch deal had clearly not yet been disclosed - but decided that it was in shareholders' interests that the company should remain in this business. His remarks were applauded by the several hundred sharehold-

nine manufacturing facilities, all but one of which produce

folding cartons. Its plants are spread across Europe and include sites in the UK. France, Germany, Spain, Portugal, Poland and Switzerland.

Mr Chris Nixon, managing director of Amcor's containers packaging division, said the company expected Rentsch to post earnings before interest and tax of about A\$20m in the Amoor has been pursuing an

aggressive expansion strategy recently, building up interests in North America, Europe and the Asia-Pacific region. However, this is the first time it has moved into container packaging in Europe. Amcor's European sales were A\$367m in the year to end-June, out of a group figure of A\$5.5hn.

## Sumitomo Bank to set up securities brokerage

By Gerard Baker

Sumitomo Bank, the world's largest lender, will join the country's other leading banks later this week in establishing a securities brokerage.

The bank announced yester day that it had received This raises question marks approval from Japan's ministry of finance for the whollyowned subsidiary to begin trading on November 24. Last month, the MoF sanc-

tioned plans for the other banks to establish their broking units, but withheld approval from Sumitomo because of a disagreement with the bank over the proposed name of its subsidiary. Sumitomo had wanted to call it Sumigin, an abbrevia-tion of the bank's Japanese

But the ministry objected to the use of the Chinese character "gin" in the title - a character that forms part of the word for "bank".

The anthorities intend to aintain distinctions between the banks and their brokerage operations, and objected to the transparent similarity between the name of the bank and its subsidiary. Sumitomo has now agreed to call the company Sumitomo Capital

Securities.
The banks' long-awaited arrival in the brokerage business is likely to cause significant upbeaval in Japan's financial sector.

In order to protect the existing brokers, the activities of the banks' subsidiaries will, for the time being, be tightly circumscribed. They will not immediately be allowed to trade equities - the principal market - but will be confined to the growing business of cor-porate bond issuance. Nevertheless, companies like

Sumitomo Capital Securities, backed with substantial capital from their parents, are likely to make large inroads into the market share of the brokers, who are already hardpressed by the chronic weakness in Japan's equity market.

# Setbacks at Japanese oil distributors

By Emiko Terazono

Japan's leading oil distributors saw declines in sales and oper ating profits Oil for the first

half to September, due to the the time lag in transferring crude oil procurement costs to wholesale prices.

Nippon Oil, the industry eader, saw non-consolidated interim recurring profits before extraordinary items and

tax - decline 31.4 per cent to Y13.3bn (\$137m) on a 0.7 per cent fall in sales to Y868.9bn. Operating profits plunged 42.9 per cent to Y5.9bn and after tax profits declined 24.7

per cent to Y6.8bn. The company said procurement costs rose before they could be factored into its wholesale prices.

It also failed to benefit from the 40.8 per cent rise in fuel oil sales triggered by demand from an increase in electric power generation due to the

For tha full year to next March, the company expects the rise in crude oil prices to continue to affect its profitability, in spite of an expected rise in sales volume.

Unconsolidated recurring profits are forecast to fall 21.9 per cent to Y33bn on a 1.3 per cent increase in sales to Y1,830bn.

Cosmo Oil said sales fell 1.8 per cent to Y678.8bn and operating profits declined 12.4 per cent to Y14.5bn. Current earnings, however, rose 4.2 per cent tion efforts and an improved # halance on its financial items. After-tax profits rose 1.9 per cent to Y5.3bn.

The company said procurement costs rose by Y5.2bn. In spite of a rise in other costs, the company refrained from increasing wholesale prices in fear of further dampening

For the full year to next March, Cosmo expects a 0.6 per cent rise in recurring profits to Y39bn on a 0.1 per cent increase in sales to

#### for Ziff unit **By Michiyo Nakamoto** in Tokyo Softbank, a Japanese computer

software company, has agreed to acquire the trade-show business of Ziff Communications, the US publishing group, for more than \$202m.

The agreement came after Softbank failed to acquire the publishing business of Ziff-Davis, which was sold to Forstmann Little, a New York investment group, for \$1.4bn.
The trade-show business of

Ziff runs exhibitions of infor mation network-related software and equipment, and had sales of about \$90m this year, the Japanese company said. Ziff operates the world's largest trade show on network

computing.

The addition of Ziff's trade show operations will lift Softbank's involvement in the trade show business, and add value to its network-related operations which have been growing strongly in recent years, the company said. It will also help it to expand operations in the US.

The acquisition, which Soft-bank intends to finance with its own funds, is not expected to affect the Japanese company's results in the year to next March, the company said. Softbank is a fast-growing

7. ....

US Treasury prices fell across the maturity range yesterday morning following a stronger than expected purchasing managers' report, which raised fears that the Federal Reserve would raisa interest rates sooner, rather than later.

By midday, the benchmark 30-year government bond was down % at 984, yielding 8.043 per cent. At the short end of the market, the two-year note was down % at 99聲, to yield 6,909 per cent.

Prices weakened from the start after the National Association of Purchasing Management reported that its index of business activity rose to 59.7 per cent in October, from 58.2 per cent in September. Analysts had been expecting next open market committee

the NAPM index to rise to 59.0

per cent. The market was particularly disturbed by the jump in the NAPM's prices index, from 77.1 per cent to 79.9 per cent, an indication that inflationary pressures may be building up in the manufacturing sector.

Inflation-sensitive investors were not reassured by the comments of Mr Ralph Kauffman, chairman of the NAPM, who said that companies were reporting difficulties in passing on higher materials prices to consumers.

The data sparked immediate selling of bonds as analysts judged that the NAPM figures only increased the likelihood that the Fed would put up interest rates at the next available opportunity. Most analysts still believe

that the Fed will wait until its

meeting on November 15 before tightening monetary policy, but the NAPM numbers beightened speculation over

how large any rate increase Although a few analysts said the Fed, in the wake of the

NAPM report, might raise

#### GOVERNMENT **BONDS**

rates by as much as 100 basis points (bringing the target on the Fed funds rate to 5% per cent), the consensus on Wall Street remained that any increase would more likely be of 50 basis points.

Later in the morning, prices weakened further amid reports of futures-related selling, and some selling by dealers hedging against a fall in prices of mortgage-backed securities.

closed for All Saints' holiday, activity in most European government bond markets was subdned, with prices rangetrading in thin volume.

■ UK gilts proved the main exception, rallying sharply after the Bank of England's quarterly inflation report calmed fears of a near-tarm monetary tightening.

In recent days, market participants had grown increas ingly nervous about the possibility that Mr Eddie George, the governor of the Bank of England, and Mr Kenneth Clarke, chancellor of the exchequer, might decide on another base rate increase at their meeting today. However, after the report some dealers said they now expect the next rate rise in early 1995.

trading to around 89.11, unchanged on the day. Bunds are likely to make little headway this week, with fresh 10-year government supply looming early next week.

■ Swedish bonds weakened amid jitters ahead of today's budget statement by Mr Goran Persson, the finance minister. The yield on the government bond due 2005 rose 11 hasis points to 11.09 per cent.

Mr Persson is widely expected to detail the SKr61bn in budget cuts which the Social Democrats announced during the election campaign.

However, some dealers were hoping he would announce additional measures to tackle Sweden's budget deficit after Moody's, the rating agency, last week placed its Aa2 debt rating under review for possible downgrading.

هكذامن الدميل

By Conner Middelmann

All European government bond markets posted positive total returns in October with the exception of France, where bonds were plagued by preelection jitters, J.P. Morgan's monthly government bond index monitor shows.

Sweden was the best performing market, with a monthly return of 2.26 per cent in local currency terms. It was buoyed by hopes that the new government will take additional measures to cut the country's large budget deficit and signs - including a 20 basis point interest rate increase - that in the absence of fiscal tightening, the Riksbank will do its bit to slow the

level of economic activity. In Belgium, lower than expected inflation data and a staepening yield curve increased the market's attractiveness, the survey states. In Ireland, lower money market rates also provided the bond market with an improvement in funding costs.

"In both markets, funded spread trades over Germany became more attractive in October, thus leading to significant foreign inflows," the report states.

The Japanese market weakened on continuing economic recovery and the edging-up of sbort rates allowed by the Bank of Japan. The market posted local currency returns of minus 0.28 per cent.

In the US, continued signs of economic growth and a delay in further Fed tightening pushed yields higher, resulting in a minus 0.06 per cent total retura.

Meanwhile, Kemper Investment Management's monthly bond survey, which includes some of the smaller markets, found that Finnish bonds, with a return of 3.68 per cent, posted the strongest gains, followed by Sweden and Norway.

# Growth in rating agencies

By Richard Lapper

The number of credit rating

age in future issues.

#### serving emerging markets markets view credit ratings as an effective way of tackling problems of transparency in

agencies in emerging markets has grown rapidly in recent months, according to a new Financial Times quarterly directory published this week\*

The publication lists for the first time in one publication more than 3,000 ratings assigned to emerging market debt issues by 10 international and 20 local rating agencies, many of which have been formed in the last year. Several other local agencies are beginning operations and the directory plans to expand its cover-

political or country risks but this is the first time they have had access to local perceptions of the borrowers' credit risk." & Poor'a, Duff & Phelps and IBCA are active in providing technical support to the newer agencies

their jurisdictions," said Mr

Peter Elstob, editor. "Investors

# VSEL joins consortium Allied bidding for Devonport

Bernard Gray, Defence Correspondent

VSEL, the Barrow-based submarine maker being fought over by GEC and BAe, has joined the DML consortium bidding for Devouport dockyard, which is due to be privatised next year.

The enlarged consortium's initial hid for Devopport was submitted to the Ministry of Defence at noon on Monday, just before bidding closed. DML currently operates Devonport on a management con-

DML confirmed that VSEL had joined the group. DML has three shareholders - Weir, the pump-maker, BICC, the cable maker and Brown and Root, the US engineering company.

It is understood that the four memhars of the new consortium will each have a 25 per hid is successful. Both GEC and BAe are thought likely to maintain VSEL's place in the

The tie-up between Devoo-

Devonport will refit all the Royal Navy's nuclear submarines from 1997. A full refit involves replacing most of the internal parts and has much in common with their initial con-

A link between the two yards allows them to shift key personnel and manufacturing between refits and new submarine construction, depending on the workload.

Devonport has an annual turnover of about £260m with operating profits of ahout £12m. However, hids for the yard will take into eccount environmental liabilities at the site and the potential costs of further reductions in the work-

These liabilities are thought to he larger than the value of the company's potential earnings. As a result, negotiatioos will have to continue with the MoD to determina what liabilities come with the

The amount of money raised

port and VSEL comes because is likely to be very small. The DML hid is thought to be the only firm offer to have been

> GEC yesterday posted its offer document to VSEL's shareholders, recommending its £14 a share cash offer with e loan note alternative. GEC has also submitted evidence to the Office of Fair Trading arguing that its bid does not present competition difficulties.

> The OFT would normally rule on such a submission within 21 days. If the OFT clears GEC's hid, City observers think the electronics giant could have control of VSEL before the end of November.

GEC's document sava that the offer is at a 22.8 per cent premium to BAe's cash offer and a 14.4 per cent premium to its share offer. VSEL's board has voted to

hold an extraordinary meeting to change its articles of association to allow the GEC bid on the November 24. A similar meeting to authorise the BAe will be held on November

## BT international venture set for US telephone growth

By Andrew Adonis

Concert, the \$1bn joint venture between British Telecommunications and MCI, the second largest US long distance carrier, is set to gain permission from US regulators to engage in a new form of transatlantic telecoms competition.

The US Federal Communications Commission approval would allow Concert to offer multinational customers a leased lina telecoms service called "international aimple

This would open the way for Concert to provide multinational companies with cutprice transatlantic corporate and the state-owned telecoms

telephone networks, which is a principal aim of the joint venture in its hld to develop international telecoms business for BT and MCL

Until now the main focus of Concert has been international data services. It is starting to move into the higher-volume voice telephony market.

Concert is the cornerstone of the \$5.3hn (£3.35hn) allianca reen BT and MCI forged in mid-1993. It is in strong competition with two other international alliances - Worldsource, led by AT&T, the largest US operator and Atlas, a venture between Sprint, the third-largest US long-distance operator,

companies of France and Ger-

Concert has gained more than 30 corporate customers for advanced international services since its launch. Analysts regard the joint venture as ahead of its rivals in terms of service availability.

AT&T is set to gain a licence in the UK to offer similar services to those planned by Concert. Its Worldsource partnership includes leading national carriers in Europe and the Asia-Pacific region.

The agreements by Deutsche Telekom and France Telecom to take atakes in Sprint have yet to secure regulatory approval in the US and EU.

## Domecq to lift Spain Alecq stake

Allied Domecq. the drinks group, said it would lift its stake in Spain Alecq, owner of the Domecq group, from 73 to almost 100 per cent.

The share deal is the result of a put option granted to the Domecq family when Allied paid £739m for control of Pedro Domecq, the Spanish drinks producer, in March. Mr Ramon Mora-Figueroa,

part of the Domecq family, said the £280.4m option would be exercised by December 30. Mr Mora-Figueroa sits on Allied Domecq'a hoard with executive responsibility for

Allied said the option had been exercised considerably earlier than expected. The option enabled the family to sell its 27 per cent stake in Spain Alecq within six years of the acquisition.

Mr Tony Pratt, director of Allied Domecq corporate affairs, sald: "At the time, both parties thought it might be rather longer than this to exercise the put option. They have now chosen to do so and this is entirely due to their own circumstances.

The group said the price of the option was likely to be rednced because it included an element in US dollars. The final figure will not be announced until the option is

At the time of the Domeco acquisition, Allied claimed the deal made it the world'a second largest spirits producer. The group has since embarked on a series of disposals to con-

centrate on spirits and wines. Last week the group said it was negotiating the sale of its Dutch brewing aubsidiary to Interbrew of Belgium.

Last month it announced the £74.3m sale of 641 pnbs to Scottish Amicable, the Insurer, and the pension fund of Strathchyde Regional Council, Scotland's higgest local

#### Rexmore expands 22% to £838,000

Rexmore, the upholstery supplier, reported a 22 per cent increase in interim pretax profits from £688,000 to £838.000.

Turnover, for the period to October 1, was little changed at £15.3m compared with

Operating profits showed a 8 per cent improvement to £962.000 because of tight cost management, the directors said, while interest payments were elmost halved, from £219,000 to £124,000.

Earnings per share were 4.07p (4.44p) while the interim dividend is 1.3p (1p).

# Thames Water buoys up sector

Shareholders can expect generous pay-outs, writes Peggy Hollinger

his was always going to **Water sector** be a bumper year for Relative to the All-Share (FT-SE-À Indices) water companies, as they reap the benefits of costcutting and eojoy the final stage of geoerous price limits Yet, as Thames Water opened the sector's interim reporting season yesterday, it appeared this could be a bumper year for shareholders as

full year, have heightened even the most bullish pay-out expectations for the sector as a company, which has the strongest balance sheet and highest dividend cover, is widely expected to beat the dividend Previously, analysts had beeo looking for average dividend increases of about 8 per benchmark set by Thames.

Ironically, Thames appeared to have been the loser, only one of two companies whose shares actually fell on the day. While soma of this could have been due to cootinuing disappointment on the performance of non-core husinesses, there was also the very clear indication that 1994-95 was some-thing of an exceptional year.

There is good reason to be wary of taking this as a sign of things to come," said Mr Bill Dale, analyst with SG Warhurg, "with significant constraints re-emerging from next April" when the new pricing regime takes effect.

Other aspects of Thames' results are expected to echo through the interim reporting season, which continues with Anglian next week and ends with Wessex Water on Decem-

Water companies are expected to emphasise tight control of operating costs and lower

capital expenditure. "The water sector now has tha incentive and opportunity to outperform the deals set by

The knock-on effect of cutting costs is almost certainly going to mean further excep-tional charges for some companies. Welsh Water has already indicated charges of some £17m, with Yorkshire Water also likely to announce

Ofwat," said one analyst. "We

should see the first indications

that they will be able to do

South West Water, meanwhile, is forecast to provide about £2m for the costs of its appeal to the Monopolies and Mergers Commission over the price limits set by Ofwat. A further £2m charge is likely for job losses.

Diversification - or, rather, the failure of water companies to diversify successfully - will also be an issue. The water companies will he keep to emphasise the importance and performance of the utilitias operations, to draw attention away from the lack of excite-

ment in non-regulated busi-

Ndeport

Program North Contract

KB IFIMA N

VS6 100 100 (100)

Finally, water companies may well have to address the accounting treatment of infrastructure renewals in the first set of results after the summer

price review. Since flotetion, the water companies have been building np substantial provisions in their balance sheets to cover the costs of maintaining the pipe network. Yet it has become apparent that the initial annual index-linked charges may have been overly

By calculating lower annual charges, the regulator saw the water companies could achieve higher profits. "Now the ouestions are, what is the right level of annual charge and how should the cumulative position be treated?" said Mr Robert-Miller Bakewell, of NatWest Securities.

Given the amount of provisions accumulated hy many water companies – such as the £139.3m at Yorkshire Water – this is no insignificant issue. Mr Millar-Bakewell expects companies such as Yorkshire to credit the provision straight to shareholders' funds.

This brings us back to the view that shareholders are likely to get a good deal out of this set of results. In the longer term, however, investors should not ignore issues which are likely to overshadow the sector. Aside from the political risks presented by a possible change of government, there is the fundamental question of just how geared the water sector is to economic growth. "This sector, more than any other, has no real exposure to that," said Mr Dale.

## Marks to cut holding in French Connection

## **COMPANY NEWS:** UK

Employees to sell part of shareholding in placing before end of year

# Clydeport to float with £60m tag

By James Buxton, Scottish Correspondent

Clydeport Holdings, the privatised port operator on the river Clyde, is to come to the stock exchange via a placing before the end of the year. The flotation is expected to value the company at between

£50m and £60m. Clydeport was formerly the Clyde Port Authority, operating the ports of Glasgow, Greenock and Ardrossan.

It was acquired for £26m by its management and employees led by Mr John Mather, now executive chairman - in March 1992 as part of the govern-ment's disposal of trust

Its wish to float then was thwarted by the abrupt drop in traffic caused by British Steel's closure of the Ravenscraig steelworks at Motherwell.

The company has since been reorganised and invested £10m with half contributed by the European Union - in upgrading facilities.

Last year it purchased the Hunterston bulk terminal from British Steel for £4.8m, enabling it to start a large coal ehipment business. Clydeport made pre-tax profits of £2.4m on sales of £11.8m in the year to December 31 1993. This year it expects to make £4m on turnover of £18m.

The company is 67 per cent owned by its management and employees and their families. Montagu Private Equity holds 28 per cent and 3i 5 per cent Management and employees may sell up to a third of their

Montagu Private Equity will retain only 6 per cent after flo-tation but 3i intends to retain its entire stake. The company is assessing

## Receivers called in at Peter Storm

By Nigel Clark

Peter Storm Group, the Nottingham-based leisure wear manufacturer, has called in the receivers after three

years of losses. Mr Philip Baldwin, a partner at Price Waterhouse in Birmingham, said he was reasonably optimistic about being able to flud a buyer for the group, famous for its brightly coloured all-weather lothing. Its brands include Peter Storm, Noel Bibby, Clare Morris (UK) and Keighley Special Finishers.

"We are now opening up the books and advertising to see if there is any interest," be said. By the end of November we should have a better idea of the situation.

He said that in recent years the company had been hit by imports from east Asia. Despite an expanding

market, sales had been static at between £2m and £3m. "This is not e large

company. In fact the name is probably bigger than the company," Mr Baldwin said. He added that Peter Storm might have to become more sales driven to make the best use of the brand.

# Housing recovery helps Westbury advance 55%

By Christopher Price

The continuing recovery in the new housing market helped Westbury, the Cheltenhambased building group, lift pre-tax profits 55 per cent in the six months to August 31.

The advance, from £3.7m to £5.76m, came on sales up 14 per cent at £80m (£70m).

Mr Richard Fraser, chief executive, said that the more stable market conditions were enabling the company to achieve its growth targets. The average selling price rose from £60,000 to £63,000 over the year, although this was mostly due to the group selling larger properties.

"Interest has picked up, but is still limited," said Mr Fraser. He added that worries about employment and interest rates

Richard Fraser: growth targets met in more stable market

were subduing prices. 'There is minimal house price infla-tion at the moment," he said. Cost pressures, which had been prominent at the begin-

ning of the year, had eased, Mr

Fraser estimated that material and labour costs were up by about 5 per cent year-on-year. Westbury's land bank with planning permission remained stable at 6,400, with the purchase of more than 1,100 plots at an average price of £14,200. Stiff competition in the land market had prevented further replenishment. However, the strategic land development stock had risen by 800 plots to

5.300 since the year-end. The interest charge jumped from £455,000 to £817,000, while there was also a £700,000 leap in the tax charge to £1.93m. Earnings per share rose 57 per

cent to 5.8p (3.7p). The interim dividend goes up 0.15p to 1.9p. Mr Fraser said he would be disappointed if the full-year figure was not increased as well.

# Beverley losses deepen to £1.73m

By Joan Gray

Beverley, the engineering group which has had its shares suspended since July while it attempts to negotiate a refinancing, announced increased pretax losses for the eix months to June 30 up from £929,000 to £1.73m.

Beverley's 1993 accounts were qualified as the auditors were unable to confirm that the group had sufficient working capital. The unaudited interim accounts carry a disclaimer stating that the audi-

Shoprite Group, the retailer and property investor, has sold

Integration of acquisitions and tight controls boost figures

# Powerscreen rises 12% to £14m

By Christopher Price

Powerscreen International, the manufacturer of screening and stone crushing equipment. reported a 12 per cent rise in pre-tax profits from £12.6m to £14.1m for the six months to the end of September.

Turnover advanced 41 per cent to \$84m (\$59.4m) including £2.98m from acquisitions. During the period. Powerscreen continued its ambitious string of purchases, paying £17.1m for Benford from BM Group, a manufacturer of dumpers and rollers used in the construction and plant hire

Mr Shay McKeown , chief executive, said that the improvements bad been achieved by the successful larger number of markets.

chases and an adherence to

tight control measures. The exchange rate against us as well, so under the circumstances we think these are vary good results," he added.

The shares, however, fell 13p to 282 p.

Operating profits in tha screening division rose 12 per cent to £9.5m (£8.5m) on turnover up 36 per cent to £40.8m, compared with £29.9m. The figures included contributions from Simplicity Engineering and Ludlow-Saylor bought in

# Diversifying out of lumpiness

Andrew Bolger on Vosper Thornycroft, the boat builder in the south

he battle between Brit-ish Aerospace and GEC for control of VSEL, the Cumhria-based aubmarine maker, is ceusing some irritation in the boardroom of Vosper Thornveroft

For the Southampton-based boat builder believes the takeover struggle has overshadowed the fact that Britain still has a warship company oo the south coast - in addition to VSEL's Barrow yard and GEC's facilities at Yarrow oo the Clyde.

And just to underline the point, Mr Martin Jay, chief executive, last week had marks drawn on the floor of the main construction shed at Portsmonth, showing it could accommodate vessels up to 6.000 tonnes.

Vosper was being referred to solely as a hullder of glass reinforced plastic (GRP) minehunters, corvettes and patrol craft, said Mr Jay.

These do indeed comprise the bulk of the 180 vessels which the yard has sold over the past 25 years to 30 navies around the world, but Vosper emphasises that It can also make steel ships up to the size

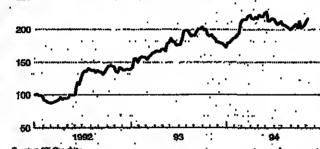

With net cash of about £200m, Mr Jay said Vosper had the financial strength to bond any of the projects in the current naval procurement programme for surface ships. Despite having an order book worth £600m and 14 vessels currently under construction, Vosper still has plenty of

capacity.
Mr Jay said Vosper would also bid for vessels such as the new Royal Navy landing plat-form dock assault ship, which would be too big for the Southampton yard. If successful, the group would become prime contractor, but have the construction done elsewhere.

Although Vosper mads no steel ships between 1988-92, it has recently invested £10m in a new module hall for steelwork construction and fitting. A laser cutting machine is linked

#### **Vosper Thornycroft**

Share price relative to the FT-SE-A All-Share Index

by fibre optics to the yard's computer-aided design system, which has helped push up productivity and improve the quality and finish of individual

components. in spite of this investment and ambitious hidding plans, Vosper is also keen to build up the non-warship aspects of the group. These account for about 20 per cent of sales, compared with only 5 per cent two years ago. The chief executive said he would like to increase this proportion to between 30 and per cent over the next two or three years.

Vosper's main priority is to win more business which is both small in scale and reliable, to help offset the unpredictable swings of warship orders. Mr Jay said: "To talk of diversifying out of defence is to miss the point - we're diversi-fying out of lumpiness."

Many of Vosper's diversification opportunities flow directly from its link to warships and the world's navies. As part of the training and support service offered with its vessels, the group runs e maritime training centre at Portchester, near Portsmouth, which can accommodate 300 people.

Some trainees come from HM Customs and the Royal Fleet Auxiliary, but most serve in the Middle Eastern navies which are Vosper's main cus-tomers. This has led the company to establish an adjacent

Arable school for their chil-

dren, which can accommodate

The maritime centre has developed computer-based training for naval personnel, which is much cheaper than simulators. Its expertise et writing software has been utilised to devise a training scheme for British Rail maintenance engineers, which will be used in BR depots throughout the country. The centre will also soon take delivery of a armoured vehicle from GKN, the engineering group, to train personnel from a Middle

Eastern country. Vosper's higgest opportunity to diversify is probably offered by the government's markettesting initiative. Mr George Cameron, managing director of Vosper's systems, said the group could be hidding for contracts worth up to £1hn over tbe next 18 months. These include the Navy's maritime services operation, which employs nearly 2,000 people and operates 200 support ves-- such as tugs and ligh-

Vosper recently won a threeyear contract for the Ministry of Defence's Record Data Centre, which records all the parts and plans for the Royal Navy's surface ships on computer and fiche. It also has a five-year contract to operate marine services craft in support of the

Back at the Southampton yard, Mr Mike Davidson, managing director of engineering services, said: "We are looking outside to see what we can do with our existing facilities for industries other than ship-

So far the group has identified the nuclear and transport industries as potential customers. It has built a fuel-rod handling machine and fuel store for BNFL at Thorp and is also making GRP humpers, under licence, for trams in Stras-

Having acquired a few business for about £1m each, Vosper said recently it was prepared to buy one or more companies at about the £20m level to increase the pace of its diversification.

The biggest deal to date was the £8.6m purchase in April of HSDE, a maker of electronic control and monitoring

Vosper was sold by British Shipbuilders to a management team in 1985 for £18.5m and came back to the market in 1988, valued at £49m. Its current market value of £236m reflects the uprating which the shares have enjoyed in the last three years, due mainly to the group's strong export position. About 95 per cent of Vosper's

warship orders are exported and the group's focus on minehunters and patrol craft - sell-ing to the Middle East and east Asia - has insulated it to a large extent from the downturn in defence spending hy former cold warriors.

Such a strong export order book might well be attractive to BAe - or even GEC - as the UK defence sector enters what could prove its final phase of consolidation. However, Vosper shares trade on a comfortable premium to the market and the company would prove an expensive proposition to

Mr Jay said: "We've done well in recent years as an independent company and it's our strategy to remain so."

## Huntingdon | Celsis deeper in red after fails to sell Travers and **US** business

Sheres of Huntingdon International Holdings fell 21p to 44p vesterday after the life sciences group announced it had failed to sell Travers Morgan, its UK-based consultancy, and its engineering and environmental services husiness lu

Huntingdon said the annual results, to be published in December, were expected to suffer from the costs of the abortive sales and provisions to turn the businesses round. One analyst said that was likely to send the group into the red.

In May the gronp announced that It planned to focus on its life sciences business, having concioded that the other divislons did not have the earnlogs prospects originally envisaged. It called in Kleinwort Bensoo, the Investment bank, to help with the sale of the businesses. But no pur chase could be concluded, forcing the management to consider other options.

nty executive chairman. described the news as "very disappointing". He said Huntiogdon was making a huge effort to return both groups to profitability. This would include the closure and sale of offices and job losses.

Travers Morgan is an interof 850. Its profits fell from £1.23m to £343,000 in the six months to June. The US husinesses employ 1,750 people and recorded an operating loss of £388,000 in the first half.

in the nine months to June 30, group pre-tax profits fell from £4.34m to £1.28m, while revenue, net of subcontracts. fell from £115.6m to £109.2m,

## BP up 23% to £415m on higher volumes

By Robert Corzine

Britisb Petroleum reported a 23 per cent increase in third quarter replacement cost profits to £415m, with continued cost-cutting being boosted by rising sales volumes, taking the figure for the nine months to September 30 to £1.06bn.

Mr David Simon, chief executive, said it was the best quarterly performance since the first quarter of 1991, when crude oil prices were considerably higher than the current range of \$16-\$17 a barrel for the benchmark Brent Blend. The shares, bowever, closed 9p down at 426p.

Third quarter earnings per sbare rose to 7.6p, compared with 6.1p in the second quarter and 6.2p a year ago. But the quarterly dividend of 2.5p Mr Simon said the results.

which were above most anaivsts' expectations, were "pretty encouraging". The divi-

dend policy would be "re-considered at the end of the fourth quarter on the basis of the fullyear performance". Healthy net cash inflows

from operating activities of £1.17bn for the quarter and dis-posal proceeds of \$581m (£368m) enabled the company to cut its deht by \$675m to \$10.4bn at the end of the quarter, according to Mr Steve Ahearne, finance director. Deht has been cut by about \$6bn since its peak in 1992.

Gearing fell to 60 per cent, against 70 per cent at the halfway stage. The company is not alming et a gearing target, according to Mr Simon, hut it still wants to see deht below the \$10bn level set in 1992. The sale of BP Nutrition ear-

lier this year marked the end of the company's big disposal programme of non-energy assets. The sale of some minor assets should result io proceeds for the full year of about \$1.25bn, Mr Ahearne said.

#### Safeland trebled to £1.09m

Pre-tax profits at Safeland, the property trading and investment company, more than trehled in the six months to September 30, from a restated £327.000 to £1.09m.

Turnover showed a similar increase, from £4.78m to £14.6m. Mr Ray Lipman, chairtbe confidence that had

ties were purchased during the half-year, increasing the value of the investment portfollo from £7.06m at the year end to £10.4m\_

is 0.86p against 0.6p.

Whether you need important statistical information, a business vocabulary in four languages or details of which airline flies to which city, the FI desk diary has the answers.

BUSINESS DIRECTORY. Contains a stock market and financial glossary and lists the top 100 international banks and world stockmarkets.

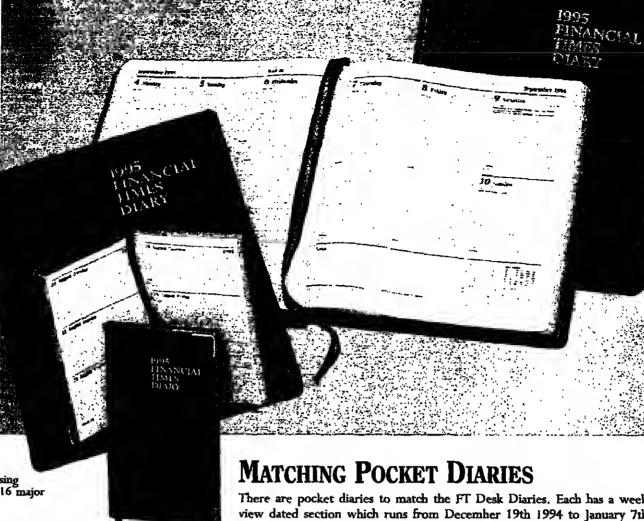

BUSINESS TRAVEL. Contains 52 individual country surveys encompassi no less than 135 international cities. There are city centre maps covering 16 major centres and a 48 page full colour World Atlas.

DIARY SECTION. A week-to-view format which runs from November 24th 1994 to January 28th 1996 with plenty of room at the foot of each page for notes. Useful calendars and planners and international holidays are included,

STATISTICS AND ANALYSIS. Includes graphs showing the FT Actuaries British Government All-Stocks Index, FTSE 100 index, Dow Jones Industrial Average, The Standards and Poors 500 Composite Index and

The FT Desk Diary is available in three finishes, black leathercloth, burgundy bonded leather and black leather. Each has a detachable Address/Telephone Directory with an impressive, hardwearing laminated cover and contains an international dialling code listing.

Size: 267mm x 216mm x33mm. Black Leathercloth

There are pocket diaries to match the FT Desk Diaries. Each has a week-toview dated section which runs from December 19th 1994 to January 7th 1996 and contains 34 pages of business and travel information including a guide to hotels, transport and entertainment in London and other UK cities plus essential information for the major business centres of the world. A detachable personal telephone directory tucks inside the hack cover.

FT Pocket Diary Size: 159mm x 84mm x 14mm Black Leathercloth

Burgundy Bonded Leather Black Leather

## GOLD BLOCKED INITIALS OR FULL NAME

Every diary in the FT range can be personalised with initials or full name.

#### THE FT RANGE ALSO INCLUDES THE FOLLOWING:

(NOT ILLUSTRATED)

#### FT EUROPEAN DESK DIARY

The definitive European diary shows how the legislative system works and gives a most comprehensive country guide for each EU country. Key sections are in five languages and the dated section is a week-to-view format with each week day divided into one hour segments. World atlas, city centre maps and a detachable address/ telephone directory are included. The diary runs from November 24th 1994 to January 24th 1996.

FT European Desk Diary Stze: 230mm x 215mm x Black Leathercloth EDC Black Leather Blue Leather

#### FT NORTH AMERICAN DESK AND POCKET DIARIES

This edition of the FT Desk Diary contains over 100 pages of information covering 62 American and Canadian cities. A full colour world atlas and 25 city centre maps are included. The Pocket diary profiles 19 major international cities. Both diaries have a detachable personal telephone

FT North American Desk Diary Runs from November 28th 1994 to January 28th 1996. SIZE: 267mm x 216mm x 30mm Black Bonded Leather

FT North American Pocket Diary Runs from December 26th 1994 to December 31st 1995. SIZE: 159mm x 86mm x 10mm Black Bonded Leather

#### FT SLIMLINE POCKET DIARY

A slim diary with FT pink pages and a black bonded leather cover with a two-week-to-view format which runs from December 26th 1994 to January 7th 1996. Additional pages contain calendars, year planners and profiles of 1ti. UK cities. International dialling codes and world time zones are included. FT Slimline Pocket Diary

Size: 170mm x 84mm x 5mm Black Bonded Leather

#### FT CHAIRMAN'S SET So exclusive only 1,000 will be created for 1995.

The ultimate desk and pocket diary set bound in rich brown leather with fine gold tooling and issued in a limited edition. The diaries are the same size as the FT Desk and Pocket diaries and contain the same meticulously researched information. Brown Leather

# Fresh highs reached at **London Metal Exchange**

By Kenneth Gooding Mining Correspondent

Investment funds and speculators returned in force to the London Metal Exchange yesterday to send most base metals prices to fresh peaks Only aluminium failed to beat the previous high in the present huying spree, but its price still closed last night \$46 above Monday's level at \$1,855.50 a tonne for delivery in three

Copper moved above \$2,700 a tonne for the first time in four years, helped by weakness of the US dollar, which is making dollar-denominated LME prices look cheaper in terms of other currencles. Traders said that buying from the Far East yesterday helped to lift copper

LASE WAREHOUS (As at Monday's co		
Aluminium	-34,800	to 2,024,375
Aluminium alloy	+140	to 25,680
Copper	-1,975	to 333,100
Lead	-1.375	to 369,775
Mickel	+558	to 149,820
Zino	-1,200	to 1.210,100
Tip	-78	to 30,265

The nickel market reached the highest price levels for two and a quarter years, as did the lead market, while tin climbed to a 20-month peak. Even zinc, which at the begining of this year was thought by many analysts to be the LME metal with the most negative fundamental outlook, rose above \$1,150 a tonne to reach a twoyear peak.

Mr Angus MacMillan, research manager at Billiton

group, explained that thare was a growing perception among investors that the tide was turning for tha zinc

Even so, the market was expected to see a 283,000-tonne supply surplus this year. If the announced output cuts held, however, there might be a 250,000-tonne deficit in 1995, if Billiton was correct in its forecast that demand for the metal would grow by a "hefty" 5 per

On that basis Billiton was forecasting that the average zinc price for next year would be about 55 cents a pound (\$1,212 a tonne). But Mr Mac-Millan warned that It would not take much to wipe out the predicted supply deficit, so much dapended on production cuts staying in place.

## Metals, part of the Gencor Car makers seen leading aluminium demand surge

By Kenneth Gooding

Growth in demand for aluminium to the year 2,000 will be substantially faster than in the past seven years. driven particularly by consumption in Asia and by the automotive industry, according to Mr Jacques Bougie, president of Alcan, the world's second-largest aluminium pro-

However, demand growth for primary, or new, aluminium is forecast by Alcan to rise only at the same rate as in the years 1986-93. "Recycling, particularly of bevarage cans and cars, will play an increasingly important part in metal sourcing to meet demand in future." Mr Bougie predicts.

"Star performers" in future, the Alcan analysis suggests. will be the Asia region, including a Japan recovering from recession, where annual aluminium consumption growth is

■ GOLD COMEX (100 Troy oz.; \$/troy oz.)

Alcan is forecasting that demand for aluminium in cars will grow at an annual 6.5 per cent until the year 2000. Mr Bougie says much of that growth will come from the increased use of castinga which already constitute 70 to 80 per cent of the weight of aluminium in the average car. "Further significant growth may come after the year 2000 when aluminium body structures are adopted for mass-pro-

ent it is not possible to include the former Eastern European markets in the forecasts because data are not reliably svailable. But Alcan belleves Russia's domestic consumption of aluminium in 1993 was only about 800,000 to 900,000 tonnes with the 1.9m tonnes balance of its production being

## Iron ore recovery forecast

By Nikkt Tait in Sydney

Iron ore prices bave reached their nadir, and should begin to edge up next year, according to a study released by Sydney-based AME Mineral Economics. It suggests a nominal one per cent increase in benchmark prices for fines in 1995. followed by rises of 5 and 6 per cent in the next two years. This would reverse the trend

of the past three years - when prices fell by 4.9 per cent, 11 per cent and then 9.5 per cent. AME also snggests that there is potential for a more significant upswing in the price of premium lump ore, where supply constraints are tighter. Here, AME sees a rise of 4 per cent price in 1995,

followed by 5 per cent in 1996. The study argues that two factors will have a major bearing on world iron ore prices. The first is the decreasing dependance of Australian on its traditional Japanese customers, which could begin to undermine the annual globalised setting of iron ore prices through contract negotiations with the Japanese steel mills. The second is the preminm placed on high-grade lump ore, which is favonred by many large steelworks.

Looking further forward. AME sees a gloomy future for the sector. Fast-growing Asian demand should sustain iron ore producers through to abont 2005, it says. "In the longer-term, however, Asian regional requirements may not be sufficient to counterbalance increasing efficiency in steelmaking, new technologies and the structural decline in traditlonal highly industrialised markets.

Turning to the supply side of the equation, AME says: "Although some blgh-grade deposits in Australia and Brazit are nearing exhaustion and their production rates will decrease, there are sufficient known reserves in every case not only to maintain bot to increase production,"

# Jute mills scramble for supplies

India fears a shortage of high grade fibre, writes Kunal Bose

have in recent years taken up production of high value jute goods and export quality varn in a big way have rushed to Bangladesh to cover their requirement of superior grades of raw iute for the current seasoo.

Even as India, the largest producer of jute and jute goods, barvests a much bigger crop than last year's the government and industry officials fear that there is going to be an acute shortage of the higher grades.

According to the industry officials, Indian mills have so far signed contracts for the import of 300,000 bales (180kg each) from Bangladesh. This seasoo's indian imports from that country could reach 500,000 bales, compared with about 300,000 in 1993-94 "We have, however, drawn a blank in Vietnam and China, which do not have any surplus of jute this year," says an official at the Indian Jute Mills Associa-

'Tragedy' for Windwards

bananas if Geest pulls out

be Indian jute mills that tion. "Last year, we imported some fibre from Vietnam. Thailand is a net importer of jute." Bangladesh is harvesting 5.5m bales of jute in the cur-

rent year, up from 5.1m in 1993-94, and the quality of the crop has turned out to be highly satisfactory. As the country opened the season with stocks of 2.3m bales total fibre availability will be 7.8m bales. Indian industry official estimate that Bangladeahi mills will consume less than 3m bales, while the requirement at village level will be about 400,000 bales. So Bangiadesh will hava a plenty of

exportable surplus. According to the Indian Jute Development Council, the Indian jute and mesta crops in 1994-95 will total 8.9m bales and not 9.5m, as the industry and the trade earlier thought

Because of the high premium that jute and mesta fetched over the minimum prices throughout the last season, the farmers committed

Lucia and St Vincent provides

islands and Geest are at present negotiating a new contract for the marketing of bananas.

The economies of the Wind-

ward lolands are heavily

dependent on the hanana

been examining a number of

options, not only the Geest

negotiations, but alternatives

in the event that we cannot

arrive at a satisfactory conclu-

slon with Geest," Mr Alleyne

said. Geest had been helpful to

the islands in negotiations

with the European Union over

the marketing of bananas, and

it would be "tragic, although not the end of the world for

us. . . if the company were to

significantly reorganise its

banana marketing arrange-

"The banana iodustry has

957,000 hectares to the crop this year, against 892,000 hectares in 1993-94, says an official at the Directorate of Jute Development. "More land would have been brought under the crop had the weather been favourable dur-

ing the sowing period." Moreover, as some of the major jute growing centres like north Bengal and Bihar experienced drought when the crop was growing, the average is expected to decline to 1,860kg a hectare from 1,907kg in 1993-94. "The late harvesting of jute in many areas and the shortage of water for retting [soaking] are responsible for the deterioration in the quality of the Indian crop," according to the

DJD official. The official estimate is that Inferior gradas' share in tha total will rise from 11.5 to 20 per cent in 1993-94. "Besides the shortage of superior grades of jute what is causing concern to the industry are the very high prices of fibre around this time of year when the mills build up stocks," says the IJMA official. "The mills should now ba holding raw jute stocks equal to at least one and a half months' requirement. But their present fibre inventory can at the most sustain production for two

Though this is traditionally

the peak marketing period for

jute, the benchmark TD-4 grade is quoted at the unusually high price of Rs750 (£14.50) a quintal (100lb). Industry officials say the very low carryover into the current season and the "alarmingly low daily arrival of the crop in the village markets" are responsible for the prevailing high prices. The farmers, according to the Jute Balars' Association, are selling jute in small lots as they expect prices to go up as the season progresses. It is

principally due to the high prices in India that the jute market in Bangladesh is ruling firm, in spite of a bumper crop. MARKET REPORT

Gold price slide halted The London GOLD price was a

shade firmer yesterday afternoon after a shaky morning spent in the aftershock of Monday's fund-driven sell-off. At \$383.75 a troy ounce the price was still 75 cents down at the close, but that was 30 cents off the low. Dealers said there was a

sprinkling of fund buying to help the New York market firm in very light business. "A bit if physical interest has triggered some short-covering as well," one added. "Once a floor is in place, we

could see the investors coming back again," said another, adding that physical offtake alone would be insufficient to rally the market.

Commodity London Exchange COFFEE futures reversed an early rally as talk circulated that a new indepen-

1995-96 crop might, like one by US banker Morgan Stanley, be far higher than most recent estimates.

Morgan Stanley forecast Brazil's 1995-96 crop at between 20m and 22m bags (60kg each). That figure was well out of line with Brazil's own preliminary estimates of between 13m and 15m bags. But traders said that the market could not ignore rumours of that kind.

OIL prices rallled meanwhile as traders rushed to buy ahead of what they expected to be a bullish report on US primary oil stocks.

Market players said that the American Petroleum Institute was likely to report big falls in US petroleum products stocks, reflecting the impact of pipeline disruptions after widespread flooding in the Houston

dent forecast for Brazil's Compiled from Reuters

### MARKET REPORT Shares rally following Bank inflation report

By Terry Byland. **UK Stock Market Editor** 

An extremely volatile trading session left the UK stock market showing little change on the day after early losses had been quickly recovered when the Bank of England released an unexpectedly favourable report on domestic infla-

tion prospects. Trading was overshadowed from the opening by apprehension ahead of the latest National Purchasing Managers Index in the US and the Bank of England Quarterly Bulle-

tin, both released in mid-afternoon. The market drifted easier before dropping sharply when the US Purchasing Managers Index alarmed the dollar and US and global bond markets hy disclosing the highest level of business activity for seven

years, with its prices component tion was posing no problems, through the electronic reporting also stronger than expected. The appeared to remove the market's FT-SE 100-share Index extended its loss to show a net fall of nearly 20 points within a few minutes of the US news. However, traders said there was no time for any selling pressure to develop.

The Bank of England Bulletin, released shortly afterwards, inspired a dramatic turnround in UK bonds and equities. The FT-SE 100 Index climbed back into plus territory, albeit briefly, and ended only 1.1 off at 3.096.3. At the close. London brushed aside both weakness in US bonds and the fall of nearly 30 points on the Dow Industrial Average in UK trading hours.

The Bank's prediction that domestic inflation would stay in the lower half of its target range for the next two years, and that wage infla-

fears of any sudden upward move in hase rates. Analysts commented that much of this week's dehate over base rates has been one of timing; the market had long ago braced itself for higher rates at some time

in the future. However, market analysts were cautious about abandoning the view that the Bank may still tighten policy at some stage as economic recovery continues, especially in view of the further evidence yesterday of pressures in the US.

Traders warned that the recovery in the market towards the close should be regarded as further evidence of London's volatility rather than of a change of investment sentiment. Seaq volume remained poor, with the day's total of 471.8m shares

network a shade lower than in the previous session.

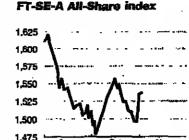

LONDON STOCK EXCHANGE

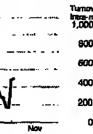

In the early part of the day, volume was very slow, although the Footsie moved erratically, opening 15 points down hut almost regaining the overnight level at midsession. The FT-SE Mid 250 lodex closed at 3,524.3 for a rise of 7.4 as the utility sector continued to race ahead. Trading in non-Footsie stocks, incorporating many utilities, made up around 55 per cent of total business

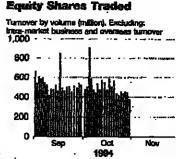

The market closed with an irregular pattern. British Petroleum ended the session lower as not even excellent trading figures could offset Wall Street's influence and some disappointment that the dividend payout had not been raised. Shell Transport was easier, and most of the dollar-orientated stocks, including pharmaceuticals, were unable to make progress at the close.

Retail and consumer shares, the most closely linked to hase rate worries, made only a cautious response to the Bank's favourable comments on inflation. Banks. which have also proved sensitive to threats of higher base rates because of the negative implications for their had deht portfolios, turned firmer. A leading US securities house turned positive on the UK banking sector this week.

Traders were unwilling to he drawn on prospects for the opening of the London market this morning. Some suggested that yesterday afternoon's rally might prove to be as much as London could manage if the US and European bond markets remain weak.

terms on Monday. Dealers said BP's thirdquarter numbers were at the mildly disappointed with the unchanged dividend, although some of the more conservative analysts said that hopes of an increase in the payment were unrealistic.

It was also pointed out that BP shares had outperformed the market hy 7 per cent over the past month and were due for a period of consolidation, albeit in a much higher trading band than has been the case in the past couple of years.

Another hearish factor affecting BP was news that two of the influential Wall Street hrokerages, Smith Barney and Prudential Bache, took the view that the oil majors are now overvalued. And at least

two of the important Londonbased securities houses, including Goldman Sachs and Nat-West Securities, were seen to be big sellers of BP shares yesterday. The stock retreated 9 to 426p on slightly disappointing turnover of 9.8m.

#### **Demand for UB**

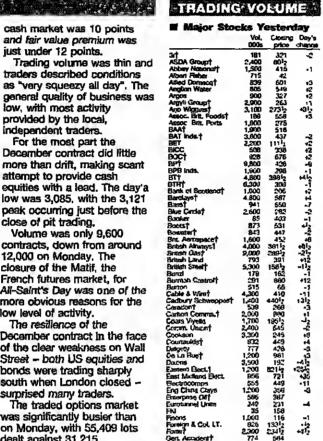

Food manufacturer United Biscuits advanced 9 to 315p as S.G. Warhurg sent a note to clients arguing that the shares had fallen too far. The house sector specialists said the stock was at a five-year relative yield high and price low and com-mented: "We continue to regard United Biscuits as one

of the hest recovery stocks in the sector.

Other analysts cited a return of hid speculation which has been touching the company for some time. UB is seen as being one of the only UK food manufacturers with enough overseas interests to attract one of the big international players.

#### Airways rebounds

Having underperformed the market hy close on 5 per cent over the past month. British Airways rehounded 81/4 to 3611/2p as enthusiam for the shares huilt up ahead of the group's traffic flows results for October, due Thursday.

Fisons Foreign & Col. LT. Foreign

cent in September, most ana lysts are expecting a significant slowdown for the latest month as BA moves into slower seasonal trading. Best bets among the major houses point to an October traffic gain of between 4 and 5 per cent. At all events the shares

After traffic growth of 7.3 per

traded in a turnover of 4m. helped hy stories that a hig US house - possibly Goldman Sachs - was recommending clients to huy a portfolio of airline stocks with a heavy Euro-

pean weighting, including KLM and BA. Leading stores group Marks and Spencer was sold in early trading following news that the head of its US arm had quit the company. Although Brooks Brothers represents a very small part of M&S profits, there were concerns that the resignation foreshadowed a general withdrawal from the US. Some particularly bearish analysts saw signs that UK retailers were unable to operate successfully overseas. M&S receded 4 before rallying with the market to close a net

penny up at 416p. Elsewhere in the sector, Storehouse was also weaker, with turnover heavy at over 8m shares and the shares slipping 2 to 217p.

Dixons was actively traded, with dealers saying that the 3,5m turnover represented a strong two-way pull on the stock. The shares fell 31/2 to 192p, with Smith New Court helieved to have been putting the sell argument.

than previous tobacco lawsuits.

However, the shares received hroker support - Lehman Brothers recommended them ahead of third-quarter figures today - and they ended the day only 2 lower at 437p.

Wellcome, the pharmaceuti-cals group, fell 7 to 632p following a television news report which cast a shadow over Septrin, a product to which Wellcome contributes.

Bank shares were firmer. with the UK sector hoosted hy news that the Lehman Brothers strategy team has included it as one of its most attractive sectors.

Royal Bank of Scotland, which ran up 9 to 449p yesterday, was one of Lehman's favoured UK banking stocks. Standard Chartered dipped 7 to 286p after James Capel, the agency hroker, was said to have placed 1.5m shares. Another leading broking house was said to have recommended a switch out of Standard and

into HSBC. Royal Insurance easily outnaced the rest of the composite insurance sector and were given a strong push by BZW, whose insurance team recently visited Royal's US operations. BZW insisted the shares were "some 20 per cent undervalued." It said the outlook for Royal's US operations was considerahly more promising and a convergence to industry average returns would imply a turnaround of some \$150m per

annum in pre-tax profits. By

the close Royal shares were 7

higher at 299p.

There was no let-up in the chase to huy the utilities with the Recs posting further hig gains on the prospects of bum-per special dividends and big profits gains when the interim reporting season gets underway in December.

And water stocks were boosted by higher than expected interims from Thames Water, although profit-taking

left the latter easier at 531%p. In the Recs. East Midland jumped 35 to 721p as the market hecame increasingly excited about the prospect of another special dividend post the sell off of the National Grid. Other Recs to move higher included Eastern, 25% firmer at 821/4p and Manweb.

23 hetter at 830p. A press report that Enrotunnel faces a potentially heavy hill for local authority rates pushed the shares 4 lower to 231p in very thin trading conditions. The company is said to be seeking government help to soften a rates assessment of £42m hy Folkstone county council. The assessment compares with forecast revenue hy the company for this year of around £37m.

Media conglomerate Pearson improved 8 to 642p as S.G. Warhurg reiterated its positive recommendation.

**MARKET REPORTERS:** Steve Thompson, Peter John, Jeffrey Brown.

Other statistics, Page 19

## **BP** weak on US influence

A sense of anti-climax spread across the oil sector as BP shares retreated in the wake of the third-quarter figures and following a steep fall on Wall Street. BP hit all-time records highs in sterling and dollar

very top end of expectations but that the market had heen

Low trading volume, narrow

premiums and a trading range

just short of 40 points added

up to a volatile day for stock

cash market was 10 points and fair value premium was just under 12 points. Trading volume was thin and traders described conditions

as "very squeezy all day". The

low, with most activity provided by the local. independent traders. For the most part the December contract did little more than drift, making scant attempt to provide cash equities with a lead. The day'a low was 3,085, with the 3,121 peak occurring just before the

close of pit trading. Volume was only 9,600 contracts, down from around 12,000 on Monday. The closure of the Matif. the French futures market, for All-Saint's Day was one of the more obvious reasons for the low level of activity.

The resilience of the December contract in the face of the clear weakness on Wall Street - both US equities and bonds were trading sharply south when London closed surprised many traders.

The traded options market
was significantly busier than
on Monday, with 55,409 lots
dealt against 31,215.

#### **MARKETS REPORT**

## Bank calms market nerves about higher rates

Sterling lost some of its lustre yesterday after the Bank of England released a fairly benign quarterly inflation report, writes Philip Gawith.

Traders assumed that the Bank's report makes less likely a decision to raise interest rates at today's monthly mone-

The report prompted a sharp rally in short sterling futures as traders scrambled to cover short positions they had taken ahead of the report's release. The pound closed in London

at DM2.4510, from DM2.4583, and at \$1.6347, from \$1.6306. After the report was released, it fall to DM2.44 and below \$1.63, before recovering.

The dollar traded sideways, finishing at DM1.4994 from DM1.5077, and Y96.755 from Y96.95, despite a purchasing managers' report showing stronger than expected price

Trade elsewhere was fairly thin, with most of Europe

POUND SPOT FORWARD AGAINST THE POUND

closed for All Saints Day. The D-Mark was stronger against the lira, rising to L1,027, from L1.023. It was also firmer against the krona, trading yesterday evening at SKr4.804 from SKr4.780.

■ The three month sterling tary meeting between the chancellor and the governor of the Bank of England.

LIBOR rate firmed to 6½ per cent, as traders got nervy about the prosent of th pect of higher rates. It later eased to 6% per cent when the Bank's report, saying that the inflation outlook had improved, was released.

In the short sterling market, prices jumped in after hours trading, with the March contract rising around 15 basis points to 92.75, from 92.60. Analyets said the market was experiencing a massive shortcovering rally.

Nov 1	······Latent·····	Prev. close
£ apot	1.6315	1,6355
1 mth	1.6306	1.6347
3 mith	1.6299	1.6340
1 yr	1.6201	1.6228

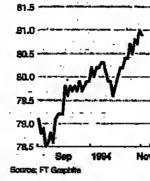

The core conclusion in the report was that the inflation outlook had improved. The Bank now expects underlying inflation to be around 2.5 per cent in two years time, down from the forecast in its last report of about 3 per cent.

Although the market's response was very bullish. some analysts said that an early rate rise had not been ruled out.

Earlier there had been little to be gleaned from the Bank's daily money market operations. It provided £15m late assistance, after earlier providing £677m liquidity at established rates. The daily shortage was £900m. Overnight money traded between 5% and

6½ per cent. One seasoned money market observer said that the old days of reading the monetary "tealeaves", for hints of the direction of policy, were past. While it was fair to assume that a sustained period of easy money rates had the acquiescence of the Bank, it would not be cor-

Trade-weighted Index, 1985 = 100

rect to assume that tighter monetary conditions necessarily conveyed any signal about the Bank's intentions. As likely as not, he said, this

reflected technical factors. such as who was holding treasury hills, and whether or not they wanted to sell them to the Bank. "Now the focus is on the

DOLLAR SPOT FORWARD AGAINST THE DOLLAR

monthly monetary meeting. We have the Ken and Eddie show," he said.

Mr Tony Norfield, UK treasury economist at Abn-Amro, said the market would anyway be very suspicious of any message the Bank was alleged to be sending through its daily market operations.

Many in the market were caught offside when the Bank last raised rates on September 12. They mistakenly inferred then that the Bank planned no policy change when it set a iwo week repurchase agreement, at established rates, a few days before it raised rates.

One point made in favour of maintaining the status quo is that the trade-weighted ster-ling index has appreciated by three per cent, from 78.6 before the last rate rise to yesterday's close of 80.9. This, according to a rule of thumb sometimes cited in the market, is equivalent to a rise in interest rates of about 75 basis points.

Some analysts felt the gover-

would re the spe needs is

# NAPM report Sleepy bourses offer mild reaction to US data leaves Dow sharply lower

US share prices were sharply lower across the board yester day morning in the wake of a weaker bond market, which was disturbed by a strongerthan-expected manufacturing sector report. writes Patrick Harverson in New York.

By 1 pm, the Dow Jones Industrial Average was down 26.91 at 3,881.21. The more hroadly-based Standard & Poor's 500 was also markedly lower at the halfway mark, down 3.19 at 469.16, while the American Stock Exchange composite was off S.20 at 455.77 and the Nasdaq composite off 5.52 at 771.97. Trading volume on the NYSE was 183m ahares

Following Monday's losses. tha stock market opened in a bearish mood. Early losses in the bond market only deepened the gloom. The losses, which sent the yield on the 30-year back above 8 per cent, were prompted hy a rise in tha National Association of Purchasing Management's index of business activity from 58.2 per cent in September, to 59.7 per

cent in October. Wall Street had expected a 59.0 per cent reading and analysts sald the data only increased the likelihood that the Federal Reserve would raise interest rates at some time within the next month.

The consensus was that mone-

following the November 15 meeting of the Fed's open market committee.

Share prices fell hecause atock market investors were fearful that another interest rete increase would slow the economy down too far, and break the pattern of steady growth in corporate earnings. Also, higher interest retes could eventually persuade investors to move out of stocks

and into fixed-income assets. Among individual stocks, cyclicals were notably weaker, unsettled by concerns ahout the long-term economic outlook. Caterpillar slipped \$1 to \$58%, International Paper fell \$1% to \$73% and Minnesota Mining & Manufacturing dropped \$1 to \$54%.

The oil sector, which had a good run last week, ran into selling after the broking bouse Prudential Securities down-Mobil fell \$1% to \$83%, Exxon \$1% to \$61%. Royal Dutch Petroleum \$1% to \$114% and Chevron \$% to \$44%.

In the Nasdaq market, Bio-gen plunged \$8% at \$40% in volume of 6.5m shares as investors reacted to Monday's late news that the company was taking a \$25m pre-tax charge to cover the cost of halting the development of its anticoagulent Hirulog, which was one of its most promising drugs.

Toronto was lower at midday, pressured by inflation fears after vainly trying to recover in earlier trading. The TSE 300 composite index was 20.14 lower at 4.271.51 by noon in volume of 26.3m shares.

Three of Toronto's 14 sub-indices remained higher at midday, hut rate-sensitive conglomarates fell 0.9 per cent while financial services, also sensitive to high bond market yields, lost 0.7 per cent. Forestry fell 0.8 per cent MacMillan Bloedel lost C\$% to C\$18% and Fletcher Challenge

## Brazil falls by 2.5%

2.5 per cent at midday, with the Bovespa index of the 55 most active stocks down 1,216

R\$147.3m (\$174.3m). Investors were worried about fears of higher inflation, with after a 1.9 per cent rise in

Telebras preferred was off 2.2 per cent at R\$39.80, Vale do Rio Doce, the mining group, was down 3.5 per cent at

R\$176.50 and Petrohras had

Shares in São Paulo were off declined 3.1 per cent to R\$126. Merrill Lynch, the US its portfobo weighting in the at 46,763 in turnover of Latin American markets in view of the gains shown since the summer and their "historic sensitivity to sharp movements rate could reach 3 per cent that Brazil faced a difficult few months ahead and that the change in government could mark a correction from recent gains. The bank said it had increased its portfolio weightings in Singapore, Malaysia.

## Johannesburg weakens

De Beers fell by a net R2 at R96.50 after an earlier loss of R3. Dealers said that the group was under pressure from a court trial in the US where General Electric Co is alleged to have conspired in 1991 and 1992 with a De Beers affiliate to fix prices of indus-

Tha stock, they said, was also being hit by speculation that the Central Selling Organisation's marketing agreement with Russia was coming under

FT-ACTUARIES WORLD INDICES

The hroad market loat ground as the lower bullion price and weak world markets made their effect felt.

The overall index came off its low for the day to end 15 down at 5,708, industrials slipped 29 to 6.578 and golds shed 16 to 2.208, also off the day's worst.

R1 to R237. Engen dipped 50 cents to R34.50 ahead of its annual results, while Sasol lost 75 cents at R34.75.

Canada class A gave up C\$% to

Y2,036.8hn, while investors sold short a net Y419.6bn, up by Yl.4bn. counter software company, was suspended from trading for the day due to reports that

it would take over the trade-show husiness of Ziff Communications, a US media company, for around \$200m.

active issue, rose Y3 to Y403. to Y2,130 and Seivu losing Y40 exporters were down on the

Japan Telecom finished Y80,000 firmer at Y3.62m, while Japan Tobacco rose Y30,000 to Y1.11m. The latter was left

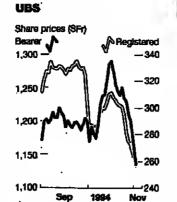

For once, the reaction to US data, as the NAPM October index came out much higher than expected, was more marked in the US than in Europe, writes Our Morkets Staff. Among senior bourses, Paris, Milan and Madrid were closed for All Saints Day.

ZURICH saw further action in UBS, as the market mulled nine-month figures out late on Monday, hut the SMI index shed 2.6 to 2,503.9 in otherwise quiet conditions.

UBS bearers fell SFr41 or 3.5 per cent to SFr1,136 and the registered SFr10 or 3.7 per cent to SFr257 as Credit Suisae reduced its earnings estimates for this year and next.

However, Mr Ian McEwan at Merrill Lynch said that the figures were in line with expectations and the share price fall a further reaction to the board's continuing battle for influence with Mr Martin Ebner's BK Vision, which holds about 18 per cent of the registered stock. In his view, the bearers were still "wildly overvalued", and he saw SFr1,000 as a more

realistic valuation. The registered were trading at a premium of 34.4 per cent to the bearers on September 29.

when the board announced its plans for a single chare category to curb the power of predetors. By yesterday, the premium had fallen to 13.1 per cent, suggesting that the market expected the board to win its battle with Mr Ebner, BK Vision fell SFr40 or 3.1 per cent to SFr1,250, taking cumulative losses since the battle lines were drawn to 13.8 per cent. CS Holding, continuing to

benefit from switching out of UBS, picked up SFr8 to SFr557. Insurers, too, rose furtber, Zurich adding SFr18 at

advancing SFr12 to SFr775. FRANKFIIRT's Day index closed the session at 2.069.73. feli to just over 2.062 after the NAPM data, and then recovered to an Ibls-indicated after-

eased towards the end. Stuttgart, Düsseldorf and Munich were closed for the holiday, and German stock market turnover fell from DM5.6bn to just DM3bn. Ms Barbara Altmann at B Metzier in Frankfurt observed that share price moves needed to

noon close of 2,066.18, up 4.60.

Pressure from bund futures

approached with care. However, two of the main Ihis Dax moves. Volkswagen up DM9.20 to DM446.20 and Mannasmann up DM7.90 to DM407.40, might be significant, she said. VW and Mannesmann

SFr1,163 and Swiss Re bearers hoth came under pressure some weeks ago as the weak dollar threatened export-oriented cyclicals: the currency weakness might not be at an

end, but there might be some

hope for its victims. AMSTERDAM marked DSM down heavily as the chemicals group turned in third-quarter figures at the lower end of analysts' expectations, and the shares dipped £15.00 or 3.4 per cent to Fl 141. However, an element of profit-taking was also in evidence following solid gains in the stock over the past

Brokers expected DSM to rally in the medium term given the forecasts for good full-year figures, while the group remarked that the weaker doliar was not expected to have a significant effect on earnings.

The AEX index ended with a

loss of 2.37 at 410.25. KLM went against the trend on brokers' upgrades ahead of today's first-half results, and the shares advanced fl 1.60 to Fl 48.50. There were expectations that the airline would return net profits in the region

of Fl 300m. STOCKHOLM eased gently as good corporate results offset the intarnational mood. The Affärsvärlden General index fell 3.00 to 1,482.00 in moderate turnover of SKr2.25bn.

Results came from Aga, the industrial gases group, which put on SKr5 to SKr73, although James Capel said that its forecast of a 20 per cent rise in profits this year was in line with expectations. However, there was no argument about Autoliv, the car safety equipment company: earnings per share were up 81 per cent after nine months, and the shares rose SKr22, or nearly 9 per cent

OSLO's All-share index finisbed 4.37 down at 600.67 in turnover of NKr478m. Hafslund Nycomed "A" closed NKr1.50 higher at NKr120, its ninemonth results proving above

some expectations. Den norske Bank, reporting in line with forecasts, saw its free "A' shares slip NKr0.10 to NKr16.90 on profit-taking after a strong

showing on Monday. COPENHAGEN was led lower by a sharp decline in AP Moller'e stocks amid worries about the effect on the shipping group of the weak dollar and poor international ship-

ping rates. The KFX index fell 1.20 to 93.47. Moller's 1912 "B" share fell DKr4,000 to a year's low of DKr98,000 while its Svendborg. "B" stock shed DKr5,500 to

DKr141,000. **HELSINKI** was pulled lower by declines in forestry shares and Nokia, the telecoms based conglomerate. The Hex index slipped 13.8 to 1,940.2. One of the sadder stories was the drop of FM3.50 to a new 1994 low in EffJohn, whose Silja Line subsidiary, in the ferry business hut not connected to the Estonia sinking at the end of September, said that the num-ber of its passengers fell by 15 per cent last month.

## Dollar's decline against yen leaves Nikkei easier

#### Tokyo

The dollar's fall to the Y96 level and Monday's decline on Wall Street generated caution, and the Nikkei 225 average declined on arbitrage linked selling, writes Emiko Terazono

The index lost 73.12 at 19,916.48 after a day's high of 19,929.49 and low of 19,836.97. Unwinding of arhitrage positions depressed share prices. while financial institutions took profits on large-capitalisa-

tion stocks. Volume wae 250m shares, against 243m. The Topix index of all first section stocks shed 5.31 to 1.579.35 and the Nikkei 300 dipped 1.31 to 289.19, Losers gainers by 531 to 410, with 210 issues unchanged. The ISE/ Nikkei 50 index eased 0.41 to

Traders said sentiment was depressed by the low trading volumes. The balance of margin buying reflected sluggish activity, with the outstanding halance of stocks bought on margin last week falling for the 14th consecutive week. The balance of margin huying on the Tokyo, Osaka and Nagoya exchanges was down Y10.3bn from the previous week to

Large-capitalisation shares retreated on profit-taking: Mitsublehl Heavy Industries declined Y3 to Y786. However, Nippon Steel, the day's most

The retail sector was the higgest loser, with Jusco, a large supermarket chain, falling Y50 to Y1,150. High-technology higher yen: Toshiba receded Y11 to Y753 and Fujitsu Y20 to

untraded for the bulk of the afternoon, reflecting the lack

of enthusiasm among investors

wards the overall market. Teijin, a textile company. gained Y14 at Y600 on projections of an earnings recovery while Alpine Electronics added Y40 at Y2,020 after a rise in its interim recurring profits. Stock prices in Osaka eased in light activity, the OSE average losing 6.51 at 22,088,44 in

volume of 32.1m shares.

#### Roundup

Weakness was widespread among the region's markets. TAIPEI dropped by 5 per cent as institutions sold heavily in the electronics and financial sectors. The weighted index plummeted 325.26 to 6,201,21 in turnover of T\$52,82hn, Walsin Wire and Cahle, the day's second most active issue, fell T\$1 to T\$32.90 and, among banks, ICBC lost T\$6.50 at T\$90.50. China Devel-

opment declined by the daily per cent limit to T\$131.50. Marine shares that had pre viously risen on sound profits forecasts were also weak - the most active issue, Yang Ming Marine, was limit down at

T\$36.90. Brokers said the market was expected to consolidate before parliamentary elections due on

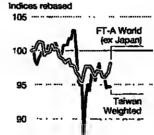

December 3. HONG KONG was lower on profit-taking after the strong Hang Seng index slipped 72.85 to 9,573.40, whila the Hang Seng China Enterprises index. which monitors H-shares of mainland China companies, receded 27.16 to 1,361.82 after

Monday's 4 per cent rise. Tnrnovar shrank HK\$3.22bn from the previous day's HK\$4.15bn.

Hong Kong Telecommunications, whose interim net profits gain of 15 per cent was in line with expectations, relinquished 35 cents at HK\$16.20 on profittaking, and as analysts voiced concern at lower than expected revenue growth.

Among tha H-shares, Kunming Machine went against the trend, gaining 5 cents at HK\$3.10, in spite of a pessimistic report on its prospects by Salomon Brothers.

SEOUL remained marginally ahead in active trading after profit-taking and a state fund's intervention erased much of an

early strong gain. The compos-ite index closed 2.81 firmer at 1,108.43, off a day's high of 1,116.48, in volume of 51.2m shares, compared with Mon-

The sharp early rise in the index for the third straight day prompted profit-taking across the board and sell orders worth Won31.5bn by the stock market

stabilisation fund. KUALA LUMPUR saw further forced selling by clients unable to meet margin calls and the market finished 1.4 per cent lower, the composite index losing 15.27 at 1,093.58. Trading, however, was sub-dued ahead of a public holiday

Tenaga Nasional, the utility giant, was among the day's big losers, tumbling 60 cents to

SINGAPORE was lower after the overnight fall on Wall Street and in response to the forced selling of Malaysian stocks hy clients unable to meet margin calls.

The Straits Times Industrial index fell 14.84 to end at the day's low of 2,364.19.

DBS Land warrants were

actively traded, losing 4 cents

at \$\$1.92, after an intraday

SYDNEY declined as sentiment was hit by renewed weakness in offshore markets. The All Ordinaries index fell 16.8 to 2,028.0, while an estimated 199m sharee ware traded, valued at A\$749m.

All the leading issues were weaker, with BHP closing 14 cents down at A\$20.50 in volume of 1.96m shares.

Miners were hlt hy lower commodity prices - CRA dipped 12 cents to A\$19.04 and MIM 3 cents to A\$2.90. WMC ended 14 cents lower at A\$8.25. Amcor, the packaging group which announced that it bad launched an A\$134m takeoverbid for RIG Rentsch Industrie Holding, of Switzerland, shed

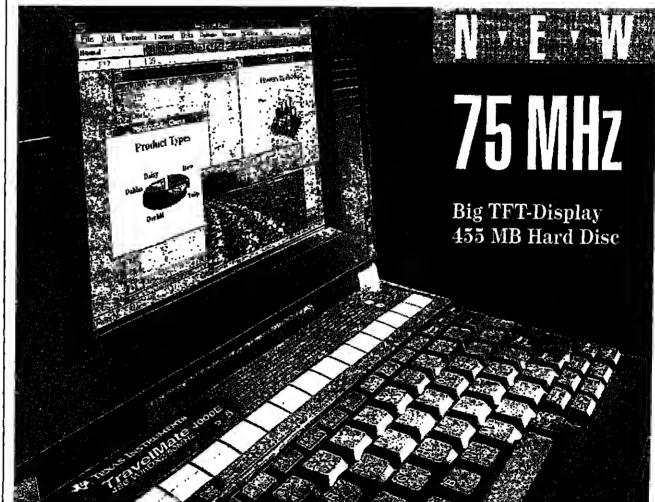

11 cents to A\$8.85. BANGKOK weathered profittaking throughout the day to close higher. The SET index moved ahead 7.65 to 1,536.48

Scattered buying appeared in communication issues, banks and construction materials companies, while selling amerged in the finance and

KARACHI eased towards the close on the first day of the new account. The KSE 100share index shed 8.75 to 2,202.34, with losers leading gainers by 213 to 93. Dewan

Textile fell Rp10 to Rp350. WELLINGTON Was sup ported by strength in leading stocks, which helped the NZSE-40 capital index to a gain of 8.85 at 2,109.32 in turnover of NZ\$41.8m

Carter Holt Harvey and Fletcher Challenge both rose hy 5 cents to NZ\$4.43 and NZ\$3.99 respectively, whila Brierley Investments gained 1 cent to NZ\$1.23. All three stocks attracted high turnover, indicating overseas support,
